**Australian Pesticides and
Veterinary Medicines Authority**

The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*.

Kingston ACT 2604

Email: communications@apvma.gov.au

Website: www.apvma.gov.au

GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

DISTRIBUTION AND SUBSCRIPTION

From February 2010, the APVMA will publish the *APVMA Gazette* in electronic format only. The *APVMA Gazette* and information about subscribing to the gazette alert service are available on the APVMA website, www.apvma.gov.au.

Copies of the *APVMA Gazette* from November 1999 until July 2009 will remain available from the APVMA website.

APVMA CONTACTS

For enquiries regarding the publishing and distribution of the *APVMA Gazette*: Telephone: +61 2 6210 4870

For enquiries on the *APVMA Gazette* content, please refer to the individual APVMA contacts listed under each notice.

NOTICE OF REGISTRATIONS

Agricultural Chemical Products

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has registered or varied the registration in respect of the following products, with effect from the dates shown.

1. AGRICULTURAL PRODUCTS BASED ON EXISTING ACTIVE CONSTITUENTS

Product Name:	Gateway 500 Selective Herbicide
Active Constituent/s:	500g/L MCPA present as the dimethylamine salt
Applicant Name:	Hextar Chemicals Pty Ltd
Applicant ACN:	114 525 709
Summary of Use:	For the selective control of broadleaf weeds in cereals, linseed, pastures, sugarcane and turf
Date of Registration:	29 May 2012
Label Approval No:	67505/56218

Product Name:	Farmoz Trident Herbicide
Active Constituent/s:	800g/kg flumetsulam
Applicant Name:	Farmoz Pty Ltd
Applicant ACN:	050 328 973
Summary of Use:	For the control of broadleaf weeds in a range of situations
Date of Registration:	30 May 2012
Label Approval No:	67441/56044

Product Name:	Apparent Glyphosate 700 SG Herbicide
Active Constituent/s:	700g/kg glyphosate present as the mono-ammonium salt
Applicant Name:	Apparent Pty. Ltd.
Applicant ACN:	143 724 136
Summary of Use:	For the non-selective herbicide control of many annual and perennial weeds in certain situations
Date of Registration:	30 May 2012
Label Approval No:	67110/55239

Product Name:	Crop Culture Metsol 600 WG Herbicide
Active Constituent/s:	600g/kg metsulfuron-methyl
Applicant Name:	Crop Culture Pty Ltd
Applicant ACN:	142 860 473
Summary of Use:	For the control of brush and broadleaf weeds in native pastures, rights of way, commercial and industrial areas and for the control of certain broadleaf weeds in winter cereal crops
Date of Registration:	31 May 2012
Label Approval No:	67482/56161

Product Name:	Taurus Residual Termiticide
Active Constituent/s:	100g/L fipronil
Applicant Name:	Farmoz Pty Limited
Applicant ACN:	050 328 973
Summary of Use:	For the protection of structures from subterranean termite damage
Date of Registration:	31 May 2012
Label Approval No:	67463/56083

Product Name:	Sabakem Bifenthrin 100EC Insecticide/Miticide
Active Constituent/s:	100g/L bifenthrin
Applicant Name:	Sabakem Pty Ltd
Applicant ACN:	151 682 138
Summary of Use:	For control of a range of insects in cotton, tomatoes, canola, wheat, barley, sugarcane, seed crops, navy beans, faba beans, field peas, lupins, lucerne, subterranean clover, stone fruit, citrus, pears and bananas
Date of Registration:	31 May 2012
Label Approval No:	67468/56104

Product Name:	Antec Ambicide Multipurpose Biocide
Active Constituent/s:	72.75 g/L n,n-bis-(3-aminopropyl)-dodecylamine, 118.94 g/L didecyldimethyl ammonium chloride
Applicant Name:	Lienert Australia Pty. Ltd.
Applicant ACN:	008 293 007
Summary of Use:	For the control of fungal and bacterial pathogens in animal accommodation, hatcheries (including egg dipping), hatchery equipment and areas used for processing of animal feeds
Date of Registration:	1 June 2012
Label Approval No:	53720/22468

