Agricultural and veterinary chemicals

No. APVMA 14, Tuesday 14 July 2026

Published by the Australian Pesticides and Veterinary Medicines Authority

Australian Government
**Australian Pesticides and
Veterinary Medicines Authority**

The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

Website: apvma.gov.au

General information

The APVMA Gazette is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 8J(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

Distribution and subscription

The APVMA Gazette is published in electronic format only and is available from the [APVMA website](http://apvma.gov.au).

If you would like to subscribe to receive email notification when a new edition is published, please complete a [subscription form](#).

APVMA contacts

For enquiries regarding the publishing and distribution of the APVMA Gazette: Telephone: +61 2 6770 2300.

For enquiries on APVMA Gazette content, please refer to the individual APVMA contacts listed under each notice.

Agricultural chemical products and approved labels

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has registered or varied the relevant particulars or conditions of the registration in respect of the following products and has approved the label or varied the relevant particulars or conditions of the approval in respect of the containers for the chemical product, with effect from the dates shown.

Table 1: Variations of registration – agricultural chemical products

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Admiral Insect Growth Regulator
Active constituent	100 g/L pyriproxyfen
Applicant name	APVMA initiated variation
Date of variation	23 June 2026
Product registration no.	60997
Label approval no.	60997/50944V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of chemical product registration and label approval to update the constituent statement. The intended use of this product is for the control of silverleaf whitefly in cotton, rockmelon, and capsicum. For the control of silverleaf whitefly and greenhouse whitefly in tomatoes and the control of various scale in citrus, mangoes and olives

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Strike-Out 500 EC Insecticide
Active constituent	500 g/L chlorpyrifos (an anticholinesterase compound)
Applicant name	APVMA initiated variation
Date of variation	24 June 2026
Product registration no.	45486
Label approval no.	45486/RV24V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of chemical product registration and label approval to update the constituent statement. For the control of certain insect pests in various situations and for treatment of termite nests in wall cavities in accordance with AS3600.2 as per the directions for use table

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Apparent Bromoxynil 200 Herbicide
Active constituent	200 g/L bromoxynil present as the N-octanoyl ester
Applicant name	APVMA initiated variation
Date of variation	24 June 2024
Product registration no.	67042
Label approval no.	67042/RV2024V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of chemical product registration and label approval to update the constituent statements

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Fuhua Glyphosate 540 K Herbicide
Active constituent	540 g/L glyphosate present as the potassium salt
Applicant name	APVMA initiated variation
Date of variation	24 June 2024
Product registration no.	82938
Label approval no.	82938/141786V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of chemical product registration and label approval to update the constituent statement. A non-selective herbicide for the control of a range of annual and perennial weeds as indicated in the directions for use

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Roundup Herbicide
Active constituent	360 g/L glyphosate (present as the isopropylamine salt)
Applicant name	APVMA initiated variation
Date of variation	24 June 2026
Product registration no.	31393
Label approval no.	31393/145421V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of chemical product registration and label approval to update the label constituent statements and remove use in the home garden for this herbicide used for the non-selective control of many annual and perennial weeds

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Opal Propyzamide 500 SC Herbicide
Active constituent	500 g/L propyzamide
Applicant name	APVMA initiated variation
Date of variation	25 June 2026
Product registration no.	88113
Label approval no.	88113/140873V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of chemical product registration and label approval to update the statement of constituents and signal heading on the label Opal Propyzamide 500 SC Herbicide is for selective control of certain grasses and broadleaf weeds in lettuce, chicory, endive, radicchio, sports turf, home lawns and legume seed crops, pastures and pyrethrum crops, as per the direction for use

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Nufarm Weedmaster Argo Herbicide
Active constituents	540 g/L glyphosate present as the potassium and isopropylamine salts, 0.83 g/L polyethanoxo (15) tallow amine
Applicant name	APVMA initiated variation
Date of variation	26 June 2026
Product registration no.	68925
Label approval no.	68925/136258V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of registered chemical product and label approval to update the constituent statement for this non-selective herbicide for the control of many annual and perennial weeds

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Titan DFF 25 + MCPA 250 Selective Herbicide
Active constituents	250 g/L MCPA present as the ethyl hexyl ester, 25 g/L diflufenican
Applicant name	APVMA initiated variation
Date of variation	29 June 2026
Product registration no.	65650
Label approval no.	65650/150571V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of chemical product registration and label approval to update the constituent statements. For the control of certain broadleaf weeds in winter cereals and clover as specified in the directions for use table

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Apparent Panther Selective Herbicide
Active constituents	250 g/L MCPA present as the ethyl hexyl ester, 25 g/L diflufenican
Applicant name	APVMA initiated variation
Date of variation	29 June 2026
Product registration no.	66925
Label approval no.	66925/136193V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of chemical product registration and label approval to update the constituent statements. For the control of certain broadleaf weeds in winter cereals and clover as specified in the directions for use table

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Genfarm Diflu-MCPA Selective Herbicide
Active constituents	250 g/L MCPA present as the ethyl hexyl ester, 25 g/L diflufenican
Applicant name	APVMA initiated variation
Date of variation	29 June 2026
Product registration no.	64997
Label approval no.	64997/140732V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of chemical product registration and label approval to update the constituent statement. For the control of certain broadleaf weeds in winter cereals and clover as specified in the directions for use table

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Bentley Selective Herbicide
Active constituents	250 g/L bromoxynil as the octanoate ester, 25 g/L diflufenican
Applicant name	APVMA initiated variation
Date of variation	30 June 2026
Product registration no.	68142
Label approval no.	68142/RV2024V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of registered chemical product and label approval to update the constituent statement. For the control of certain broadleaf weeds in winter cereals and pastures as specified in the directions for use table

