Australian Pesticides and Veterinary Medicines Authority

The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

General information

The APVMA Gazette is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 8J(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

Distribution and subscription

The APVMA Gazette is published in electronic format only and is available from the APVMA website.

If you would like to subscribe to receive email notification when a new edition is published, please complete a subscription form.

APVMA contacts

For enquiries regarding the publishing and distribution of the APVMA Gazette: Telephone: +61 2 6770 2300.

For enquiries on APVMA Gazette content, please refer to the individual APVMA contacts listed under each notice.

Notice under section 32(2) of the Agvet Code: Reconsideration of MCPA approvals and registrations 1
Attachment A: Chemical product registrations containing MCPA 4
Attachment B: MCPA ((4-chloro-2-methylphenoxy) acetic acid) reconsideration work plan 20

Notice under section 32(2) of the Agvet Code: Reconsideration of MCPA approvals and registrations

1) The Australian Pesticides and Veterinary Medicines Authority (APVMA) published a notice in the APVMA Gazette on 27 April 2010 announcing the reconsideration of the registration of agricultural chemical products containing (4-chloro-2-methylphenoxy)acetic acid (MCPA) and their approved labels under Division 4, Part 2 of the Agricultural and Veterinary Chemical Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994* (Agvet Code). The scope of the reconsideration was 'environmental aspects of product registrations and label approvals for MCPA, limiting it to the APVMA's concern about the potential risk of non-target damage that spray drift of such products can cause'.

2) To ensure that all current MCPA product registrations and associated label approvals are formally included in the reconsideration, the APVMA hereby gives notice, under subsection 32(2) of the Agvet Code, that the reconsideration will now include the product registrations and associated label approvals shown in Attachment A.

3) The APVMA is also now proposing to expand the matters being reconsidered to include whether spray drift of these products can be managed adequately to protect bystander, livestock and pollinator areas, as defined in the APVMA's current spray drift policy, in addition to aquatic and vegetation areas as advised in the original notice.

Matters the APVMA is proposing to reconsider in relation to MCPA registrations and approvals

4) The matters the APVMA is now proposing to reconsider in relation to registered MCPA products and associated approved labels are whether:

    a. the products continue to meet the safety criteria as set out in section 5A of the Agvet Code; and

    b. the products continue to meet the trade criteria as set out in section 5C of the Agvet Code; and

    c. the labels continue to meet the labelling criteria as set out in section 5D of the Agvet Code; and

    d. the products and labels comply with any requirement prescribed by the Agricultural and Veterinary Chemicals Code Regulations 1995 (Agvet Regulations).

5) As provided by section 34(2) of the Agvet Code, the APVMA proposes to reconsider the matters covered by section 34(1) only to the extent that they are relevant risks posed by spray drift to bystander, pollinator, natural aquatic and native vegetation areas with respect to the safety criteria and livestock areas with respect to the trade criteria.

6) For the purposes of being satisfied as to whether a chemical product containing MCPA continues to meet the safety criteria, in the context of spray drift, the APVMA must have regard to:

    a. the toxicity of the product and its residues, including metabolites and degradation products, in relation to relevant organisms and ecosystems, including human beings; in the context of spray drift to bystander, pollinator, natural aquatic and vegetation areas.

    b. any conditions to which its registration is, or would be, subject

    c. any relevant particulars that are, or would be, entered in the Register for the product

7) For the purposes of being satisfied as to whether a chemical product containing MCPA continues to meet the trade criteria, in the context of spray drift, the APVMA must have regard to:

    a. any conditions to which its registration is, or would be, subject; and

    b. any relevant particulars that are, or would be, entered in the Register for the product

Reasons for the proposed reconsideration

8) The APVMA's spray drift policy recognises that off-target spray drift from chemical products may present risks to bystanders, animals, plants and the environment, and could lead to residues on pasture and other areas where livestock grazes, potentially presenting an undue risk to trade.

9) MCPA is an active constituent in agricultural chemical products registered by the APVMA.

10) The APVMA has information allowing calculation of Regulatory Acceptable Levels (RALs) for sensitive areas. Exposure of non-target plants and animals, and workers and bystanders to levels of MCPA below the relevant RAL is considered unlikely to have an unintended harmful effect, and unlikely to result in residues of MCPA in animal commodities through grazing.

