GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

DISTRIBUTION AND SUBSCRIPTION

From February 2010, the APVMA will publish the *APVMA Gazette* in electronic format only. The *APVMA Gazette* and information about subscribing to the gazette alert service are available on the APVMA website, www.apvma.gov.au.

APVMA CONTACTS

For enquiries regarding the publishing and distribution of the *APVMA Gazette*, please email: communications@apvma.gov.au.

For enquiries on the *APVMA Gazette* content, please refer to the individual APVMA contacts listed under each notice.

OTHER NOTICES

Extension of Suspension of Product Registrations and Label Approvals for Products Containing Diuron

The APVMA has extended the suspension of the following registrations and label approvals of products containing diuron:

The suspensions are in effect from 23 November 2011 until 30 November 2012.

REASONS

The reasons for the suspension are:

The APVMA has decided that the continued use of, or other dealings with products containing diuron may have an unintended harmful effect on the environment. In addition, the APVMA has decided that the instructions on approved labels associated with products affected by this finding may no longer be adequate.

In July 2011, the APVMA published the toxicology component of the report prepared by the Office of Chemical Safety (OCS) and the environmental component report prepared by the Department of Sustainability, Environment, Water, Populations and Communities (DSEWPaC) in connection with the APVMA's review of diuron. Comments addressing these reports were invited by 30 September 2011.

The APVMA has formed the view that the use of diuron in certain circumstances may have an unintended harmful effect on the environment. As such, the APVMA has decided to suspend product registrations and the associated label approvals for each of the products listed below until its assessment of the environmental risks associated with continued use can be finalised.

INSTRUCTIONS

Subsections 45A(5) and 55(3) of the Agvet Code cease to apply in respect of the products identified in the tables below. During the period of suspension, a person may not possess, have custody of, use or deal with any of the products other than in accordance with:

- The instructions set out at the end of this Notice; and
- The permit issued by the APVMA for diuron (PER13198).

WARNING

Since 28 November 2011 a person may only possess, have custody of, use or otherwise deal with the products identified above in accordance with a permit issued by the APVMA PER13198 containing the instructions set out at the end of this Notice.

The APVMA may cancel the permit and issue a replacement permit at any time during the suspension period. Before using, supplying or otherwise dealing with products containing diuron, suppliers and users need to be satisfied that the instructions set out at the end of this Notice continue to apply, and that their activities are authorised by a permit. Current permits are available at <http://www.apvma.gov.au/permits/search.php>

Failure to comply with the instructions set out at the end of this Notice attracts a penalty under section 55(4) of the Agvet Code. The penalty is 300 penalty units (\$33,000).

It is also an offence to advertise or promote the use of the products during the period of suspension (other than for the purposes of advising users about the modified instructions for use).

INSTRUCTIONS FOR POSSESSING, HAVING CUSTODY OF, USING OR DEALING WITH SUSPENDED, PRODUCT, OR PRODUCT CONTAINING THE SUSPENDED LABEL

Possession and custody

A person may possess, have custody of, use or otherwise deal with the suspended diuron products (bearing a suspended label) only in accordance with these instructions or permit PER13198, issued by the APVMA.

Supply

All suppliers must at the time of the supply of a product covered by these instructions provide to the person taking responsibility for the supplied product:

- a copy of the relevant permit in full (currently PER 13198) setting out the conditions and instructions for use, and
- supply product with a copy of the instructions contained in the permit securely affixed to each container of product.

Use

PERSONS who wish to use suspended products containing diuron (as listed above) must read, or have read to them, the instructions included in the relevant APVMA permit. Users who have had the instructions read to them must confirm to the reader that they understand the instructions.

READ THESE INSTRUCTIONS before using or otherwise handling the product.

When using or otherwise handling the product, follow the instructions of the current label except as follows:

PROHIBITED CROP USES DURING SUSPENSION

The existing (suspended) label may include instructions for use in situations listed below. The use of diuron is no longer approved for these situations and the following restraints apply:

DO NOT USE in banana, coffee, paw paws, pineapples, sugarcane or tea between 5 December 2011 and 31 March 2012

DO NOT USE around agricultural buildings

DO NOT USE on right-of-way areas

DO NOT USE on driveways, paths, lanes, drains, ditches, fence lines, car parks, tennis courts

DO NOT USE in factory sites, commercial and industrial areas UNLESS the area is adequately bunded to retain any runoff

DO NOT USE in irrigation channels or drains UNLESS ALL irrigation tailwater and rainfall can be captured and held on farm

DO NOT USE in non-crop areas

TREE CROPS: Apply under trees only as a directed band spray over a maximum of 50% of the area

DIRECTIONS FOR USE

These directions for use must be used in conjunction with existing label directions and the restraint statements. Where the instructions in this notice are inconsistent with the label instructions, the instructions in this notice must be followed.

