Gazette

Agricultural and veterinary chemicals

No. APVMA 24, 25 November 2025

Published by the Australian Pesticides and Veterinary Medicines Authority

Australian Government
**Australian Pesticides and
Veterinary Medicines Authority**

The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

General information

The APVMA Gazette is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 8J(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

Distribution and subscription

The APVMA Gazette is published in electronic format only and is available from the [APVMA website](http://apvma.gov.au).

If you would like to subscribe to receive email notification when a new edition is published, please complete a [subscription form](#).

APVMA contacts

For enquiries regarding the publishing and distribution of the APVMA Gazette: Telephone: +61 2 6770 2300.

For enquiries on APVMA Gazette content, please refer to the individual APVMA contacts listed under each notice.

Agricultural chemical products and approved labels

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has registered or varied the relevant particulars or conditions of the registration in respect of the following products and has approved the label or varied the relevant particulars or conditions of the approval in respect of the containers for the chemical product, with effect from the dates shown.

Table 1: Agricultural products based on existing active constituents

Application no.	149061
Product name	Stop Mite Pro Insecticide and Miticide
Active constituent	18 g/L abamectin
Applicant name	Smart Garden Pty Ltd
Applicant ACN	095 280 149
Date of registration	3 November 2025
Product registration no.	96353
Label approval no.	96353/149061
Description of the application and its purpose, including the intended use of the chemical product	Registration of 18 g/L abamectin within an organic solvent, for the control of pest mites on pears, apples, tomatoes, citrus, hops, strawberries and ornamentals, and for the control of pest mites and native budworm on cotton

Application no.	146544
Product name	Brunnings Buffalo Lawn Feed 'n' Weed Lawn Weed Killer Hose On
Active constituents	6 g/L bromoxynil present as bromoxynil octanoate, 6 g/L MCPA present as the potassium salt
Applicant name	Brunnings Garden Products Pty Ltd
Applicant ACN	050 655 760
Date of registration	3 November 2025
Product registration no.	95626
Label approval no.	95626/146544
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 6 g/L bromoxynil present as the potassium salt and 6 g/L MCPA present as the potassium salt soluble concentrate (SC) formulation for the control of weeds in lawns including buffalo lawns

Application no.	149147
Product name	Richgro Fire Ant Killa Granules
Active constituent	0.25 g/kg fipronil
Applicant name	A Richards Pty Ltd
Applicant ACN	008 734 852
Date of registration	3 November 2025
Product registration no.	96382
Label approval no.	96382/149147
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 0.25 g/kg fipronil GR product for fast acting, non-repellent control of ants in turf, external surrounds of buildings and structures

Application no.	149220
Product name	SCA Furrow 500 Fungicide
Active constituent	500 g/L flutriafol
Applicant name	Specialised Chemicals (Aust) Pty Ltd
Applicant ACN	657 238 849
Date of registration	4 November 2025
Product registration no.	96409
Label approval no.	96409/149220
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 500 g/L flutriafol, suspension concentrate (SC) product for control of certain fungal diseases on wheat, barley and canola when mixed with fertiliser

Application no.	149109
Product name	Clothes Moth Pheromone Traps
Active constituents	0.2 g/kg koiginal I & koiginal II
Applicant name	STV International Ltd
Applicant ACN	N/A
Date of registration	5 November 2025
Product registration no.	96371
Label approval no.	96371/149109
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 0.2 g/kg koiginal I & koiginal II product, formulated as a ready-to-use bait (RB) for attracting and trapping clothing moths and carpet moths

Application no.	149143
Product name	Pynox Pyrethrum Metered Insecticide
Active constituents	42.3 g/kg piperonyl butoxide, 9 g/kg pyrethrins
Applicant name	Australian Agribusiness (Holdings) Pty Ltd
Applicant ACN	135 355 958
Date of registration	6 November 2025
Product registration no.	96379
Label approval no.	96379/149143
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 42.3 g/kg piperonyl butoxide, 8 g/kg pyrethrum metered insecticide aerosol can for the control of most flying insects by releasing a controlled amount of natural pyrethrins at regular programmed intervals

Application no.	145657
Product name	Albaugh Portento 200 SC Insecticide
Active constituent	200 g/L chlorantraniliprole
Applicant name	Albaugh Australia Pty Ltd
Applicant ACN	676 890 994
Date of registration	6 November 2025
Product registration no.	95431
Label approval no.	95431/145657
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 200 g/L chlorantraniliprole in a suspension concentrate (SC) formulation for the control of african black beetle, argentine stem weevil, argentinian scarab, billbugs and other insect pests in turf

Application no.	149713
Product name	ACP Propaquiz 100 Herbicide
Active constituent	100 g/L propaquizafop
Applicant name	Australis Crop Protection Pty Ltd
Applicant ACN	150 711 185
Date of registration	10 November 2025
Product registration no.	96535
Label approval no.	96535/149713
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 100 g/L propaquizafop, emulsifiable concentrate product for post-emergence selective weed control of annual grasses in broadleaf crops and legume pastures