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Genfarm Propiconazole 250 EC Systemic Fungicide
Active constituent	250 g/L propiconazole
Applicant name	APVMA initiated variation
Date of variation	30 June 2026
Product registration no.	58806
Label approval no.	58806/118967V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of chemical product registration and label approval to update the constituent statement and first aid instructions on the label. Genfarm Propiconazole 250 EC Systemic Fungicide is for the control of certain fungal diseases of bananas, oats, peanuts, perennial ryegrass, pineapples, stone fruit, sugar cane, wheat and other crops in certain states as specified in the directions for use table

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Apparent Beamer Herbicide
Active constituents	250 g/L bromoxynil present as the octanoate ester, 25 g/L diflufenican
Applicant name	APVMA initiated variation
Date of variation	30 June 2026
Product registration no.	81467
Label approval no.	81467/RV2024V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of chemical product registration and label approval to update the constituent statements on the label. Apparent Beamer Herbicide is for control of certain broadleaf weeds in winter cereals and pasture as specified in the directions for use table

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Tilt 250 EC Systemic Fungicide
Active constituent	250 g/L propiconazole
Applicant name	APVMA initiated variation
Date of variation	1 July 2026
Product registration no.	30490
Label approval no.	30490/54129V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation to relevant particulars and label approval of the product that controls certain fungal diseases of bananas, oats, peanuts, perennial ryegrass, pineapples, stone fruit, sugarcane, wheat and other crops to vary the solvent statement on the label

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Gremlin Miticide and Insecticide
Active constituent	18 g/L abamectin
Applicant name	APVMA initiated variation
Date of variation	30 June 2026
Product registration no.	52713
Label approval no.	52713/0307V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of registered chemical product and label approval to update the constituent statement

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	eChem Trifluralin 480 Herbicide
Active constituent	480 g/L trifluralin
Applicant name	APVMA initiated variation
Date of variation	1 July 2026
Product registration no.	89469
Label approval no.	89469/126566V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of chemical product registration and label approval to alter the constituent statements on the label to list a single concentration for the excipient polyethanoxo tallow amine for this 480 g/L trifluralin product used as a pre-emergence herbicide for the control of annual grasses and certain broadleaf weeds in horticultural and agricultural crops

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Conquest Prestige 250 Fungicide
Active constituent	250 g/L propiconazole
Applicant name	APVMA initiated variation
Date of variation	1 July 2026
Product registration no.	57857
Label approval no.	57857/0604V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	For the control of certain fungal diseases of bananas, peanuts, pineapples, stone fruit, sugar cane, wheat and other crops in certain states as specified in the Directions for Use table. Variation of relevant particulars of chemical product registration and label approval to update the constituent statements, protection statements, safety directions, and first aid instructions

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Conquest Ruger Selective Herbicide
Active constituents	250 g/L bromoxynil present as the octanoate, 25 g/L diflufenican
Applicant name	APVMA initiated variation
Date of variation	1 July 2026
Product registration no.	64334
Label approval no.	64334/RV2024V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	For the control of certain broadleaf weeds in winter cereals and pasture as specified in the Directions for Use table. Variation of relevant particulars of chemical product registration and label approval to update the constituent statements, protection statements, safety directions, and first aid instructions

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Apparent Dingo 500 Insecticide
Active constituent	500 g/L chlorpyrifos (an anticholinesterase compound)
Applicant name	APVMA initiated variation
Date of variation	2 July 2026
Product registration no.	65160
Label approval no.	65160/RV2024V
Description of the application and its purpose, including the intended use of the chemical product and the nature of and reasons for the variation.	Variation of relevant particulars of registered chemical product and label approval to update the constituent statement. For the control of certain insect pests in various situation and for treatment of termite nests in wall cavities in accord with AS3600.2 as specified in the directions for use table

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Albaugh ALGEDI 200 SL Herbicide
Active constituent/s	200 g/L diquat present as diquat dibromide monohydrate
Applicant name	Albaugh Australia Pty Ltd
Applicant ACN	676 890 994
Date of variation	30 June 2026
Product registration no.	94649
Label approval no.	94649/RV2026
Description of the application and its purpose, including the intended use of the chemical product	Variation of registration and label approval to comply with the outcomes of the diquat reconsideration

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	AC Piston Plus 360 Herbicide
Active constituent/s	360 g/L paraquat present as paraquat dichloride
Applicant name	Axichem Pty Ltd
Applicant ACN	131 628 594
Date of variation	30 June 2026
Product registration no.	95064
Label approval no.	95064/RV2026
Description of the application and its purpose, including the intended use of the chemical product	Variation of registration and label approval to comply with the outcomes of the paraquat reconsideration

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Ezycrop Paraquat 360 Herbicide
Active constituent/s	360 g/L paraquat present as paraquat dichloride
Applicant name	Ezycrop Pty Ltd
Applicant ACN	156 476 827
Date of variation	30 June 2026
Product registration no.	95639
Label approval no.	95639/RV2026
Description of the application and its purpose, including the intended use of the chemical product	Variation of registration and label approval to comply with the outcomes of the paraquat reconsideration

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	FlexAg Paraquat 250 Herbicide
Active constituent/s	250 g/L paraquat present as paraquat dichloride
Applicant name	Flexag Pty Ltd
Applicant ACN	675 254 734
Date of variation	8 July 2026
Product registration no.	95316
Label approval no.	95316/RV2026
Description of the application and its purpose, including the intended use of the chemical product	Variation of registration and label approval to comply with the outcomes of the paraquat reconsideration