Restraints (All Crops):

DO NOT apply more than 1.8 kg ac/ha per year

DO NOT apply by air

DO NOT use in water-logged areas

DO NOT apply if greater than 50 mm rain fall is expected within 3 days of application

DO NOT irrigate within 3 days of application

DO NOT apply to fields where the slope exceeds 3%

DO NOT replant treated areas within 2 years of application of diuron except when otherwise stated on label

DO NOT use on very light sandy or gravelly soils as crop damage may occur

DO NOT apply within 20m of a down slope water body, unless a compliant minimum 5m wide effective vegetated treatment area (EVTA) between the edge of the down slope water body and any points where low flow runoff exits the inter-row furrows of the crop

DO NOT apply when there is non-target terrestrial vegetation within 130m downwind from the application area

Apply as a COARSE spray only

DO NOT spot spray greater than 5% of total farm area

These instructions apply to the following situations in which diuron can be used

Table 2 – diuron use situations

Crops	Suspension recommendation

Reconsideration of Active Constituents, Selected Registrations and Label Approvals Related to Diuron

The APVMA, in accordance with Part 2, Division 4, of the Agvet Codes, has reconsidered all approvals of the active constituent diuron, registrations of all products containing diuron and the approvals of all associated product labels.

Diuron is a broad-spectrum residual herbicide used in agriculture for pre- and post-emergent control of broadleaf and grass weeds. It was first registered in Australia in 1978.

The APVMA commenced its review of products containing diuron in 2002 due to concerns about the potential impact of diuron on the environment and to human health. Of particular concern was the impact of diuron use on aquatic ecosystems, including the Great Barrier Reef.

A Preliminary Review Findings (PRF) Report was released for public comment in July 2005. This report identified that for most uses specified on labels, there was the potential for diuron to result in adverse effects on aquatic species. A maximum rate of 0.9 kg ac/ha was proposed at this time.

Following the assessment of a significant amount of new data and information the 2005 environmental assessment component of the review report was substantially revised and published as the 2011 Report. The 2011 environmental assessment was very different from the 2005 PRF, utilising revised ecotoxicity endpoints, improved modelling, a greater use of monitoring data, and consideration of risks associated with all diuron uses in broadacre agriculture. The PRF focussed primarily on use in sugarcane. The 2011 environmental assessment report, as with the 2005 PRF, identified risks to aquatic environments from all uses of diuron. The 2011 report identified risks to primary and secondary streams based on adverse impacts on algae and aquatic plants, but not to the Great Barrier Reef.

The toxicology assessment prepared as part of the review was also published in 2011. This assessment identified that there were no concerns for public health with the continued approval of diuron active constituent.

On the 24 November 2011 the APVMA suspended the registrations and label approvals of certain registered diuron products. The suspension was put in place until 31 March 2012 during which time new information was to be assessed and a revised environmental assessment report prepared. New instructions for the use of diuron during the suspension period were issued via APVMA permits (PER13198 and PER13239).

This suspension did not affect antifouling paints, aquarium or pond products containing diuron.

The APVMA has now completed the reconsideration of the active constituent approvals of diuron, registrations of selected products containing diuron and the approvals of all associated product labels.

Following the finalisation of its reconsideration of diuron, the APVMA is satisfied that active constituents of diuron (listed in Table 1) meet the requirements for continued approval. As a result, the active constituent approvals for diuron are affirmed.

The APVMA is satisfied that the requirements for continued registration of selected antifouling paints, aquarium and pond products and approval of associated labels are met. On this basis the registration of these products and associated label approvals in Table 2 have been affirmed.

The APVMA has also cancelled all previously approved labels for these products (s.41 of the Agvet Codes) as they no longer contain adequate instructions for the safe use of the products. Cancelled labels are denoted with 'c' in Table 2 below. A two year period from the date of cancellation will apply for the phase out of products bearing a cancelled label.

NB: 'c' denotes label approvals cancelled as an outcome of the review

The APVMA is not satisfied that the requirements for continued registration of products and approvals of associated labels for products listed in Table 3 are met. However, the APVMA is satisfied that the label particulars can be varied in such a way that the products can be used without being likely to have an unintended effect that is harmful to animals, plants or things, or to the environment. Accordingly, the APVMA has varied the label particulars [s.34(5) of the Agvet Codes]. On this basis the APVMA is satisfied that continued registration of these products in accordance with their instructions for use would not be likely to have an unintended effect that is harmful to animals, plants or things or to the environment. The APVMA has affirmed the registration of these products.

The review is now considered complete for the active constituent approvals listed in Table 1, and the product registrations and label approvals listed in Tables 2 and 3.

