

APVMA Veterinary Medicines Working Group

Meeting summary – 10 June 2026

Introductions

The Chair conducted an Acknowledgement of Country.

Executive Director's update

The APVMA provided an update on current priorities and activities.

Members were advised of ongoing work to support industry, including improvements to guidance, processes and engagement. An upcoming industry workshop was also noted.

Active Constituents

The APVMA provided an overview of regulatory expectations for active constituents.

Members discussed recent clarifications and upcoming guidance to support applications and improve consistency.

Export Slaughter Intervals (ESIs)

An update was provided on work to address products without ESIs.

Members were advised that this work is at an early stage and will involve collaboration with external stakeholders.

Application Checklists

The APVMA introduced a proposal to develop self-assessment checklists for applicants.

Members discussed how the checklists could support application quality and provide feedback on the proposed approach.

Instruments and Regulatory Updates

The APVMA provided updates on current and planned work to review and update regulatory instruments and processes.

This includes work to improve clarity and ensure instruments remain fit for purpose, as well as clarification of requirements for certain product types and changes to application processes. Members were advised that consultation will occur where required and that some updates will take place over time.