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	F.S.A. PARAQUAT + DIQUAT 250 HERBICIDE
Active constituent/s	135 g/L paraquat present as paraquat dichloride, 115 g/L diquat present as diquat dibromide monohydrate
Applicant name	Four Seasons Agribusiness Pty Ltd
Applicant ACN	115 133 189
Date of variation	30 June 2026
Product registration no.	95027
Label approval no.	95027/RV2026
Description of the application and its purpose, including the intended use of the chemical product	Variation of registration and label approval to comply with the outcomes of the paraquat and diquat reconsideration

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	NAADCO Paraquat 250 Herbicide
Active constituent/s	250 g/L paraquat present as paraquat dichloride
Applicant name	New Australia Agricultural Development Company Pty Ltd
Applicant ACN	138 055 553
Date of variation	30 June 2026
Product registration no.	94659
Label approval no.	94659/RV2026
Description of the application and its purpose, including the intended use of the chemical product	Variation of registration and label approval to comply with the outcomes of the paraquat reconsideration

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Quantum Paraquat 360 SL Herbicide
Active constituent/s	360 g/L paraquat present as paraquat dichloride
Applicant name	Quantum Agrosiences Holdings Pty Ltd
Applicant ACN	680 792 625
Date of variation	30 June 2026
Product registration no.	96624
Label approval no.	96624/RV2026
Description of the application and its purpose, including the intended use of the chemical product	Variation of registration and label approval to comply with the outcomes of the paraquat reconsideration

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Sabakem Paraquat Diquat 250
Active constituent/s	135 g/L paraquat present as paraquat dichloride, 115 g/L diquat present as diquat dibromide
Applicant name	Sabakem Pty Ltd
Applicant ACN	151 682 138
Date of variation	30 June 2026
Product registration no.	94419
Label approval no.	94419/RV2026
Description of the application and its purpose, including the intended use of the chemical product	Variation of registration and label approval to comply with the outcomes of the paraquat and diquat reconsideration

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Agro-Essence Paraquat 360 Herbicide
Active constituent/s	360 g/L paraquat present as paraquat dichloride
Applicant name	Theyes Management Pty Ltd
Applicant ACN	647 084 151
Date of variation	30 June 2026
Product registration no.	95277
Label approval no.	95277/RV2026
Description of the application and its purpose, including the intended use of the chemical product	Variation of registration and label approval to comply with the outcomes of the paraquat reconsideration

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Titan Diquat 200 Non-Residual Herbicide
Active constituent/s	200 g/L diquat
Applicant name	Titan Ag Pty Ltd
Applicant ACN	122 081 574
Date of variation	30 June 2026
Product registration no.	64177
Label approval no.	64177/RV2026
Description of the application and its purpose, including the intended use of the chemical product	Variation of registration and label approval to comply with the outcomes of the diquat reconsideration

Application no.	N/A – variation under section 29A of the Agvet Code
Product name	Apparent Diquat 200 Herbicide
Active constituent/s	200 g/L diquat
Applicant name	Titan Ag Pty Ltd
Applicant ACN	122 081 574
Date of variation	30 June 2026
Product registration no.	83557
Label approval no.	83557/RV2026
Description of the application and its purpose, including the intended use of the chemical product	Variation of registration and label approval to comply with the outcomes of the diquat reconsideration

Veterinary chemical products and approved labels

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has registered or varied the relevant particulars or conditions of the registration in respect of the following products and has approved the label or varied the relevant particulars or conditions of the approval in respect of the containers for the chemical product, with effect from the dates shown.

Table 2: Variations of registration – veterinary chemical products

Application no.	153661
Product name	Vets' Own Meloxicam 1 mg Tablets
Active constituent	Each tablet contains 1 mg meloxicam
Applicant name	Chanelle Pharmaceuticals Manufacturing Limited
Applicant ACN	N/A
Date of variation	12 June 2026
Product registration no.	92224
Label approval no.	92224 / 153661
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to change the distinguishing product name and the name that appears on the label from Variation to the particulars of registration and label approval to change the distinguishing product name and the name that appears on the label from 'AVET Meloxicam 1 mg Tablets' to 'Vets' Own Meloxicam 1 mg Tablets'

Application no.	153662
Product name	Vets' Own Meloxicam 2.5 mg Tablets
Active constituent	Each tablet contains 2.5 mg meloxicam
Applicant name	Chanelle Pharmaceuticals Manufacturing Limited
Applicant ACN	N/A
Date of variation	12 June 2026
Product registration no.	92225
Label approval no.	92225 / 153662
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to change the distinguishing product name and the name that appears on the label from Variation to the particulars of registration and label approval to change the distinguishing product name and the name that appears on the label from 'AVET Meloxicam 2.5 mg Tablets' to 'Vets' Own Meloxicam 2.5 mg Tablets'

Application no.	153663
Product name	Vets' Own Meloxicam 1.5 mg/mL Dog Oral Suspension
Active constituent	1.5 mg/mL meloxicam
Applicant name	Chanelle Pharmaceuticals Manufacturing Limited
Applicant ACN	N/A
Date of variation	12 June 2026
Product registration no.	63653
Label approval no.	63653 / 153663
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to change the distinguishing product name and the name that appears on the label from Variation to the particulars of registration and label approval to change the distinguishing product name and the name that appears on the label from 'AVET Meloxicam Dog Oral Suspension' to 'Vets' Own Meloxicam 1.5 mg/mL Dog Oral Suspension'

Application no.	152295
Product name	Pentoflex 100mg/mL Injection
Active constituent	100 mg/mL pentosan polysulfate sodium
Applicant name	Headway Investments Pty Ltd
Applicant ACN	655 095 855
Date of variation	23 June 2026
Product registration no.	85262
Label approval no.	85262/152295
Description of the application and its purpose, including the intended use of the chemical product	Variation to the relevant particulars of the product and the label by revising the storage conditions

Approved active constituents

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has approved or varied the relevant particulars or conditions of the approval of the following active constituents, with effect from the dates shown.