Application no.	143824
Product name	Argold Herbicide
Active constituent	750 g/L cinmethylin
Applicant name	BASF Australia Ltd
Applicant ACN	008 437 867
Date of registration	11 November 2025
Product registration no.	94842
Label approval no.	143824
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 750 g/L cinmethylin emulsifiable concentrate formulation for use in turf

Application no.	146981
Product name	F.S.A. Pyroxasulfone 850 WG Herbicide
Active constituent	850 g/kg pyroxasulfone
Applicant name	Four Seasons Agribusiness Pty Ltd
Applicant ACN	115 133 189
Date of registration	12 November 2025
Product registration no.	95708
Label approval no.	95708/146981
Description of the application and its purpose, including the intended use of the chemical product	Registration of an 850 g/kg pyroxasulfone product, water dispersible granule (WG) for the control of annual ryegrass (<i>lolium rigidum</i>) and other grass and broadleaf weeds in barley, chickpeas, faba beans, field peas, lentils, lupins, potatoes and wheat

Table 2: Listed registrations – agricultural chemical products

Application no.	149253
Product name	SensaPool Granular Pool Chlorine
Active constituent	700 g/kg available chlorine (Cl) present as calcium hypochlorite
Applicant name	Spa-Craft Pty Ltd
Applicant ACN	600 353 713
Date of registration	6 November 2025
Product registration no.	96424
Label approval no.	96424/149253
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 700 g/kg chlorine (Cl), present as calcium hypochlorite, granular product for the control of bacteria and algae in swimming pools

Application no.	149256
Product name	SensaPool Stabilised Chlorine Tablets
Active constituent	900 g/kg available chlorine (Cl) present as trichloroisocyanuric acid
Applicant name	Spa-Craft Pty Ltd
Applicant ACN	600 353 713
Date of registration	6 November 2025
Product registration no.	96426
Label approval no.	96426/149256
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 900 g/kg trichloroisocyanuric acid tablet (TA) product for control of bacteria and algae in swimming pools and spas

Table 3: Variations of registration – agricultural chemical products

Application no.	150657
Product name	Cutlass 700 WG Herbicide
Active constituent	700 g/kg dicamba present as the sodium salt
Applicant name	ADAMA Australia Pty Limited
Applicant ACN	050 328 973
Date of variation	23 October 2025
Product registration no.	88101
Label approval no.	88101/150657
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to change the distinguishing product name and the name that appears on the label from 'Eureka! Dicamba 700 WG Herbicide' to 'Cutlass 700 WG Herbicide'. To update storage and disposal instructions and First aid and Safety Directions in line with FAISD

Application no.	150732
Product name	Lo-Chlor Spa Sanitiser
Active constituent	504 g/kg available chlorine present as sodium dichloroisocyanurate
Applicant name	M I International Pty Ltd
Applicant ACN	002 869 089
Date of variation	30 October 2025
Product registration no.	85547
Label approval no.	85547/150732
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to change the name that appears on the label from 'Iluka Spa Purifier' to 'Iluka Purify for Spas'

Application no.	149153
Product name	ACTA 1080 Concentrate
Active constituent	30 g/L sodium fluoroacetate
Applicant name	Animal Control Technologies (Australia) Pty Ltd
Applicant ACN	137 868 449
Date of variation	3 November 2025
Product registration no.	57956
Label approval no.	57956/149153
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of product registration and label approval to add a new territory for use

Application no.	149188
Product name	Seclira WSG Insecticide
Active constituent	400 g/kg dinotefuran
Applicant name	BASF Australia Ltd
Applicant ACN	008 437 867
Date of variation	5 November 2025
Product registration no.	83011
Label approval no.	83011/149188
Description of the application and its purpose, including the intended use of the chemical product	Variation to particulars of label approval to replace the archived and phased out products with the currently registered products for use in combination with proposed product

Application no.	148253
Product name	Surefire Antstar Granular Insecticide
Active constituent	2 g/kg bifenthrin
Applicant name	PCT Holdings Pty Ltd
Applicant ACN	099 023 962
Date of variation	6 November 2025
Product registration no.	67014
Label approval no.	67014/148253
Description of the application and its purpose, including the intended use of the chemical product	Variation of product registration and label approval to extend the range of treated ant species to include red imported fire ants

Application no.	148528
Product name	VICTRATO TYMIRIUM technology Seed Treatment
Active constituent	200 g/L cyclobutrifluram
Applicant name	Syngenta Australia Pty Ltd
Applicant ACN	002 933 717
Date of variation	6 November 2025
Product registration no.	91436
Label approval no.	91436/148528
Description of the application and its purpose, including the intended use of the chemical product	Variation of registration and label particulars to add a claim to suppress root lesion nematodes

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Infinity Ultra Herbicide
Active constituents	250 g/L pyrasulfotole, 125 g/L diflufenican
Applicant name	Bayer Cropscience Pty Ltd
Applicant ACN	000 226 022
Date of variation	6 November 2025
Product registration no.	91984
Label approval no.	91984/140770
Description of the application and its purpose, including the intended use of the chemical product	Variation of registration and label particulars to amend restraint statements