Product Name:	Resolva Organic Sulphur Fungicide/Miticide
Active Constituent/s:	800g/kg sulphur
Applicant Name:	Syngenta Crop Protection Pty Limited
Applicant ACN:	002 933 717
Summary of Use:	For the control of mites, rust, powdery mildew and other fungal diseases of ornamentals, fruit and vegetables in the home and garden
Date of Registration:	4 June 2012
Label Approval No:	67303/55724

Product Name:	Resolva All-In-One Bug And Fungus Killer With TMX Plantguard For Your Tomatoes
Active Constituent/s:	0.015g/L abamectin, 0.100g/L thiamethoxam, 0.167g/L difenoconazole
Applicant Name:	Syngenta Crop Protection Pty Limited
Applicant ACN:	002 933 717
Summary of Use:	For control of various insect and disease pests on tomatoes in the home garden
Date of Registration:	5 June 2012
Label Approval No:	66550/53854

Product Name:	FMC Paraquat + Diquat Herbicide
Active Constituent/s:	115g/L diquat present as diquat dibromide, 135g/L paraquat present as paraquat dichloride
Applicant Name:	FMC Australasia Pty Ltd
Applicant ACN:	095 326 891
Summary of Use:	For the control of a wide range of grasses and broadleaf weeds
Date of Registration:	6 June 2012
Label Approval No:	67562/56356

Product Name:	4Farmers Rat And Mouse Bait Pellets
Active Constituent/s:	0.05g/kg brodifacoum
Applicant Name:	4Farmers Pty Ltd
Applicant ACN:	067 443 485
Summary of Use:	For the control of mice and rats
Date of Registration:	7 June 2012
Label Approval No:	65423/50888

Product Name:	Propihex 250 EC Fungicide
Active Constituent/s:	250g/L propiconazole
Applicant Name:	Hextar Chemicals Pty Ltd
Applicant ACN:	114 525 709
Summary of Use:	For the control of certain fungal diseases of bananas, oats, peanuts, perennial ryegrass, pineapples, stone fruit, sugar cane, wheat and other crops
Date of Registration:	8 June 2012
Label Approval No:	67506/56219

Product Name:	FMC Diflufenican + MCPA Herbicide
Active Constituent/s:	25g/L diflufenican, 250g/L MCPA present as the ethyl hexyl ester
Applicant Name:	FMC Australasia Pty Ltd
Applicant ACN:	095 326 891
Summary of Use:	For the control of certain broadleaf weeds in winter cereals and clover
Date of Registration:	8 June 2012
Label Approval No:	67558/56352

Product Name:	Buzzin 750 WG Herbicide
Active Constituent/s:	750g/kg metribuzin
Applicant Name:	Hextar Chemicals Pty Ltd
Applicant ACN:	114 525 709
Summary of Use:	For selective weed control in cereals, pastures and other crops including vegetables
Date of Registration:	8 June 2012
Label Approval No:	66613/53995

Product Name:	Surefire Mosquito & Midge Slayer
Active Constituent/s:	100g/L bifenthrin
Applicant Name:	PCT Holdings Pty Ltd
Applicant ACN:	099 023 962
Summary of Use:	For the control of mosquitoes in areas around buildings and structures
Date of Registration:	12 June 2012
Label Approval No:	67430/56023

Product Name:	FMC Paraquat 250 Herbicide
Active Constituent/s:	250g/L paraquat present as paraquat dichloride
Applicant Name:	FMC Australasia Pty Ltd
Applicant ACN:	095 326 891
Summary of Use:	For the control of a wide range of grasses and broadleaf weeds
Date of Registration:	12 June 2012
Label Approval No:	67563/56357