Table 3: Approved active constituents

Application no.	150671
Active constituent	Azaperone
Applicant name	PAH Australia Pty Ltd
Applicant ACN	43 835 698
Date of approval	24 June 2026
Approval no.	96786
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent azaperone for use in veterinary chemical products

Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade and the Stockholm Convention on Persistent Organic Pollutants

Australian Government
Department of Agriculture

NOTICE UNDER SECTION 69C OF THE AGRICULTURAL AND VETERINARY CHEMICALS (ADMINISTRATION) ACT 1992

Pursuant to paragraph 2 of section 69C of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*, notice is hereby given that following the 12th Conference of the Parties to the *Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade* (the Rotterdam Convention), and to the *Stockholm Convention on Persistent Organic Pollutants* (the Stockholm Convention), the Australian Government is commencing consideration of pursuing amendments to the import and export controls imposed on certain chemicals.

The Department of Agriculture, Fisheries and Forestry (DAFF) is seeking to develop amendments to the Agricultural and Veterinary Chemicals (Administration) Regulations 1995 to apply controls to the import or export, or both, of the chemicals specified in this notice. The controls established would be requirements for written authorisation from DAFF for the import or export or both, of the chemicals specified in this notice. These controls are needed for Australia to comply with obligations under the Rotterdam Convention or Stockholm Convention. Amendments to the Customs (Prohibited Exports) Regulations 1958 (Customs PE Regulations) and the Customs (Prohibited Imports) Regulations 1956 (Customs PI Regulations) would also be needed. The amendments, if progressed, are proposed to take effect on the day after the amendment to the Regulations is registered on the Federal Register of Legislative Instruments or on a later date as prescribed.

The Joint Standing Committee on Treaties is yet to make a determination on these amendments.

Rotterdam Convention

Under the Rotterdam Convention, the export of the specified chemicals to countries that are Parties to the Convention for use as pesticides may be prohibited absolutely or only authorised if certain specified conditions given by the importing Party are met. Parties to the Convention that export chemicals listed in the Convention must ensure that exports do not occur when the importing country has indicated that it does not consent to imports of that chemical.

To meet Australia's export notification obligations under the Rotterdam Convention, companies seeking to export the 13 chemicals proposed for listing would need to apply to DAFF for permission to export (contact details are at the end of this notice). Export could not occur until permission has been granted and DAFF may refuse to grant permission where the importing country does not grant its consent.

No specific import restrictions, including any form of prohibition, will apply to a substance as a result this listing of specified chemicals pursuant to the Rotterdam Convention in Australian legislation. The existing import requirements of the *Agricultural and Veterinary Chemicals (Administration) Act 1992* continue to apply.

Stockholm Convention

Under the Stockholm Convention, the production, use, import, and export of chemicals listed as persistent organic pollutants (POPs) are generally prohibited. Exporting Parties must not export these chemicals to countries that are

Parties to the Convention, except in strictly limited circumstances such as environmentally sound disposal or scientific research, and in accordance with any conditions communicated by the Convention Secretariat.

To meet Australia's obligations under the Stockholm Convention, companies seeking to import or export the 13 chemicals proposed for listing would need to apply to DAFF and comply with all conditions imposed to protect human health and the environment. Import or export could not occur until permission has been granted and DAFF may refuse to grant permission where the circumstances of importation or exportation are inconsistent with Australia's obligations, including non-compliance with conditions.

For the specified chemicals, with the exception of chlorpyrifos, it is proposed the amendments, if progressed, will take effect on the day after the amendment to the Regulations is registered on the Federal Register of Legislative Instruments.

The amendment for chlorpyrifos, if progressed, would not commence until 1 January 2032, aligning with cessation of specific exemptions to all trade and use to the chlorpyrifos listing including in the Stockholm Convention. The government recognises the regulatory decision of the Australian Pesticides and Veterinary Medicines Authority of 30 September 2024 retained some uses as chlorpyrifos as being safe, efficacious and not a threat to Australia's trade; the proposed commencement period would support transition to alternatives for the retained uses of chlorpyrifos ahead of global prohibitions on international trade and supply commencing in full in 2032.

Amendments relating to Rotterdam and Stockholm Conventions

The following substances and information will be included in Part 2 of Schedule 1 of the Agricultural and Veterinary Chemicals (Administration) Regulations 1995. Consequential amendments to the Customs PE Regulations and Customs PI Regulations are identified to aid consultation.