Application no.	148882
Product name	Titan S-metolachlor+ Prosulfocarb Herbicide
Active constituents	800 g/L prosulfocarb, 120 g/L S-metolachlor
Applicant name	Titan Ag Pty Ltd
Applicant ACN	122 081 574
Date of variation	7 November 2025
Product registration no.	84433
Label approval no.	84433/148882
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of product registration and label approval to add post emergent uses on annual ryegrass

Application no.	N/A – variation under s29A
Product name	Halley Dimethoate 400 Systemic Insecticide
Active constituent/s	400 g/L dimethoate
Applicant name	Halley International Enterprise (Australia) Pty Ltd
Applicant ACN	092 385 736
Date of variation	17 November 2025
Product registration no.	57860
Label approval no.	57860/RV2025
Description of the application and its purpose, including the intended use of the chemical product	Amendment of instructions to increase withholding periods after use of product from 1 to 14 days for blueberries and 7 to 14 days for blackberries and raspberries.

Application no.	N/A – variation under s29A
Product name	Cropro Stalk Insecticide
Active constituent/s	400 g/L dimethoate
Applicant name	PCT Holdings Pty Ltd
Applicant ACN	099 023 962
Date of variation	17 November 2025
Product registration no.	58374
Label approval no.	58374/RV2025
Description of the application and its purpose, including the intended use of the chemical product	Amendment of instructions to increase withholding periods after use of product from 1 to 14 days for blueberries and 7 to 14 days for blackberries and raspberries.

Application no.	N/A – variation under s29A
Product name	ROVER Systemic Insecticide
Active constituent/s	400 g/L dimethoate
Applicant name	Sipcam Pacific Australia Pty Ltd
Applicant ACN	073 176 888
Date of variation	17 November 2025
Product registration no.	65259
Label approval no.	65259/RV2025
Description of the application and its purpose, including the intended use of the chemical product	Amendment of instructions to increase withholding periods after use of product from 1 to 14 days for blueberries and 7 to 14 days for blackberries and raspberries.

Application no.	N/A – variation under s29A
Product name	TITAN DIMETHOATE 400 SYSTEMIC INSECTICIDE
Active constituent/s	400 g/L dimethoate
Applicant name	TITAN AG PTY LTD
Applicant ACN	122 081 574
Date of variation	17 November 2025
Product registration no.	62511
Label approval no.	62511/RV2025
Description of the application and its purpose, including the intended use of the chemical product	Amendment of instructions to increase withholding periods after use of product from 1 to 14 days for blueberries and 7 to 14 days for blackberries and raspberries.

Application no.	N/A – variation under s29A
Product name	APPARENT DECIMATOR 400 INSECTICIDE
Active constituent/s	400 g/L dimethoate
Applicant name	TITAN AG PTY LTD
Applicant ACN	122 081 574
Date of variation	17 November 2025
Product registration no.	70165
Label approval no.	70165/RV2025
Description of the application and its purpose, including the intended use of the chemical product	Amendment of instructions to increase withholding periods after use of product from 1 to 14 days for blueberries and 7 to 14 days for blackberries and raspberries.

Table 4: Label approval – agricultural chemical products

Application no.	149852
Product name	Farmalinx Ego Plant Growth Regulator
Active constituent	270 g/L maleic hydrazide present as potassium salt
Applicant name	Farmalinx Pty Ltd
Applicant ACN	134 353 245
Date of registration	6 November 2025
Product registration no.	92873
Label approval no.	92873/149852
Description of the application and its purpose, including the intended use of the chemical product	Registration of a new label for the existing product 'Farmalinx Ego Plant Growth Regulator' with the label name 'ProForce Padre 270 Plant Growth Regulator'

Veterinary chemical products and approved labels

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has registered or varied the relevant particulars or conditions of the registration in respect of the following products and has approved the label or varied the relevant particulars or conditions of the approval in respect of the containers for the chemical product, with effect from the dates shown.

Table 5: Veterinary products based on existing active constituents

Application no.	141180
Product name	Boss Triple Combination Mineralised Drench for Sheep
Active constituents	33.9 g/L levamisole (as hydrochloride) 22.7 g/L oxfendazole 1.0 g/L abamectin 2.2 g/L cobalt (as disodium cobalt EDTA) 0.5 g/L selenium (as sodium selenate)
Applicant name	Alleva Animal Health Ltd
Applicant ACN	N/A
Date of registration	7 November 2025
Product registration no.	93997
Label approval no.	93997/141180
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 33.9 g/L levamisole (as hydrochloride), 22.7 g/L oxfendazole, 2.2 g/L cobalt (as disodium cobalt EDTA), 1.0 g/L abamectin, 0.5 g/L selenium (as sodium selenate), oral solution product and label approval for the control and treatment of internal parasites of sheep and as a selenium and cobalt supplement for sheep raised in selenium and/or cobalt deficient areas

