The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*.

GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

DISTRIBUTION AND SUBSCRIPTION

From February 2010, the APVMA will publish the *APVMA Gazette* in electronic format only. The *APVMA Gazette* and information about subscribing to the gazette alert service are available on the APVMA website, www.apvma.gov.au.

Copies of the *APVMA Gazette* from November 1999 until July 2009 will remain available from the APVMA website.

Reconsideration of Active Constituents, Registrations and Label Approvals Related to Dichlorvos

The APVMA, in accordance with Part 2, Division 4, of the Agvet Codes, has reconsidered all approvals of the active constituent dichlorvos, registrations of all products containing dichlorvos and the approvals of all associated product labels.

Dichlorvos is a volatile organophosphorus insecticide with fumigant and penetrant action. Dichlorvos is commonly used against a large variety of insects that infest domestic, public and commercial buildings, recreational areas, abattoirs, wineries (non-food producing areas), animal houses, mushroom growing facilities, glasshouses, greenhouses and food storage areas. The major use of dichlorvos is as a disinfestant fumigant/spray for stored grain and for grain handling equipment. There is one veterinary use as an oral paste for the treatment of worms and Bot fly larvae in horses. Other formulations include slow-release strips (e.g. pest-strips), sprays and fumigants. The field use of dichlorvos is limited to the control of leaf roller on avocados.

In December 1996 the Australian Pesticides and Veterinary Medicines Authority began a review of the insecticide dichlorvos because of specific concerns about its high acute toxicity and its carcinogenic potential. Dichlorvos active constituents, registrations of all products containing dichlorvos and the approvals of all associated product labels were placed under review.

In 2000 the Authority released its initial Preliminary Review Findings (PRF) for dichlorvos. A revised report for dichlorvos was published in June 2008 following assessment of a large package of toxicological and exposure studies that had become available after the release of the first PRF.

The APVMA has now completed the reconsideration of the active constituent dichlorvos, registrations of all products containing dichlorvos and the approvals of all associated product labels.

Following the finalisation of its reconsideration of dichlorvos, the APVMA is satisfied that active constituents of dichlorvos (listed in Table 1) meet the requirements for continued approval. As a result, the active constituent approvals for dichlorvos are affirmed.

Table 1: Active constituent approval for dichlorvos

Approval No.	Active Constituent Name	Approval Holder
44578	DICHLORVOS	NOVARTIS ANIMAL HEALTH AUSTRALASIA PTY. LIMITED
48353	DICHLORVOS	UNITED PHOSPHORUS LTD.
49486	DICHLORVOS	SARA LEE HOUSEHOLD & BODY CARE (AUSTRALIA) PTY LTD
56689	DICHLORVOS	AMVAC CHEMICAL UK LIMITED

The APVMA is not satisfied that the requirements for continued registration of products and approval of associated label are met. However the APVMA is satisfied that the label particulars can be varied in such a way that the products can be used without being likely to have an unintended effect that is harmful to animals, plants or thing, or to the environment. Accordingly, the APVMA has varied the labels particulars [s.34(5) of the Agvet Codes].

The APVMA is satisfied that the products listed in Table 2 carrying varied label particulars meet the prescribed requirements for continued registration. All of the other previously approved labels for these products (also listed in Table 2) have been cancelled (s.41 of the Agvet Codes) as they no longer contain adequate instructions for the safe use of the products.

64358	FARMALINX DICHLORVOS INSECTICIDE	FARMALINX PTY LTD	64358/0510	64358/0111

On this basis the APVMA is satisfied that continued registration of these products in accordance with their instructions for use would:

- not be an undue hazard to the safety of people exposed to it during its handling; and
- not be likely to have an effect that is harmful to human beings; and
- not be likely to have an unintended effect that is harmful to animals, plants or things or to the environment.
- not unduly prejudice trade or commerce between Australia and places outside Australia.

The APVMA is not satisfied that the registration of a particular product containing dichlorvos (Table 3) when used in accordance with the instructions for use would:

- not be an undue hazard to the safety of people exposed to it during its handling or people using anything containing its residues
- not be likely to have an effect that is harmful to human beings.

Accordingly, the registration of this product is no longer supported, and its associated label, as listed in Table 3, has been cancelled.

Application Summaries

The APVMA publishes complete application summaries on the APVMA website, www.apvma.gov.au. They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.