Table 4: Carbosulfan

IUPAC name	2,3-dihydro-2,2-dimethylbenzofuran-7-yl [(dibutylamino)thio]methylcarbamate
CAS number	55285-84-8
Prescribed active constituent/chemical product	No
Relevant international agreement or arrangement	Rotterdam Convention
Conditions or restrictions	Export prohibited except with written permission
Supporting Amendments	Customs PE Regulations, Customs PI Regulations

Table 5: Fenthion

IUPAC name	O,O-dimethyl O-[3-methyl-4-(methylthio)phenyl] phosphorothioate
CAS number	55-38-9
Prescribed active constituent/chemical product	No
Relevant international agreement or arrangement	Rotterdam Convention
Conditions or restrictions	Export prohibited except with written permission
Supporting Amendments	Customs PE Regulations, Customs PI Regulations

Table 6: Terbufos

IUPAC name	S-[(tert-butylthio)methyl] O,O-diethyl phosphorodithioate
CAS number	13071-79-9
Prescribed active constituent/chemical product	No
Relevant international agreement or arrangement	Rotterdam Convention
Conditions or restrictions	Export prohibited except with written permission
Supporting Amendments	Customs PE Regulations, Customs PI Regulations

Table 7: Alpha-hexachlorocyclohexane

IUPAC name	α -Hexachlorocyclohexane
CAS number	319-84-6
Prescribed active constituent/chemical product	No
Relevant international agreement or arrangement	Stockholm Convention
Conditions or restrictions	Import and Export prohibited except with written permission
Supporting Amendments	Customs PE Regulations, Customs PI Regulations

Table 8: Beta-hexachlorocyclohexane

IUPAC name	β -Hexachlorocyclohexane
CAS number	319-85-7
Prescribed active constituent/chemical product	No
Relevant international agreement or arrangement	Stockholm Convention
Conditions or restrictions	Import and Export prohibited except with written permission
Supporting Amendments	Customs PE Regulations, Customs PI Regulations

Table 9: Chlordane

IUPAC name	Decachlorooctahydro-1,3,4-metheno-2H-cyclobuta[cd]pentalen-2-one
CAS number	143-50-0
Prescribed active constituent/chemical product	No
Relevant international agreement or arrangement	Stockholm Convention
Conditions or restrictions	Import and Export prohibited except with written permission
Supporting Amendments	Customs PE Regulations, Customs PI Regulations

Table 10: Chlorpyrifos

IUPAC name	O,O-Diethyl O-(3,5,6-trichloro-2-pyridyl) phosphorothioate
CAS number	2921-88-2
Prescribed active constituent/chemical product	No
Relevant international agreement or arrangement	Stockholm Convention
Conditions or restrictions	From 1 January 2032 Import and Export prohibited except with written permission.
Supporting Amendments	Customs PE Regulations, Customs PI Regulations

Table 11: Dicofof

IUPAC name	2,2,2-trichloro-1,1-bis(4-chlorophenyl)ethanol
CAS number	115-32-2
Prescribed active constituent/chemical product	No
Relevant international agreement or arrangement	Stockholm Convention
Conditions or restrictions	Import and Export prohibited except with written permission
Supporting Amendments	Customs PE Regulations, Customs PI Regulations

Table 12: Endosulfan

IUPAC name	1,4,5,6,7,7-hexachloro-8,9,10-trinorborn-5-en-2,3-ylenebismethylene sulfite or 6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin 3-oxide
CAS number	115-29-7
Prescribed active constituent/chemical product	No
Relevant international agreement or arrangement	Stockholm Convention
Conditions or restrictions	Import and Export prohibited except with written permission
Supporting Amendments	Customs PI Regulations

Table 13: Lindane

IUPAC name	(1 α , 2 α , 3 β , 4 α , 5 α , 6 β)-hexachlorocyclohexane
CAS number	58-89-9
Prescribed active constituent/chemical product	No
Relevant international agreement or arrangement	Stockholm Convention
Conditions or restrictions	Import and Export prohibited except with written permission
Supporting Amendments	Customs PE Regulations

Table 14: Methoxychlor

IUPAC name	1,1,1-trichloro-2,2-bis(4-methoxyphenyl)ethane
CAS number	72-43-5
Prescribed active constituent/chemical product	No
Relevant international agreement or arrangement	Stockholm Convention
Conditions or restrictions	Import and Export prohibited except with written permission
Supporting Amendments	Customs PE Regulations

Table 15: Pentachlorobenzene

IUPAC name	1,2,3,4,5-pentachlorobenzene
CAS number	608-93-5
Prescribed active constituent/chemical product	No
Relevant international agreement or arrangement	Stockholm Convention
Conditions or restrictions	Import and Export prohibited except with written permission
Supporting Amendments	Customs PE Regulations

Table 16: Pentachlorophenol

IUPAC name	Pentachlorophenol
CAS number	87-86-5
Prescribed active constituent/chemical product	No
Relevant international agreement or arrangement	Stockholm Convention
Conditions or restrictions	Import and Export prohibited except with written permission
Supporting Amendments	Customs PI Regulations

As further information is available, it will be made available on the DAFF website: www.agriculture.gov.au.

Stakeholders wishing to provide feedback or make submissions regarding the proposed amendments are invited to contact the officer listed below.

Contact officer: Dr Joseph Morrall, Director International Policy – Forests and Agvet Chemicals Section

Phone: 02 6272 4442

Email: controlledchemicals@aff.gov.au

Licensing of veterinary chemical manufacturers

Pursuant to Part 8 of the Agricultural and Veterinary Chemicals Code (Agvet Code), scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has taken action with respect to the licensing of the following veterinary chemical manufacturers with effect from the dates shown.

For a comprehensive listing of all licensed manufacturers please see the APVMA website.