Application no.	141184
Product name	Boss Triple Minidose Mineralised Drench for Sheep
Active constituents	67.8 g/L levamisole (as hydrochloride) 45.4 g/L oxfendazole 2 g/L abamectin 4.4 g/L cobalt (as disodium cobalt EDTA) 1 g/L selenium (as sodium selenate)
Applicant name	Alleva Animal Health Ltd
Applicant ACN	N/A
Date of registration	7 November 2025
Product registration no.	93998
Label approval no.	93998/141184
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 67.8 g/L levamisole (as hydrochloride), 45.4 g/L oxfendazole, 4.4 g/L cobalt (as disodium cobalt EDTA), 2.0 g/L abamectin, 1.0 g/L selenium (as sodium selenate), oral solution product and label approval for the control and treatment of internal parasites of sheep and as a selenium and cobalt supplement for sheep raised in selenium and/or cobalt deficient areas

Application no.	147368
Product name	Maropitant 10 mg/mL Injection for Dogs and Cats
Active constituent	10 mg/mL maropitant citrate
Applicant name	Ashish Life Science Pvt Ltd
Applicant ACN	N/A
Date of registration	7 November 2025
Product registration no.	95854
Label approval no.	95854/147368
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 10 mg/mL maropitant injectable product for the prevention of vomiting in dogs and cats, for the treatment of acute vomiting in cats and dogs, for assisting in the prevention and treatment of nausea, and for the prevention of preoperative nausea and vomiting and improvement in recovery from general anaesthesia after use of the u-opiate receptor agonist morphine in dogs and cats

Application no.	146423
Product name	Vetsense Eprinomect Pour-on for Beef and Dairy Cattle
Active constituent	5 mg/mL eprinomectin
Applicant name	Vetsense Pty Ltd
Applicant ACN	150 968 871
Date of registration	7 November 2025
Product registration no.	95579
Label approval no.	95579/146423
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 5 mg/mL eprinomectin topical solution product for the treatment and control of internal and external parasites of beef and dairy cattle, and internal parasites of deer

Application no.	147019
Product name	Moxispor For Cats Over 4 kg
Active constituents	10 g/L moxidectin, 100 g/L imidacloprid
Applicant name	Jiyu Biopharm Co., Ltd.
Applicant ACN	N/A
Date of registration	14 November 2025
Product registration no.	95729
Label approval no.	95729/147019
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 10 g/L moxidectin and 100 g/L imidacloprid spot-on product for the treatment and control of flea and worm, and the prevention of heartworm in cats over 4 kg

Table 6: Variations of registration – veterinary chemical products

Application no.	149200
Product name	Osumia Ear Gel for Dogs
Active constituents	Each tube (1.2 g) contains: 10 mg terbinafine, 10 mg florfenicol, 1 mg betamethasone acetate
Applicant name	Dechra Ltd
Applicant ACN	N/A
Date of variation	3 November 2025
Product registration no.	69931
Label approval no.	69931/149200
Description of the application and its purpose, including the intended use of the chemical product	Variation to the relevant particulars of the product and label by updating the precautions, adding side effects statements to reflect current pharmacovigilance data and align the label with the current VLC

Application no.	147342
Product name	Vanquish Long Wool Spray-On Lice Treatment and Blowfly Strike Preventive for Long Woolled Sheep and Unshorn Lambs
Active constituent	50 g/L alpha-cypermethrin
Applicant name	Intervet Australia Pty Limited
Applicant ACN	008 467 034
Date of variation	10 November 2025
Product registration no.	38354
Label approval no.	38354/147342
Description of the application and its purpose, including the intended use of the chemical product	Variation to the product and labelling relevant particulars to include protection against breech strike (<i>Lucilia cuprina</i>), when the product is applied to the breech area of the sheep

Application no.	146939
Product name	Sodide Injection for Cattle & Horses
Active constituent	500 mg/mL sodium iodide
Applicant name	International Animal Health Products Pty Ltd
Applicant ACN	003 185 699
Date of variation	13 November 2025
Product registration no.	46411
Label approval no.	46411/146939
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of product and label approval by extension of use to include new conditions in horses

Application no.	147441
Product name	Convenia
Active constituent	80 mg/mL cefovecin
Applicant name	Zoetis Australia Pty Ltd
Applicant ACN	156 476 425
Date of variation	14 November 2025
Product registration no.	60461
Label approval no.	60461/147441
Description of the application and its purpose, including the intended use of the chemical product	Variation of the relevant particulars of product registration and label approval to add a new pack size and align the label statements with the current Veterinary Labelling Code

Approved active constituents

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has approved or varied the relevant particulars or conditions of the approval of the following active constituents, with effect from the dates shown.

Table 7: Approved active constituents

Application no.	145802
Active constituent	Doramectin
Applicant name	Abbey Laboratories Pty Ltd
Applicant ACN	156 000 430
Date of approval	3 November 2025
Approval no.	95484
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent doramectin for use in veterinary chemical products

Application no.	147969
Active constituent	Imazapic
Applicant name	Kingtai Chemicals Co., Limited
Applicant ACN	N/A
Date of approval	3 November 2025
Approval no.	96027
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent imazapic for use in agricultural chemical products

Application no.	148003
Active constituent	Fipronil
Applicant name	Ensysyex Australasia Pty Ltd
Applicant ACN	102 221 965
Date of approval	04 November 2025
Approval no.	96038
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent fipronil for use in agricultural chemical products

Application no.	146735
Active constituent	Dicyclanil
Applicant name	Jiangsu Quality Horizons Pharmtech Co Ltd
Applicant ACN	N/A
Date of approval	5 November 2025
Approval no.	95655
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent dicyclanil for use in veterinary chemical products

