

NOTICE

List of Non-Renewed Registrations

This notice is published under section 54 of the Agvet Codes. The registrations of the following products were not renewed for the financial year 2004-2005 and accordingly these registrations ended on 30 June 2004.

It is an offence under Part 2 of the Agvet Codes for anyone to possess for the purpose of supply, or to supply, the following unregistered chemical products in Australia unless the products were in their possession before 30 June 2004 and the possession or supply is in accordance with the APVMA's instructions, set out below.

It is an offence for a person or company who imported the product into Australia or manufactured the product in Australia to possess for supply or supply the product after 30 June 2004.

If the registration of the product was subject to conditions – the possession, custody, supply or use of the product must be in accordance with those conditions (including any conditions relating to the shelf-life or expiry date).

While it is an offence against the Agvet Codes to possess, supply or use an unregistered chemical product, section 54 (2) allows a person, other than an importer or manufacturer, to deal with product in accordance with the APVMA's instructions below, for 2 years after the day on which the registration ends.

Instructions for dealing with the chemical products

The APVMA issues the following instructions for the possession, custody, supply and use of existing stocks of the chemical products listed in this notice and which were manufactured in, or imported into, Australia before 30 June 2004:

1. The label attached to the container of the product must be identical (except for particulars relating to the batch number, date of manufacture or expiry date of the product) to an approved label for that product that was in force on 30 June 2004; and
2. The products are to be used in accordance with the instructions on the approved label for that product.

Note: The label(s) for these products in force on 30 June 2004 continue in force while these instructions apply to the product.