The following active constituent approvals (Table 4) and product registrations (Table 5) occurred after the commencement of the diuron review in 2002. Continued approval and registration is subject to the outcomes of the review.

The APVMA has determined that there are no outcomes of the review relevant to these products and therefore no further action with respect to the diuron review is required. Continued approval and registration is supported

Reconsideration of the Registration of a Product Containing Diazinon Related to the Reconsideration of Diazinon

The APVMA, in accordance with Part 2, Division 4, of the Agvet Codes, intends to reconsider the registration of the product Eureka Gold OP Spray-on Off-Shears Sheep Lice Treatment (APVMA Approval Number 51290) containing diazinon, and the approvals of all associated product labels, as part of the APVMA review of diazinon.

In December 1996, the APVMA (formerly the NRA) began a review of diazinon because of the potential for diazinon to form highly toxic breakdown products and its potential to pose a risk to public health, occupational health and safety, the environment, animals, and Australia's trade.

The APVMA has now extended the scope of the diazinon review to include the registration of a product registered after the commencement of the review and its associated label approvals, as specified in Table 1.

Table 1: Product containing diazinon to be included in review of diazinon

Product No.	Product Name	Registrant	Label Approval No.
51290	Eureka Gold OP Spray-on Off-shears Sheep Lice Treatment	ZAGRO ANIMAL HEALTH PTE LTD	51290/1298 51290/0805 51290/0709

The basis for including this product in the review, at this stage, is the concern that the product is whether or not the continued use of, or any dealing with, the product in accordance with the recommendations for its use or for such dealing that the APVMA has approved may be an undue hazard to the safety of people exposed to it during its handling. This is in addition to the broad reasons for the APVMA's review of diazinon.

The APVMA's detailed reasons for the reconsideration of diazinon can be found on the APVMA website, www.apvma.gov.au.

Any person may provide relevant information to the APVMA with regard to this decision. Submissions specifically addressing the areas of concern relating to the reconsideration of the above-mentioned product and the concerns identified in the notice above must be in writing and should reach the APVMA by 27 April 2012.

Please note that subject to the *Freedom of Information Act 1982*, the *Privacy Act 1988* and the Agvet Codes all submissions received may be made publicly available. They may be listed or referred to in any papers or reports prepared on this subject matter.

Submissions should be addressed in writing to:

Variations to Standard 1.4.2 of the *Australia New Zealand Food Standards Code*

The APVMA has previously gazetted particular amendments which it had made to the APVMA *MRL Standard* and which have been proposed as variations to maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in Standard 1.4.2 - Maximum Residue Limits of the *Australia New Zealand Food Standards Code*. This notice pertains to proposals gazetted on 17 January 2012 (No. APVMA 1).

Submissions have been sought on these proposals and the APVMA has written separately to each person or organisation that made a submission. All matters raised in the submissions have been resolved.

Under subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*, the APVMA has, by legislative instrument, incorporated these variations to MRLs into Standard 1.4.2. A copy of the Amendment Instrument (No. APVMA 3, 2012) accompanies this notice. For a complete and up-to-date version of Standard 1.4.2, including these amendments together with their Explanatory Statement, please refer to the Federal Register of Legislative Instrument available on the Comlaw website at <http://www.comlaw.gov.au>.

Based on dietary exposure assessments and current health standards, the APVMA and FSANZ are satisfied that these MRLs are not harmful to public health. MRLs contained in Standard 1.4.2 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Standard 1.4.2 permits the sale of treated foods and protects public health by minimising residues in foods consistent with the effective control of pests and diseases.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) made Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO) in relation to these variations and no comment was received in response to that notice.

A copy of these variations have been given to FSANZ.

The variations take effect as from the date of this notice.

This notice is published in accordance with subsection 82(7) of the *Food Standards Australia New Zealand Act 1991*.

Australia New Zealand
Food Standards Code —
Standard 1.4.2 — Maximum Residue Limits
Amendment Instrument No. APVMA 3, 2012

I, Rajumati Bhula, Program Manager, Pesticides Program and delegate of the Australian Pesticides and Veterinary Medicines Authority, acting in accordance with my powers under subsection 11(1) of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*, make this instrument for the purposes of subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*.

Rajumati Bhula
Program Manager
Pesticides Program

Dated this twenty-first day of March 2012

Part 1 Preliminary

1 Name of Instrument

This Instrument is the *Australia New Zealand Food Standards Code — Standard 1.4.2 — Maximum Residue Limits Amendment Instrument No. APVMA 3, 2012*.

2 Commencement

Pursuant to subsection 82(8) of the *Food Standards Australia New Zealand Act 1991*, this Amendment Instrument commences on the day a copy of it is published in the *Gazette*.