Product Name:	FMC 2,4-D Amine 625 Herbicide
Active Constituent/s:	625g/L 2,4-D present as the dimethylamine and diethanolamine salts
Applicant Name:	FMC Australasia Pty Ltd
Applicant ACN:	095 326891
Summary of Use:	For the control of broadleaf weeds in fallow before direct drilling or sowing of cereals and pastures, and in cereal crops, pastures, sugarcane, peanuts and non-agricultural areas
Date of Registration:	12 June 2012
Label Approval No:	67557/56351

Product Name:	Agroquat 250 Herbicide
Active Constituent/s:	250g/L paraquat present as paraquat dichloride
Applicant Name:	Agrogill Chemicals Pty Ltd
Applicant ACN:	094 672 107
Summary of Use:	For the control of a wide range of grasses and broadleaf weeds
Date of Registration:	12 June 2012
Label Approval No:	67437/56038

Product Name:	Barmac Javelin Selective Herbicide
Active Constituent/s:	15g/L diflufenican, 300g/L MCPA present as the potassium salt, 20g/L clopyralid present as the potassium salt
Applicant Name:	Barmac Pty Ltd
Applicant ACN:	009 674 953
Summary of Use:	For the control of certain broadleaf weeds in turf
Date of Registration:	13 June 2012
Label Approval No:	67539/56326

2. VARIATIONS

Product Name:	Mortein Kill & Protect Surface Spray Crawling Insect Killer High Performance
Applicant Name:	Reckitt Benckiser (Australia) Pty Limited
Applicant ACN:	003 274 655
Summary of Variation:	To change the product name from 'MORTEIN KILL & PROTECT CRAWLING INSECT KILLER HIGH PERFORMANCE' to 'MORTEIN KILL & PROTECT SURFACE SPRAY CRAWLING INSECT KILLER HIGH PERFORMANCE'
Date of Variation:	30 May 2012
Label Approval No:	54192/56780

Product Name:	Nufarm Comet 400 Herbicide
Applicant Name:	Nufarm Australia Limited
Applicant ACN:	004 377 780
Summary of Variation:	To approved label to amend the signal heading
Date of Variation:	31 May 2012
Label Approval No:	61667/56790

Product Name:	Mortein Kill & Protect Surface Spray Crawling Insect Killer Odourless
Applicant Name:	Reckitt Benckiser (Australia) Pty Limited
Applicant ACN:	003 274 655
Summary of Variation:	To change the product name from 'MORTEIN KILL & PROTECT CRAWLING INSECT KILLER ODOURLESS' to 'MORTEIN KILL & PROTECT SURFACE SPRAY CRAWLING INSECT KILLER ODOURLESS'
Date of Variation:	1 June 2012
Label Approval No:	54626/56765

Product Name:	Barricade Turf Herbicide
Applicant Name:	Syngenta Crop Protection Pty Limited
Applicant ACN:	002 933 717
Summary of Variation:	To extend use to include control of african lovegrass, bahia grass, barnyard grass, kentucky blue grass, parramatta grass, paspalum and rat's tail fescue in established turf
Date of Variation:	8 June 2012
Label Approval No:	62982/55545

Product Name:	Bioguard Spa Symmetry Bromine Sanitiser Tablets
Applicant Name:	Biolab Australia Pty Ltd
Applicant ACN:	005 878 017
Summary of Variation:	To change the product name from 'BIOGUARD SPA SYMMETRY SANITISER TABLETS' to 'BIOGUARD SPA SYMMETRY BROMINE SANITISER TABLETS'
Date of Variation:	12 June 2012
Label Approval No:	62107/56737

Veterinary Chemical Products

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has registered or varied the registration in respect of the following products, with effect from the dates shown.