11) The RALs for MCPA based on information currently available to the APVMA are listed in Table 1.

Table 1: Preliminary Regulatory Acceptable Levels for MCPA

Sensitive Area	RAL (MCPA salts and acids)	RAL (MCPA esters)
Natural aquatic	13 μg/L	13 μg/L
Vegetation	8.5 g/ha	1.5 g/ha
Pollinator	33,333 g/ha	16,667 g/ha
Bystander	42.6 g/ha	42.6 g/ha
Livestock	578 ppm	578 ppm

12) The APVMA mitigates risks posed by spray drift by including specific instructions for use on the label of relevant products. These instructions include directions relating to the type of application equipment, environmental conditions and situation where products are sprayed, and may require mandatory down-wind no spray buffer zones.

13) Down-wind no spray buffer zones mitigate risks from spray drift to sensitive areas because spray droplets move with the wind in a predictable and quantifiable manner, as described in the APVMA's Spray Drift Risk Assessment Manual. This means that it can be calculated how far down-wind from the point of spray application the quantity of chemical product will fall below the RAL, meaning that it is no longer likely to have a harmful effect on the sensitive area.

14) Calculation of down-wind buffer zones based on the preliminary RALs and according to the APVMA's Spray Drift Risk Assessment Manual indicates that buffer zones would be required to prevent exceedance of the preliminary RALs for bystander, natural aquatic and vegetation areas.

15) Accordingly, the APVMA is proposing to reconsider the registration of MCPA products, and the associated label approvals listed in Table 1, to determine appropriate RALs and subsequently to determine whether those products continue to meet the safety and trade criteria, and labels meet the labelling criteria.

Reconsideration Work Plan

16) A Work Plan for the reconsideration has been prepared in accordance with subsection 31(2) of the Agvet Code and regulation 20 of the Agvet Regulations and can be found at Attachment B.

Written submissions are invited

17) The APVMA invites submissions on the matters being reconsidered in the reconsideration of MCPA.

18) When preparing your submission, the APVMA prefers you to:

    a. clearly identify the issue and clearly state your point of view

b. give reasons for your comments, supporting them with relevant information and indicating the source of the information you have used.

19) Submissions by email to chemicalreview@apvma.gov.au are preferred; all electronic submissions to the APVMA will be acknowledged via return email.

20) Please ensure your submission includes a public submission coversheet, which provides options for how your submission will be published. The completed coversheet helps to ensure submission data is managed appropriately.

Please note: Submissions will be published on the APVMA's website, unless you have asked for the submission to remain confidential. Note also that all submissions received are subject to legislative requirements, including the *Freedom of Information Act 1982*, the *Privacy Act 1988* and the Agvet Code. The APVMA confirms that if your submission includes confidential commercial information or protected information, such information shall be subject to the relevant provisions of the Agvet Code including relevant limitations on use and disclosure by the APVMA.

21) The closing date for submissions is 24 February 2027.

22) Submissions can be sent to:

Attachment B: MCPA ((4-chloro-2-methylphenoxy) acetic acid) reconsideration work plan

