

MRL Standard

Maximum residue limits in food and animal feedstuffs

August 2008

Table 4

Maximum residue limits for pesticides in animal
feed commodities

Residues of substances may occur in animal feed commodities for which the following maximum residue limits (MRLs) or extraneous residue limits (ERLs) apply. Residues of a substance may arise from approved uses of that or another substance, or from extraneous contamination. Entries in Table 4 are normally expressed on a dry weight basis.

Feed commodities that are also primary human food commodities have not been included in this table and the MRLs for these commodities will also apply as MRLs when they are used as animal feed commodities. Examples of such commodities are the cereal grains, pulses, oil seeds and any other food commodity that is used as a substantial animal feed commodity. The entries in this table should be read in conjunction with the relevant entries in Table 1 when considering the MRLs (or ERLs) applied to animal feed commodities.

Table 4

Compound	Animal Feed Commodity	MRL (mg/kg)
Abamectin		
AL 0541	Soya bean fodder	*0.01
Aldrin and Dieldrin		
	Primary feed commodities	E0.01
