Date: 13 December 2024

To whom it may concern

I write in response to a request for comments on an application from Syngenta Australia Pty Ltd to register the product Victrato Tymirium technology Seed Treatment for use on wheat and barley. The product contains 200 g/L cyclobutrifluram as the only active constituent.

This submission is presented on behalf of the Australian Export Fodder Industry through a research project funded by AgriFutures Australia. That research project:

- Is undertaken on behalf of the Australian Export Fodder Industry.
- Is funded and supported by AgriFutures Australia.
- Is conducted on behalf of a range of members across the entire Australian fodder supply chain.
- Reviews current and proposed revisions to market MRLs.
- Provides advice to government on export fodder industry views in relation to the impact on market access of chemicals in use on Australian fodder.

On behalf of the export fodder industry, I advise that based on the information provided by APVMA in the Trade Advice Notice dated December 2024, the industry does not object to the proposed registration or the proposed maximum residue limit of 1mg/kg for Primary Feed commodities. No comment is made for grain/seed production or animal products.

Should you have any questions on this submission please do not hesitate to contact me.

Regards

Gerard McMullen  
Consultant to Agrifutures Australia on behalf of the Australian Export Fodder Industry

To whom it may concern

I write in response to a request for comments on an application from Syngenta Australia Pty Ltd to register the product Victrato Tymirium technology Seed Treatment for use on wheat and barley. The product contains 200 g/L cyclobutrifluram as the only active constituent.

This submission is presented on behalf of the National Working Party on Grain Protection (NWPGP) and deals with wheat and barley commodities only.

1. The NWPGP:

- Is the industry body responsible for providing management and leadership to industry in the areas of post-harvest storage, chemical use, market requirements and chemical regulations.
- Is facilitated by Grain Trade Australia and the Chair is funded by Grains Australia.
- Has members across the entire grain supply chain.
- Hosts an annual conference providing participants with the latest research and developments, in the area of post-harvest storage and hygiene, chemical usage and outturn tolerances, international and domestic market requirements, and regulations.
- Co-ordinates and provides government with industry views on chemicals in use on grain and associated products.
- For further details, refer to <http://www.graintrade.org.au/nwpgp>

2. Industry Support for the Decision

Based on the information provided in the proposed decision notice, industry supports the proposed registration and MRLs for wheat and barley grain.

Should you have any questions on this submission please do not hesitate to contact me.