3. VARIATIONS

Product Name:	Hill's Prescription Diet C/D Canine Urinary Tract Health
Applicant Name:	Hill's Pet Nutrition Pty Limited
Applicant ACN:	003 954 550
Summary of Variation:	To change the product name from 'HILL'S PRESCRIPTION DIET C/D CANINE' to 'HILL'S PRESCRIPTION DIET C/D CANINE URINARY TRACT HEALTH' and variation to label approval
Date of Variation:	12 June 2012
Label Approval No:	36474/370g/1210

Product Name:	Sensitivity Control SC 24 Blue Whiting & Tapioca Canine
Applicant Name:	Royal Canin Australia Pty Ltd
Applicant ACN:	092 020 178
Summary of Variation:	To change the product name from 'SENSITIVITY CONTROL SC 24' to 'SENSITIVITY CONTROL SC 24 BLUE WHITING & TAPIOCA CANINE' and variation to label approval
Date of Variation:	12 June 2012
Label Approval No:	58583/1.5kg/0209, 58583/6.5kg/0209, 58583/14kg/0209

Product Name:	Vytrate Scour Treatment
Applicant Name:	Jurox Pty Limited
Applicant ACN:	000 932 230
Summary of Variation:	To change the product name from 'VY'TRATE CALF AND PIG SCOUR TREATMENT' to 'VYTRATE SCOUR TREATMENT'
Date of Variation:	12 June 2012
Label Approval No:	35892/54870

Product Name:	Joseph Lyddy Y-Itch Animal Insecticide Bactericide Lotion
Applicant Name:	Waproo Proprietary Limited
Applicant ACN:	004 520 254
Summary of Variation:	To change the product name from 'JOSEPH LYDDY Y-ITCH ANIMAL INSECTICIDE BACTERICIDE' to 'JOSEPH LYDDY Y-ITCH ANIMAL INSECTICIDE BACTERICIDE LOTION', and update safety directions and first aid instructions as a result of the review of carbaryl
Date of Variation:	12 June 2012
Label Approval No:	40145/50837

Product Name:	Beaphar Multi-Wormer For Dogs, Cats, Puppies And Kittens
Applicant Name:	Beaphar Australia Pty Ltd
Applicant ACN:	145 418 882
Summary of Variation:	To change the name of the product from 'ARISTOPET WORM-ENDA MULTI-WORMER FOR DOGS, CATS, PUPPIES AND KITTENS' to 'BEAPHAR MULTI-WORMER FOR DOGS, CATS, PUPPIES AND KITTENS'
Date of Variation:	13 June 2012
Label Approval No:	49683/55616

OTHER NOTICES

Exemption for the possession and supply of Vet's All Natural Shark Cartilage Powder and Vet's All Natural Joint Formula

Exemption for the purposes of Sections 75 and 78 of the *Agricultural and Veterinary Chemicals Code Act 1994* (Agvet Code): Vet's All Natural Pty Ltd

The APVMA has granted exemptions for the purposes of sections 75 (1)(b) and 78 (1)(b) of the Agvet Code for the following Vet's All Natural Products:

- **Vet's All Natural Shark Cartilage Powder in 200 gram and 1 kg containers; and**
- **Vet's All Natural Joint Formula in 500 gram, 1 kg, 3 kg and 15 kg containers**

The conditions of the exemptions are as follows:

Vet's All Natural Shark Cartilage Powder in 200 gram and 1 kg containers

- This exemption is granted for the period 12 June 2012 to 12 July 2012; and
- This means that even though this exempted product is a veterinary chemical product under the Agvet Codes, it is not an offence to possess them for the purposes of supply or to supply them; and
- This exemption applies to stocks of the product in 200 gram and 1 kg containers supplied by Vet's All Natural to any other person whether it be directly or indirectly through distributors, during the period of this exemption.