Application no.	147910
Active constituent	Bixafen
Applicant name	Kingtai Chemicals Co., Limited
Applicant ACN	N/A
Date of approval	6 November 2025
Approval no.	96014
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent bixafen for use in agricultural chemical products

Application no.	149443
Active constituent	Ketoprofen
Applicant name	Bimeda (Australia) Pty. Limited
Applicant ACN	058 196 508
Date of approval	11 November 2025
Approval no.	96471
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent ketoprofen for use in veterinary chemical products

Application no.	147912
Active constituent	Imazethapyr
Applicant name	Greenchem HK Ltd
Applicant ACN	N/A
Date of approval	12 November 2025
Approval no.	96016
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent imazethapyr for use in agricultural chemical products

Application no.	148493
Active constituent	Calcium chloride dihydrate
Applicant name	Zebravet Australia Pty Limited
Applicant ACN	158 809 735
Date of approval	14 November 2025
Approval no.	96196
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent calcium chloride dihydrate for use in veterinary chemical products

Revocation of Suspension of Registration

Pursuant to section 46(2)(b) of the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has revoked the suspensions of the registrations listed below with effect from the dates shown.

Table 9. Product registrations that are no longer suspended

Product name	ROVER Systemic Insecticide
Active constituent/s	400 g/L dimethoate
Holder name	Sipcam Pacific Australia Pty Ltd
Holder ACN	073 176 888
Date suspension revoked	17 November 2025
Product registration no.	65259
Label approval no.	65259/RV2025
Brief reasons	<p>The APVMA suspended the registration of ROVER Systemic Insecticide on 11 November 2025 on the basis that it appeared to the APVMA that the product may not meet the safety criteria when used on blueberries, blackberries and raspberries, according to the instructions for use on the approved label.</p> <p>On 17 November 2025, the APVMA varied the product registration and label approval to increase withholding periods after use of the product from 1 to 14 days for blueberries and 7 to 14 days for blackberries and raspberries, with the holder's consent under section 29A of the Agvet Code. Therefore, the reason for the APVMA's decision to suspend the product registration has been removed.</p>

Product name	Halley Dimethoate 400 Systemic Insecticide
Active constituent/s	400 g/L dimethoate
Holder name	Halley International Enterprise (Australia) Pty Ltd
Holder ACN	092 385 736
Date suspension revoked	17 November 2025
Product registration no.	57860
Label approval no.	57860/RV2025
Brief reasons	<p>The APVMA suspended the registration of Halley Dimethoate 400 Systemic Insecticide on 11 November 2025 on the basis that it appeared to the APVMA that the product may not meet the safety criteria when used on blueberries, blackberries and raspberries, according to the instructions for use on the approved label.</p> <p>On 17 November 2025, the APVMA varied the product registration and label approval to increase withholding periods after use of the product from 1 to 14 days for blueberries and 7 to 14 days for blackberries and raspberries, with the holder's consent under section 29A of the Agvet Code. Therefore, the reason for the APVMA's decision to suspend the product registration has been removed.</p>

Product name	Cropro Stalk Insecticide
Active constituent/s	400 g/L dimethoate
Holder name	PCT Holdings Pty Ltd
Holder ACN	099 023 962
Date suspension revoked	17 November 2025
Product registration no.	58374
Label approval no.	58374/RV2025
Brief reasons	<p>The APVMA suspended the registration of Cropro Stalk Insecticide on 11 November 2025 on the basis that it appeared to the APVMA that the product may not meet the safety criteria when used on blueberries, blackberries and raspberries, according to the instructions for use on the approved label.</p> <p>On 17 November 2025, the APVMA varied the product registration and label approval to increase withholding periods after use of the product from 1 to 14 days for blueberries and 7 to 14 days for blackberries and raspberries, with the holder's consent under section 29A of the Agvet Code. Therefore, the reason for the APVMA's decision to suspend the product registration has been removed.</p>

Product name	TITAN DIMETHOATE 400 SYSTEMIC INSECTICIDE
Active constituent/s	400 g/L dimethoate
Holder name	TITAN AG PTY LTD
Holder ACN	122 081 574
Date suspension revoked	17 November 2025
Product registration no.	62511
Label approval no.	62511/RV2025
Brief reasons	<p>The APVMA suspended the registration of TITAN DIMETHOATE 400 SYSTEMIC INSECTICIDE on 11 November 2025 on the basis that it appeared to the APVMA that the product may not meet the safety criteria when used on blueberries, blackberries and raspberries, according to the instructions for use on the approved label.</p> <p>On 17 November 2025, the APVMA varied the product registration and label approval to increase withholding periods after use of the product from 1 to 14 days for blueberries and 7 to 14 days for blackberries and raspberries, with the holder's consent under section 29A of the Agvet Code. Therefore, the reason for the APVMA's decision to suspend the product registration has been removed.</p>