Note: A copy of the variations made by the Amendment Instrument was published in the Commonwealth of Australia *Agricultural and Veterinary Chemicals Gazette* No. APVMA 6 of 27 March 2012.

3 Object

The object of this Instrument is for the APVMA to make variations to Standard 1.4.2 — Maximum Residue Limits of the *Australia New Zealand Food Standards Code* to include or change maximum residue limits pertaining to agricultural and veterinary chemical products.

4 Interpretation

In this Instrument: —

APVMA means the Australian Pesticides and Veterinary Medicines Authority established by section 6 of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*; and

Principal Instrument means Standard 1.4.2 — Maximum Residue Limits of the *Australia New Zealand Food Standard Code* as defined in Section 4 of the *Food Standards Australia New Zealand Act 1991* being the code published in *Gazette* No. P 27 on 27 August 1987 together with any amendments of the standards in that code. The whole of the *Australia New Zealand Food Standard Code* (including Standard 1.4.2) was further published in *Gazette* P 30 of 20 December 2000¹.

Part 2 Variations to Standard 1.4.2 — Maximum Residue Limits

5 Variations to Standard 1.4.2

The Schedule to this Instrument sets out the variations made to the Principal Instrument by this Amendment Instrument.

¹ Note An amendment history from 20 December 2000 appears at the beginning of the *Australia New Zealand Food Standard Code*.

Schedule

Variations to Standard 1.4.2 — Maximum Residue Limits

1 Variations

(1) The Principal Instrument is varied by:

(a) omitting from Schedule 1 all entries for the following chemicals –

Bupivacaine
 Cetrimide
 Lignocaine

(b) inserting in Schedule 1 –

Saflufenacil	
<i>Commodities of plant origin:</i> Sum of saflufenacil, <i>N'</i> -{2-chloro-4-fluoro-5-[1,2,3,6-tetrahydro-2,6-dioxo-4-(trifluoromethyl)pyrimidin-1-yl]benzoyl- <i>N</i> -isopropyl sulfamide and <i>N</i> -[4-chloro-2-fluoro-5-(((isopropylamino)sulfonyl)amino)carbonyl]phenyl]urea, expressed as saflufenacil equivalents	
<i>Commodities of animal origin:</i> Saflufenacil	
Cereal grains	*0.03
Citrus fruits	*0.03
Edible offal (mammalian)	*0.01
Eggs	*0.01
Grapes	*0.03
Legume vegetables	*0.03
Meat (mammalian)	*0.01
Milks	*0.01
Oilseed	*0.03
Pome fruits	*0.03
Poultry, edible offal of	*0.01
Poultry meat	*0.01
Pulses	*0.03
Stone fruits	*0.03
Tree nuts	*0.03

(c) inserting in alphabetical order in Schedule 1, the foods and associated MRLs for each of the following chemicals –

Chlorantraniliprole	
<i>Plant commodities and animal commodities other than milk:</i> Chlorantraniliprole	
<i>Milk:</i> Sum of chlorantraniliprole, 3-bromo- <i>N</i> -[4-chloro-2-(hydroxymethyl)-6-[(methylamino)carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1 <i>H</i> -pyrazole-5-carboxamide, and 3-bromo- <i>N</i> -[4-chloro-2-(hydroxymethyl)-6-[[[(hydroxymethyl)amino]carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1 <i>H</i> -pyrazole-5-carboxamide, expressed as chlorantraniliprole	
Almonds	T0.05
Pistachio nut	T0.05
Clothianidin	
Clothianidin	
Maize	T*0.01
Rape seed (canola)	T*0.01
Sorghum	T*0.01
Sunflower seed	T*0.01
Sweet corn (corn-on-the-cob)	T*0.01
Sethoxydim	
Sum of sethoxydim and metabolites containing the 5-(2-ethylthiopropyl)cyclohexene-3-one and 5-(2-ethylthiopropyl)-5-hydroxycyclohexene-3-one moieties and their sulfoxides and sulfones, expressed as sethoxydim	
Brassica leafy vegetables	T2
Chicory leaves	T2
Onion, Welsh	0.7
Radicchio	T2
Shallot	0.7

(d) omitting from Schedule 1, under the entries for the following chemicals, the maximum residue limit for the food, substituting –

Sethoxydim	
Sum of sethoxydim and metabolites containing the 5-(2-ethylthiopropyl)cyclohexene-3-one and 5-(2-ethylthiopropyl)-5-hydroxycyclohexene-3-one moieties and their sulfoxides and sulfones, expressed as sethoxydim	
Endive	T2
Leek	0.7
Rucola (rocket)	T2
Spring onion	0.7

Application Summaries

The APVMA publishes complete application summaries on the APVMA website, www.apvma.gov.au. They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.