Vet's All Natural Joint Formula in 500 gram, 1 kg, 3 kg and 15 kg containers

- This exemption is granted for the period 12 June 2012 to 12 July 2012; and
- This means that even though this exempted product is a veterinary chemical product under the Agvet Codes, it is not an offence to possess them for the purposes of supply or to supply them; and
- This exemption applies to stocks of the product in 500 gram, 1 kg, 3 kg and 15 kg containers supplied by Vet's All Natural to any other person whether it be directly or indirectly through distributors, during the period of this exemption.

These exemptions in no way should be construed as implying that the APVMA has either assessed or supports the claims made by Vet's All Natural about these products.

These exemptions may be cancelled at any time by the APVMA.

The reason for granting these temporary exemptions is a result of compliance action by the APVMA and the company entering into a compliance undertaking to ensure sustained compliance with the Agvet code.

Suspension of 2,4-D Ethyl Ester and 2,4-D Isobutyl Ester Active Constituent Approvals and Registration of Products containing 2,4-D Isobutyl Ester

The APVMA has suspended the active constituent approvals of 2,4-D ethyl ester and 2,4-D isobutyl ester as listed in Table 1, and the registration of products containing 2,4-D isobutyl ester as listed in Table 2 of this notice.

Table 1: Affected active constituent approvals for 2,4-D ethyl ester and 2,4-D isobutyl ester

Approval No.	Active Constituent Name	Approval Holder
51653	2,4-D ETHYL ESTER	RUNGE AGRICHEMS PTY LTD
52298	2,4-D ISOBUTYL ESTER	RUNGE AGRICHEMS PTY LTD

Table 2: Registered products containing 2,4-D isobutyl ester

Product No.	Product Name	Registrant
51815	SUMMIT SUM-ESTER 800 L HERBICIDE	SUMMIT AGRO AUSTRALIA PTY LTD
52322	SIPCAM SIESTER 800 HERBICIDE	SIPCAM PACIFIC AUSTRALIA PTY LTD
52591	4FARMERS 2,4-D ESTER 800 HERBICIDE	4 FARMERS PTY LTD
53169	DISTRIBUTION 2,4-D ESTER 800 HERBICIDE	GROW CHOICE PTY LIMITED
54595	HALLEY 2,4-D ESTER 800 HERBICIDE	HALLEY INTERNATIONAL ENTERPRISE (AUSTRALIA) PTY LTD
54954	KENSO AGCARE KEN-ESTER 800 HERBICIDE	KENSO CORPORATION (M) SDN. BHD.
55079	WSD 2,4-D ESTER 800 HERBICIDE	REBOP HOLDINGS PTY LTD T/A WESTERN STOCK DISTRIBUTORS
56895	ROTAM 2,4-D ESTER 800 HERBICIDE	ROTAM AUSTRALASIA PTY LTD
59215	ARM 2,4-D ESTER 800 HERBICIDE	AUSTRALIAN RURAL MARKETING PTY LTD
59653	GENFARM 2,4-D ESTER 800 EC HERBICIDE	GENFARM CROP PROTECTION PTY LTD

The suspension is in effect from 5 June 2012 until 10 August 2012.

The reason for the suspension¹ of the active constituent approvals listed in Table 1 [under Section 37(1)(b) Agricultural and Veterinary Chemicals Code Act 1994 (Agvet Code)] arises from the fact that the abovementioned active constituent approval holder failed to give information, or results of trials or experiments to the APVMA in response to the APVMA's Section 33 notices of 1 September 2006 and 12 November 2007.

¹ These actions form part of the review ("reconsideration") of 2,4-D active constituent approvals, product registrations and associated label approvals. Approvals and registrations granted after the commencement of the review in 2003 are subject to the outcomes of the current review of 2,4-D as notified in the July 2003 gazette (page 42) and stated in the conditions of registration.

The APVMA has also suspended all registrations of products containing 2,4-D isobutyl ester as a consequence of the suspension of all approved sources of the active constituent of 2,4-D isobutyl ester². Section 44(1) of the Agvet Codes states that if the APVMA suspends or cancels the only approval, or all the approvals, of an active constituent for an existing chemical product, it must also suspend the registration of any product containing that active constituent. Therefore, the APVMA has suspended the registrations of all products containing 2,4-D isobutyl ester (Table 2).