Product name	APPARENT DECIMATOR 400 INSECTICIDE
Active constituent/s	400 g/L dimethoate
Holder name	TITAN AG PTY LTD
Holder ACN	122 081 574
Date suspension revoked	17 November 2025
Product registration no.	70165
Label approval no.	70165/RV2025
Brief reasons	<p>The APVMA suspended the registration of APPARENT DECIMATOR 400 INSECTICIDE on 11 November 2025 on the basis that it appeared to the APVMA that the product may not meet the safety criteria when used on blueberries, blackberries and raspberries, according to the instructions for use on the approved label.</p> <p>On 17 November 2025, the APVMA varied the product registration and label approval to increase withholding periods after use of the product from 1 to 14 days for blueberries and 7 to 14 days for blackberries and raspberries, with the holder's consent under section 29A of the Agvet Code. Therefore, the reason for the APVMA's decision to suspend the product registration has been removed.</p>

Licensing of veterinary chemical manufacturers

Pursuant to Part 8 of the Agricultural and Veterinary Chemicals Code (Agvet Code), scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has taken action with respect to the licensing of the following veterinary chemical manufacturers with effect from the dates shown.

For a comprehensive listing of all licensed manufacturers please see the [APVMA website](#).

Licence cancellations

The APVMA has cancelled the following licenses under subsection 127(1) of the Agvet Code:

Table 10: Licenses cancelled by the APVMA under subsection 127(1) of the Agvet Code

Company name	Licence number	Company ACN	Address	Date cancelled
Jalco Cosmetics Pty Ltd	2262	084 809 450	45 King Road Hornsby NSW 2077	30 October 2025

Amendments to the APVMA MRL Standard

The Australian Pesticides and Veterinary Medicines Authority (APVMA) approves maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. The MRLs approved by the APVMA are associated with a regulatory decision to register a product, grant a permit approval, or as an outcome from a review decision and are set out in the *Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Instrument 2023*. The *MRL Standard* lists MRLs of substances that may arise from the approved use of agricultural and veterinary chemical products containing those substances on commodities used for human consumption as well as livestock feeds. The *MRL Standard* also provides the relevant residue definitions to which these MRLs apply. There may be situations where the residue definition for monitoring and enforcement is different to the definition used for dietary risk assessment purposes.

MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. In considering MRLs and variation to MRLs, the APVMA takes into account studies on chemistry, metabolism, analytical methodology, residues, toxicology, good agricultural practice and dietary exposure. In approving MRLs, the APVMA is satisfied, from dietary exposure assessment, that the levels set are not an undue hazard to human health.

The APVMA has amended the *MRL Standard* and the changes will have affect the day after the instrument is registered.

Details of the amendment can be found in the *Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Amendment Instrument (No. 5) 2025*.

The amendments will be incorporated into the compilation of the *Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Instrument 2023*.

The MRL Standard is accessible via the [Federal Register of Legislation website](#).

Proposal to amend the Maximum Residue Limits Standard under the Australian New Zealand Food Standards Code

The APVMA is proposing to vary the Australian New Zealand Food Standards Code – Schedule 20 – Maximum residue limits (Maximum Residue Limits Standard) under section 82 of the *Food Standards Australia New Zealand Act 1991* (FSANZ Act). The variation, made through the Australia New Zealand Food Standards Code – Schedule 20 – Maximum residue limits Variation Instrument No. APVMA 5 2025 (Amendment Instrument), prescribes a maximum residue limit (MRL) for florfenicol use in Atlantic Salmon. Based on dietary exposure assessments and current health standards, the APVMA and Food Standards Australia New Zealand (FSANZ) are satisfied that the MRL will not be harmful to human health or raise safety concerns.

The Maximum Residue Limits Standard prescribes MRLs for agricultural and veterinary chemicals that may legitimately occur in foods. By this means, the Maximum Residue Limits Standard permits the sale of treated foods and protects public health by minimising residues in foods consistent with the effective control of pests and diseases.

The agreement between the Australian Government and the New Zealand Government concerning a Joint Food Standards System excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

The APVMA ran a public consultation through a Trade Advice Notice on florfenicol for emergency use on Atlantic salmon between 8 October and 22 October 2025. Four submissions were received and considered in making the amendments to the MRL. Further information on this consultation is provided on the APVMA's website: apvma.gov.au.

The APVMA also made a Sanitary and Phytosanitary notification to the World Trade Organization (WTO) in relation to the variation to the MRL for florfenicol to include Atlantic Salmon in the Maximum Residue Limits Standard. No consultation period was considered necessary through the WTO noting the variation was trade facilitative.

The APVMA considers the public consultation undertaken in October and consultation through the WTO as sufficient to support the making of the Amendment Instrument and, noting the urgent and minor nature of the variation, is not proposing to undertake public consultation on the proposed variation instrument.

The proposed variation is provided for information below.

Proposed variation to Schedule 20 in the Australia New Zealand Food Standards Code

25 November 2025

Note: Subsection 82(2) of the *Food Standards Australia New Zealand Act 1991* provides that variations to standards are legislative instruments, but are not subject to disallowance or sunseting.