New licenses

The APVMA has issued the following licenses under subsection 123(1) of the Agvet Code:

Table 17: New licenses issued by the APVMA under subsection 123(1) of the Agvet Code

Company name	Licence number	Company ACN	Address	Product types	Steps of manufacture	Date issued
Troy Laboratories Pty Ltd	1092	000 283 769	37 Glendenning Road Glendenning NSW 2761	Category 1: Sterile products and terminally sterilised ointment Category 2: Tablets, creams / lotions, ointments, gels, pastes, sprays, suspensions and liquids Category 3: Liquids and sprays	Quality assurance (QA) of raw materials, formulation including blending, granulation, dry milling, wet milling, aseptic filling, filling, packaging, secondary packaging, labelling, secondary labelling, tableting, sterilisation (heat and filtration), microbiological reduction treatment (filtration and chemical), analysis and testing (physical, chemical, microbiological, and endotoxin), storage, and release for supply.	24 June 2026
Animal Consulting Enterprises Pty. Ltd	1081	115 191 056	12 Gildea Lane Bendigo East VIC 3550	Category 1: Immunobiologicals (bacterial vaccines), sterile products for injection (Sterile saline & Hartmanns solution)	Quality assurance (QA) of raw materials, bacterial fermentation, formulation including blending, aseptic filling, sterilisation (heat, filtration), microbiological reduction treatment (heat, chemical-Formaldehyde), packaging, secondary packaging, labelling, secondary labelling, analysis and testing (physical, chemical, microbiological, sterility test), storage and release for supply.	1 July 2026

Licence cancellations

The APVMA has cancelled the following licenses under subsection 127(1) of the Agvet Code:

Table 18: Licenses cancelled by the APVMA under subsection 127(1) of the Agvet Code

Company name	Licence number	Company ACN	Address	Date cancelled
Phibro Animal Health Pty Ltd	6228	093 869 991	6 Distribution Drive Orchard Hills NSW 2748	3 June 2026

Licence suspensions

The APVMA has suspended the following licenses under subsection 127(1) of the Agvet code:

Table 19: Licenses suspended by the APVMA under subsection 127(1) of the Agvet Code

Company name	Licence number	Company ACN	Address	Period of suspension
Redox Limited	6118	000 762 345	2 Swettenham Road Minto NSW 2566	From 26 March 2026 to 26 September 2026

Amendments to the APVMA MRL Standard

The Australian Pesticides and Veterinary Medicines Authority (APVMA) approves maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. The MRLs approved by the APVMA are associated with a regulatory decision to register a product, grant a permit approval, or as an outcome from a review decision and are set out in the *Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Instrument 2023*. The *MRL Standard* lists MRLs of substances that may arise from the approved use of agricultural and veterinary chemical products containing those substances on commodities used for human consumption as well as livestock feeds. The *MRL Standard* also provides the relevant residue definitions to which these MRLs apply. There may be situations where the residue definition for monitoring and enforcement is different to the definition used for dietary risk assessment purposes.

MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. In considering MRLs and variation to MRLs, the APVMA takes into account studies on chemistry, metabolism, analytical methodology, residues, toxicology, good agricultural practice and dietary exposure. In approving MRLs, the APVMA is satisfied, from dietary exposure assessment, that the levels set are not an undue hazard to human health.

The APVMA has amended the *MRL Standard* and the changes will have affect the day after the instrument is registered.

Details of the amendment can be found in the *Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Amendment Instrument (No. 3) 2026*.

The amendments will be incorporated into the compilation of the *Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Instrument 2023*.

The MRL Standard is accessible via the [Federal Register of Legislation website](#).

For further information please contact:

MRL Contact Officer
Australian Pesticides and Veterinary Medicines Authority

Proposal to amend Schedule 20 in the Australian New Zealand Food Standards Code

In the previous notice on page 23 of APVMA Gazette No. 14, the APVMA gazetted amendments which it has approved to vary maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out in the APVMA's MRL Standard.

Under section 82 of the *Food Standards Australia New Zealand Act 1991*, the APVMA is proposing to incorporate those variations Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Amendment Instrument (No. 3) 2026 to MRLs into Schedule 20 – Maximum residue limits in the Australia New Zealand Food Standards Code.

MRLs contained in Schedule 20 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means Schedule 20 permits the sale of treated foods and protects public health and safety by minimising residues in foods consistent with the effective control of pests and diseases.

The APVMA and Food Standards Australia New Zealand (FSANZ) are satisfied, based on dietary exposure assessments and current health standards, that the proposed limits are not harmful to public health.

The agreement between the Australian Government and the New Zealand Government concerning a Joint Food Standards System excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

A Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO) will be made.

The APVMA invites comment on these proposals. Details on how to make a submission appear near the end of this notice, below the details of the proposed amendment.

The APVMA will consider any public comments made in response to this proposal. If the APVMA decides to proceed with the proposal, it will further notify any variations it makes to Schedule 20 in the APVMA Gazette. The variations will take effect as from the date of that subsequent notice.

Proposed variation to Schedule 20 in the Australia New Zealand Food Standards Code

14 July 2026

Note: Subsection 82(2) of the *Food Standards Australia New Zealand Act 1991* provides that variations to standards are legislative instruments, but are not subject to disallowance or sunseting.