Nomination and Prioritisation	MCPA was nominated for spray drift specific reconsideration in 2010. No relevant notice was published under section 30 of the Agvet Code.
Scoping and workplan	The APVMA is reconsidering whether MCPA chemical products continue to meet the safety and trade criteria set out in sections 5A and 5C of the Agvet Code. The matters that the APVMA is dealing with in the reconsideration are limited to determination of the required instructions for buffer zones needed to mitigate risks of spray drift on sensitive areas identified in the APVMA's spray-drift policy: bystander areas, natural aquatic areas, pollinator areas, vegetation areas, livestock areas. The APVMA will reconsider all MCPA chemical product registrations limited to assessment of the following: • Human health: – Determination of the regulatory acceptable levels for bystander areas for the purpose of spray-drift assessment. • Environmental safety: – Determination of the regulatory acceptable levels for natural aquatic areas, pollinator areas and vegetation areas for the purpose of spray-drift assessment. • Trade: – Determination of the regulatory acceptable level for livestock areas for the purpose of spray-drift assessment. The APVMA will also consider whether currently approved labels for MCPA chemical products contain adequate instructions in relation to mitigation of the risks posed by spray drift to continue to meet the labelling criteria set out in section 5D of the Agvet Code.
Proposed timeframe for the reconsideration	Regulation 85 of the Agvet Code Regulations deals with the timeframe for a reconsideration that was not previously concluded by 1 July 2015. Subregulation 85(3) specifies that for subsection 165A(1) of the Code, the remaining period, after 30 June 2015, within which the APVMA must conclude the reconsideration (the reconsideration assessment period) is to be worked out in accordance with the formula: A + B + 2E + 3C + J + D + X = timeframe for completion where: A means the longest of the periods, in months, mentioned in column 2 of Schedule 7 for whichever of items 3.1, 3.2, 3.3, 4.1, 7.1, 7.2, and 7.3 of Schedule 7 that the APVMA determines are necessary after 1 July 2015 for the reconsideration. Example: If the APVMA determines that items 3.1, 4.1 and 7.3 of Schedule 7 are necessary after 1 July 2015 for the reconsideration, A is the longest of the periods in column 2 for those items, which is 13 months (the period for item 3.1). B means the longest of the periods, in months, mentioned in column 2 of Schedule 7 for whichever of items 2.1 to 2.3, 5.1, 5.2, 5.4, 6.1 to 6.3, 9, and 10.1 to 10.3 of Schedule 7 that the APVMA determines are necessary after 1 July 2015 for the reconsideration. C means the longest of the periods, in months, mentioned in column 2 of Schedule 7 for whichever of items 11.1, 11.2 or 11.3 of Schedule 7 that the APVMA determines are necessary after 1 July 2015 for the reconsideration. D means 4 months. E means the longest of the periods, in months, mentioned in column 2 of Schedule 7 for whichever of items 8.1, 8.2 or 8.3 of Schedule 7 that the APVMA determines are necessary after 1 July 2015 for the reconsideration. J means: (a) if the APVMA must, after 1 July 2015, consult each coordinator designated for a jurisdiction about the reconsideration in accordance with subsection 34A(3) of the Code—3 months; and (b) in any other case—nil. X means:

	(a) if the APVMA appoints an arbitrator under section 64 of the Code after 1 July 2015—3 months; and (b) in any other case—nil. In order for the APVMA to complete a reconsideration of MCPA spray drift instructions, chemical product registration and label approvals, a contemporary assessment of all data related to the safety criteria, for the active constituent, and to the safety and trade criteria for the product is required. This means that the modules required are the same that would be required for approval of a new active constituent and registration of a new chemical product which is intended to be used in food crops producing major export commodities. Level 1 modules are required for all assessment areas to be included in the reconsideration, except for residues, where the number of crops or crop groups indicates that a level 2 assessment is appropriate. As the APVMA is not proposing to reconsider whether MCPA chemical products meet the efficacy criteria, no module applies for this area. Required modules and periods in months: A – not required B – 10.2 Special Data 2 – 7 months C – 11.1 – Finalisation 2 – 2 months D – 4 months E – not required J – 3 months X – not applicable (pending need to appoint an arbitrator under section 64) Calculated timeframe A + B + 2E + 3C + J + D + X = timeframe for completion 0 + 7 + 0 + 6 + 3 + 4 + 0 = 20 months
Notice of reconsideration	The APVMA sent Notice of Reconsideration to holders of product registrations as required by section 32(1) of the Agvet Code on 23 April 2010. The APVMA published a Notice of Reconsideration as allowed under section 32(2) of the Agvet Code in the APVMA Gazette on 27 April 2010. The reconsideration commenced on 29 May 2010. The APVMA will send additional section 32(1) Notices of Reconsideration to holders of product registrations and label approvals not captured in the original 2010 notice, on 24 November 2026 and publish the notice in the APVMA Gazette on 24 November 2026.
Assessment	Section 33(1) notices will be issued if required. The timing and type of information cannot be fully determined at this time, however, may include requests for any data not in APVMA holdings relevant to assessment of the risk posed by spray drift of MCPA to bystander areas, natural aquatic areas, pollinator areas, vegetation areas, livestock areas.
Proposed regulatory decision	The expected date on which a notice will be given under section 34AB of the Agvet Code is 24 January 2028. The notices are expected to be issued to holders and made available to other persons through publication in the APVMA Gazette.
Final regulatory decision	The expected date on which a decision will be made in relation to the reconsideration under section 34 of the Code is 24 October 2028.