To commence: on gazettal of variation

Schedule 20 Maximum Residue Limits

Insert:

Salmon, Atlantic

T1

Variations to the Maximum Residue Limits Standard under the Australian New Zealand Food Standards Code

In accordance with subsection 82(7) of the *Food Standards Australia New Zealand Act 1991* (FSANZ Act) the APVMA is publishing a copy of the Australia New Zealand Food Standards Code – Schedule 20 – Maximum residue limits Variation Instrument No. APVMA 5, 2025 (Amendment Instrument).

The APVMA may make variations to maximum residue limits (MRLs) prescribed in the Australia New Zealand Food Standards Code – Schedule 20 – Maximum residue limits (Maximum Residue Limits Standard) under subsection 82(1) of the FSANZ Act.

The Maximum Residue Limits Standard prescribes MRLs for agricultural and veterinary chemicals that may legitimately occur in foods. By this means, the Maximum Residue Limits Standard permits the sale of treated foods and protects public health by minimising residues in foods consistent with the effective control of pests and diseases.

The Amendment Instrument prescribes a MRL for florfenicol in Atlantic Salmon. Based on dietary exposure assessments and current health standards, the APVMA and Food Standards Australia New Zealand (FSANZ) are satisfied that the MRL will not be harmful to human health or raise safety concerns.

The APVMA ran a public consultation through a Trade Advice Notice on florfenicol for emergency use on Atlantic salmon between 8 October and 22 October 2025. The APVMA received 4 submissions, all of which were considered and resolved before making the Amendment Instrument. Further information on this consultation is provided on the APVMA's website: apvma.gov.au.

The APVMA also made a Sanitary and Phytosanitary notification to the World Trade Organization (WTO) in relation to the variation to the MRL for florfenicol to include Atlantic Salmon in the Maximum Residue Limits Standard. No consultation period was considered necessary through the WTO noting the variation was trade facilitative.

The APVMA considers the public consultation undertaken in October and consultation through the WTO as sufficient to support the making of the Amendment Instrument and, noting the urgent and minor nature of the variation, is not proposing to undertake public consultation on the proposed variation instrument.

The agreement between the Australian Government and the New Zealand Government concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

A copy of the Amendment Instrument has been given to FSANZ, in accordance with subsection 82(6) of the FSANZ Act. The Amendment Instrument will also be registered on the Federal Register of Legislation, in accordance with subsection 82(7) of the FSANZ Act.

The Amendment Instrument commences on the date of gazettal, in accordance with subsection 82(8) of the FSANZ Act. For a complete copy of the Maximum Residue Limits Standard, please refer to the [Federal Register of Legislation](#).

Australian Government

**Australian Pesticides and
Veterinary Medicines Authority**

***Australia New Zealand
Food Standards Code —
Schedule 20 — Maximum residue limits Variation
Instrument No. APVMA 5, 2025***

I, Edward Cram, Executive Director, Australian Pesticides and Veterinary Medicines Authority, acting in accordance with my powers delegated to me under subsection 11(1) of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*, make this instrument for the purposes of subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*.

Edward Cram
Executive Director, Agricultural Chemicals, Australian Pesticides and Veterinary Medicines
Authority

Dated this twenty first day of November 2025

Part 1 Preliminary

1 Name of instrument

This instrument is the *Australia New Zealand Food Standards Code — Schedule 20 – Maximum residue limits Variation Instrument No. APVMA 5, 2025* (Amendment Instrument).

2 Commencement

In accordance with subsection 82(8) of the *Food Standards Australia New Zealand Act 1991*, this instrument commences on the day it is published in the *Gazette*.

Note: A copy of the variations made by the Variation Instrument was published in the Commonwealth of Australia Agricultural and Veterinary Chemicals Gazette.

3 Object

The object of this instrument is for the APVMA to make variations to Schedule 20 – Maximum residue limits in the *Australia New Zealand Food Standards Code* to include or change maximum residue limits pertaining to florfenicol.

4 Interpretation

In this instrument: —

APVMA means the Australian Pesticides and Veterinary Medicines Authority established by section 6 of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*; and

Principal Instrument means Schedule 20 – Maximum residue limits in the *Australia New Zealand Food Standard Code* as defined in Section 4 of the *Food Standards Australia New Zealand Act 1991* being the Code published in *Gazette* No. P 27 on 27 August 1987 together with any amendments of the standards in that Code. Schedule 20 was published in the *Food Standards Gazette* FSC 96 on Thursday 10 April 2015 and was registered as a legislative instrument on 1 April 2015 (F2015L00468).

Part 2 Variations to Schedule 20— Maximum Residue Limits

5 Variations to Schedule 20

The Schedule to this instrument sets out the variations made to the Principal Instrument by this instrument.