To commence: on gazettal of variation

Schedule 20 Maximum Residue Limits

[1] Section S20—3 (table entry for Agvet chemical: Benzovindiflupyr)

Repeal:

Barley	0.2
Edible offal (mammalian)	*0.01
Meat (mammalian) [in the fat]	*0.01
Wheat (subgroup)	0.01

Substitute:

Barley	0.4
Edible offal (mammalian)	0.07
Meat (mammalian) [in the fat]	0.02
Wheat (subgroup)	0.3

[2] Section S20—3 (table entry for Agvet chemical: Buprofezin)

Insert:

Papaya (pawpaw)	T1
-----------------	----

[3] Section S20—3 (table entry for Agvet chemical: Cyclobutrifluram)

Insert:

Brassica (cole or cabbage) vegetables, head cabbages, flowerhead brassicas	T0.1
Brassica leafy vegetables	T0.2

[4] Section S20—3 (table entry for Agvet chemical: Fluopyram)

Repeal:

Peppers, sweet	0.3
Tomatoes (subgroup)	T1.5

[5] Section S20—3 (table entry for Agvet chemical: Fluopyram)

Insert:

Fruiting vegetables, other than cucurbits [except peppers, chilli, dried]	0.5
---	-----

[6] Section S20—3 (table entry for Agvet chemical: Fomesafen)

Insert:

Subgroup of Beans with pods	T*0.01
Subgroup of Succulent peas without pods	T*0.01

[7] Section S20—3 (table entry for Agvet chemical: Indaziflam)

Insert:

Pome fruits	*0.01
Stone fruits	*0.01

[8] Section S20—3 (table entry for Agvet chemical: Oxathiapiprolin)

Repeal:

Basil, dry	T90
------------	-----

[9] Section S20—3 (table entry for Agvet chemical: Oxathiapiprolin)

Insert:

Chives	T2
Chives, Chinese	T2
Dried herbs (except hops, dry)	T90
Galangal, rhizome	T*0.01
Garlic chives	T2
Herbs	T10
Lemon verbena (dry leaves)	T90
Turmeric, root	T*0.01

[10] Section S20—3 (table entry for Agvet chemical: Tebuconazole)

Repeal:

Avocado	0.2
Custard apple	2
Papaya (pawpaw)	0.2
Persimmon, American	2
Tomato	0.5

[11] Section S20—3 (table entry for Agvet chemical: Tebuconazole)

Insert:

Assorted tropical and sub-tropical fruits – inedible peel [except banana; passionfruit, pineapple]	2
Fruiting vegetables, other than cucurbits [except peppers, chilli; dried; peppers, sweet]	0.5

Invitation for submissions

Written submissions are invited from interested individuals and organisations to assist the APVMA in considering the proposal to vary Schedule 20 – Maximum residue limits in the Australia New Zealand Food Standards Code.

Submissions should be strictly confined to relevant matters that the APVMA must consider (such as public health and safety) which are associated with the occurrence of the proposed residues in foods. Comments received outside these grounds will not be considered by the APVMA.

Claims made in submissions should be supported wherever possible by referencing or including relevant studies, research findings, trials and surveys. Technical information should be in sufficient detail to allow independent scientific assessment.

Submissions must be made in writing and should be clearly marked as a 'submission on the proposed amendment to Schedule 20' and quote the correct amendment number.

Deadline for public submissions

Submissions must be received by 11 August 2026 (28 days from date Gazette published). Submissions received after this deadline will only be considered by prior arrangement or if agreement for an extension has been given prior to this closing date. Agreement to an extension of time will only be given if extraordinary circumstances warrant an extension to the submission period.

Please note: submissions will be published on the APVMA's website, unless you have asked for the submission to remain confidential, or if the APVMA chooses at its discretion not to publish any submissions received (refer to the [public consultation coversheet](#)).

Please lodge your submission using the [public consultation coversheet](#), which provides options for how your submission will be published.

Note that all APVMA documents are subject to the access provisions of the *Freedom of Information Act 1982* and may be required to be released under that Act should a request for access be made.

Variations to the Maximum Residue Limits Standard under the Australian New Zealand Food Standards Code

The APVMA has previously gazetted particular amendments which it had made to the APVMA MRL Standard and which have been proposed as variations to maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in Schedule 20 – Maximum residue limits of the Australia New Zealand Food Standards Code. This notice pertains to proposals (No. 1) gazetted on 10 March 2026 (No. APVMA 5).

Submissions have been sought on these proposals and the APVMA has written separately to each person or organisation that made a submission. All matters raised in the submissions have been resolved.

Under subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*, the APVMA has, by legislative instrument, incorporated these variations to MRLs into Schedule 20. A copy of the Amendment Instrument (No. APVMA 3, 2026) accompanies this notice. For a complete and up-to-date version of Schedule 20, including these amendments together with their Explanatory Statement, please refer to the [Federal Register of Legislation](#).

Based on dietary exposure assessments and current health standards, the APVMA and Food Standards Australia New Zealand (FSANZ) are satisfied that these MRLs are not harmful to public health. MRLs contained in Schedule 20 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Schedule 20 permits the sale of treated foods and protects public health by minimising residues in foods consistent with the effective control of pests and diseases.

The agreement between the Australian Government and the New Zealand Government concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

A Sanitary and Phytosanitary notification to the World Trade Organization (WTO) was also made in relation to the variations to MRLs in Schedule 20 and comment was received in response to that notice which has been addressed.

A copy of these variations have been given to FSANZ.

The variations take effect as from the date of this notice.

This notice is published in accordance with subsection 82(7) of the *Food Standards Australia New Zealand Act 1991*.

Australian Government

**Australian Pesticides and
Veterinary Medicines Authority**

Australia New Zealand
Food Standards Code —
Schedule 20 — Maximum residue limits Variation
Instrument No. APVMA 3, 2026

I, Daniel Poflowski, delegate of the Australian Pesticides and Veterinary Medicines Authority, acting in accordance with my powers under subsection 11(1) of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*, make this instrument for the purposes of subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*.

Daniel Poflowski

Delegate of the Chief Executive Officer of the Australian Pesticides and Veterinary Medicines Authority

Dated this ninth day of July 2026

Part 1 Preliminary

1 Name of instrument

This instrument is the *Australia New Zealand Food Standards Code — Schedule 20 – Maximum residue limits Variation Instrument No. APVMA 3, 2026* (Amendment Instrument).

2 Commencement

In accordance with subsection 82(8) of the *Food Standards Australia New Zealand Act 1991*, this instrument commences on the day it is published in the *Gazette*.

Note: A copy of the variations made by the Amendment Instrument was published in the Commonwealth of Australia Agricultural and Veterinary Chemicals Gazette.

3 Object

The object of this instrument is for the APVMA to make variations to Schedule 20 – Maximum residue limits in the *Australia New Zealand Food Standards Code* to include or change maximum residue limits pertaining to agricultural and veterinary chemical products.

4 Interpretation

In this instrument: —

APVMA means the Australian Pesticides and Veterinary Medicines Authority established by section 6 of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*; and

Principal Instrument means Schedule 20—Maximum residue limits in the Australia New Zealand Food Standard Code as defined in Section 4 of the *Food Standards Australia New Zealand Act 1991* being the Code published in *Gazette* No. P 27 on 27 August 1987 together with any amendments of the standards in that Code. Schedule 20 was published in the *Food Standards Gazette* FSC 96 on Thursday 10 April 2015 and was registered as a legislative instrument on 1 April 2015 (F2015L00468).

Part 2 Variations to Schedule 20— Maximum Residue Limits

5 Variations to Schedule 20

The Schedule to this instrument sets out the variations made to the Principal Instrument by this instrument.

Schedule

Variations to Schedule 20 – Maximum residue limits

[1] Section S20—3

Repeal, the corresponding permitted residue(s), food commodities and associated MRLs:

Agvet chemical: Cyclobutrifluram

Permitted residue — commodities of plant origin: Cyclobutrifluram

Permitted residue — commodities of animal origin: sum of cyclobutrifluram and 2-trifluoromethyl-nicotinamide (SYN510275), expressed as cyclobutrifluram

All other foods except animal food commodities	0.05
Barley	*0.01
Edible offal (mammalian)	0.5
Eggs	*0.03
Meat (mammalian)	0.05
Milks	0.05
Poultry meat	*0.03
Poultry, edible offal of	*0.03
Wheat	*0.01

[2] Section S20—3

Insert in alphabetical order the following chemicals, the corresponding permitted residue(s), food commodities and associated MRLs:

Agvet chemical: Cyclobutrifluram

Permitted residue — commodities of plant origin: Cyclobutrifluram

Permitted residue — commodities of animal origin: sum of cyclobutrifluram and 2-trifluoromethyl-nicotinamide (SYN510275), expressed as cyclobutrifluram

All other foods	0.2
Barley	*0.01
Edible offal (mammalian)	0.5
Eggs	*0.03
Fruiting vegetables, cucurbits	0.1
Fruiting vegetables, other than cucurbits	*0.01
Meat (mammalian)	0.05
Milks	0.05
Poultry meat	*0.03
Poultry, edible offal of	*0.03

Wheat	*0.01
-------	-------

Agvet chemical: Metarylpicoxamid

Permitted residue: commodities of plant origin: Metarylpicoxamid

Commodities of animal origin: Sum of metarylpicoxamid and (2S,3S)-3-(2-methylphenyl)butan-2-yl N- {[3-hydroxy]-4-methoxypyridin-2-yl}-L-alaninate (X12644507), expressed as metarylpicoxamid

Edible offal (mammalian)	*0.02
Eggs	*0.02
Meat (mammalian)	*0.02
Milks	*0.02
Poultry, edible offal of	*0.02
Poultry meat	*0.02
Soya bean (dry)	*0.01

[3] Section S20—3 (table entry for Agvet chemical: Azoxystrobin)

Repeal:

Broccoli, Chinese (Gai lan)	1
Leafy vegetables [except broccoli, Chinese (Gai lan); witloof chicory]	15
Spices [except peppers, chili, dried]	*0.1

[4] Section S20—3 (table entry for Agvet chemical: Azoxystrobin)

Insert:

Chervil	T70
Coriander seed	T70
Fennel seed	T70
Leafy vegetables [except chervil; mizuna; rucola (rocket)]	15
Spices [except coriander seed; fennel seed; peppers, chili, dried]	*0.1
Mizuna	T70
Rucola (Rocket)	T70

[5] Section S20—3 (table entry for Agvet chemical: Azoxystrobin)

Repeal:

Fennel, bulb	5
--------------	---

Substitute:

Fennel, bulb	T10
--------------	-----

[6] Section S20—3 (table entry for Agvet chemical: Cyclaniliprole)

Repeal:

Leafy vegetables [except brassica leafy vegetables; leafy greens]	3
---	---

Substitute:

Leafy vegetables [except brassica leafy vegetables; leafy greens]	4
---	---

[7] Section S20—3 (table entry for Agvet chemical: Cyprodinil)

Insert:

Barley	T3
--------	----

[8] Section S20—3 (table entry for Agvet chemical: Fluopyram)

Insert:

Ginger root	*0.01
Ginger root, dried	0.1

[9] Section S20—3 (table entry for Agvet chemical: Tiafenacil)

Repeal:

Meat (mammalian)	*0.02
------------------	-------

[10] Section S20—3 (table entry for Agvet chemical: Tiafenacil)

Insert:

Meat (mammalian) (in the fat)	0.05
-------------------------------	------

[11] Section S20—3 (table entry for Agvet chemical: Tiafenacil)

Repeal:

Edible offal (mammalian)	*0.02
--------------------------	-------

Substitute:

Edible offal (mammalian)	0.1
--------------------------	-----