Schedule

Variations to Schedule 20 – Maximum residue limits

Schedule 20 Maximum Residue Limits

Agvet chemical voluntary recall: THIMET 200G SYSTEMIC GRANULAR INSECTICIDE

Product name: THIMET 200G SYSTEMIC GRANULAR INSECTICIDE

APVMA registration number: 41439

APVMA approved label number: 115427

Batch numbers: AAC2I42043, AAC1I40157, AAC3D43038, AAC3G43284, AAC1G39926, AAC3I43500, AAC2E41296, AAC2I42066, AAC4G44299, AAC2E41295, AAC3H43400, AFTLL2602251, AFTLL2602252, AFTLL2702253, AMTLL2103251, AMTLL2503252, AMTLL2503253, AMTLL2503254, AATLL1504251, AMTLL1905251, AMTLL2005252, AJLTLL2107251, AJLTLL2207252, 304920AX0286, AUGSBX140825, SEPTLNL0909253, SEPTLNL2409255, AMTLL2703255, AATSBX2404251, AATSBX1604251, AUGTSBX080825, AUGTSBX140825, SEPTSBX0209251, SEPTSBX0509252, SEPTSBX1509254, SEPTSBX1709254

Sold by: AgNova Technologies Pty Ltd in New South Wales and Queensland between 18 October 2025 to 14 November 2025.

On 14 November 2025, AgNova Technologies Pty Ltd (ACN 097 705 158) initiated a voluntary recall under section 106 of the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994* (Cth) in relation to the chemical product described above.

Reason for voluntary recall

Some containers (both Lock'N Load 20 kg and SmartBox 22 kg) have been found to contain less than the specified weight of product.

Hazard

Due to less than the specified weight of product, there is possibility that the product may be used at a lower than the label rate. This may affect the product efficacy. There is no other hazard associated with containers being underweight.

What to do if in possession of this chemical product

Wearing PPE, as stated on the label, quarantine any containers in a locked pesticide storage area and contact AgNova Technologies for instructions for collection and refund or replacement of product.

More information

Visit the APVMA website to [view the notice](#) of voluntary recall for the chemical product described above.

The APVMA publishes a list of [agvet chemical recall notices](#) on its website and provides a [subscription option](#) to be notified by email when a new recall notice is published.

Agvet chemical voluntary recall: Bloat-Drench Oral Bloat Control

Product name: Bloat-Drench Oral Bloat Control

APVMA registration number: 38823

APVMA approved label number: 60429

Batch number: N2509036

Sold by: Victorian Chemical Company Pty Ltd in VIC, NSW and SA between 16 September 2025 to 21 November 2025

On 21 November 2025, Victorian Chemical Company Pty Ltd (ACN 004 188 863) initiated a voluntary recall under section 106 of the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994* (Cth) in relation to the chemical product described above.

Reason for voluntary recall

Due to reports of bulging packaging observed in certain units.

Hazard

Bulging packaging may indicate microbial contamination or fermentation within the container, which can compromise the potency and safety of the product. Using a product with compromised integrity may result in:

- Reduced effectiveness of the treatment
- Pose a safety hazard to handlers and to the animals

What to do if in possession of this chemical product

- DO NOT use any containers of the above-mentioned batch
- Please return the product to the place of purchase for a full refund

More information

Visit the APVMA website to [view the notice](#) of voluntary recall for the chemical product described above.

Notice of cancellation at the request of the holder

At the request of the holder, in accordance with section 42(1) of the *Agricultural and Veterinary Chemicals Code Act 1994* (Agvet Code), the APVMA has cancelled the approvals and/or registrations set out in Table 11:

Table 11: Active constituent approval/product registration/label approval cancelled at the request of the holder

Approval or registration number	Name	Type of approval or registration	Holder	Reason for cancellation (if relevant pursuant to s45A(3))	Date of cancellation
62541/1207 62541/142339	Wetter 1000 Surfactant	Label	Alphakem Global Pty Ltd	May not meet labelling criteria	21 November 2025

In accordance with section 45A(1)(b) of the Agvet Code, the APVMA publishes this notice of the cancellation, including the following instructions which set out how a person can deal with the cancelled active constituent, cancelled product or product bearing a cancelled label referred to in Table 11.

Instructions

Instructions for persons who possess, have custody of or use the cancelled active constituent, cancelled product, or the product bearing a cancelled label under section 45B(3) of the Agvet Code.

A person who possesses, has custody of or uses the cancelled active constituent, cancelled product or product bearing a cancelled label referred to in Table 11 in accordance with the instructions contained in this notice, is taken to have been issued with a permit under section 45B(3) of the Agvet Code to possess, have custody of or use the cancelled active constituent, cancelled product or product bearing a cancelled label, in accordance with those instructions.

Possession or custody

A person may possess the cancelled active constituent, cancelled product or product bearing a cancelled label referred to in Table 11 in accordance with its label instructions for one year from the date of cancellation.

Use, supply or otherwise deal with

A person may use the cancelled active constituent, cancelled product or products bearing a cancelled label referred to in Table 11 according to its label instructions, including any conditions relating to shelf life or expiry date, for one year after the date of cancellation.

A person may supply or cause to be supplied at wholesale or retail level the cancelled active constituent, cancelled product, or product bearing a cancelled label referred to in Table 11, for one year after the date of cancellation.

Contraventions

After the day that is one year from the date of cancellation it will be an offence against the Agvet Code to have possession or custody of the cancelled active constituents, cancelled products or products bearing a cancelled label with the intention to supply, or to supply the cancelled active constituent, cancelled product, or product bearing a cancelled label.

It is an offence to possess, have custody of, use, or otherwise deal with the cancelled active constituents, cancelled products or products bearing the cancelled label listed in Table 11 in a manner that contravenes the above instructions.