Please note that this suspension does not affect registrations of products containing 2,4-D ethyl ester as there remains an approved source of the active constituent 2,4-D ethyl ester.

Please note that in giving effect to the interrelated suspension of product registrations listed in Table 2, the APVMA has revoked a previous suspension pertaining to these registrations; the previous suspension, and reasons for the suspension, are detailed in the APVMA Gazette dated 1 February 2012. This process is an administrative step and does not indicate the concerns underpinning the 1 February 2012 suspension have been addressed for products containing 2,4-D isobutyl ester. The environmental concerns posed by the use of 2,4-D high volatile esters still apply. The suspension has only been revoked for the products listed in Table 2 and the suspension of 1 February 2012 still applies to products containing 2,4-D butyl ester and 2,4-D ethyl ester.

If, for any reason the APVMA revokes this suspension, the APVMA will consider reinstating the 1 February 2012 suspension for product registrations because of remaining environmental concerns.

The APVMA has issued the following instructions for using or dealing with suspended active constituents or product containing 2,4-D isobutyl ester. Please note that the instructions for suspended products are similar to those imposed for the 1 February 2012 suspension.

INSTRUCTIONS FOR POSSESSING, HAVING CUSTODY OF, USING OR OTHERWISE DEALING WITH THE SUSPENDED ACTIVE CONSTITUENTS AND DEALING WITH PRODUCTS CONTAINING SUSPENDED ACTIVE CONSTITUENT 2,4-D ISOBUTYL ESTER PURSUANT TO SECTION 45A OF THE AGVET CODE

POSSESSION AND CUSTODY

Possession and custody of existing stocks of suspended active constituents is permitted during the course of the suspension.

SUPPLY

No supply of the suspended active constituents is permitted after 5 June 2012.

USE

Existing stocks of suspended active constituents may be used to manufacture product during the course of the suspension.

Other than as specified in this notice, the suspended products (as specified in Table 2) must be used in accordance with the instructions on the label attached to the container. Where the instructions contained within this notice are inconsistent with the label instructions, the instructions in this notice must be followed.

Subsections 45A(5) and 55(3) cease to apply in respect of the suspended active constituent approvals 2,4-D ethyl ester and 2,4-D isobutyl ester and product registrations containing 2,4-D isobutyl ester. A person may not possess, have custody of, use or otherwise deal with the suspended active constituents except in accordance with these instructions.

² The APVMA has already taken suspension action in relation to certain 2,4-D isobutyl ester active constituent approvals, refer to Gazette notice of 14 February 2012.

In regard to product registrations, during the period of suspension, a person may not possess, have custody of, use or deal with any of the products other than in accordance with:

- the instructions set out in Attachment 1 of this notice
- permit PER13339 issued by the APVMA.

Permit PER13339, with modified instructions for use, has been issued under section 114 of the Agvet Code.

WARNING

These actives are not approved and products are unregistered during the period of suspension. A person must not possess with the intent to supply, or otherwise deal with the suspended active constituents or suspended products containing 2,4-D isobutyl ester during this period, except in accordance with the instructions contained in this notice or in permit PER13339. A failure to comply with the instructions will result in an offence against the Agvet Codes and the APVMA will take appropriate compliance action. It is an offence for any person to possess with the intent to supply an active constituent after the date of its suspension.

From 5 June 2012, a person may only possess, have custody of, use or otherwise deal with the products identified in Table 2 in accordance with permit PER13339 issued by the APVMA and the instructions set out at the end of this notice (see Attachment 1).

Depending on further information that may be received and assessed for the ongoing review of 2,4-D products, the APVMA may cancel any permit and issue a replacement permit at any time prior to the expiry dates on the permit PER13339. Before using, supplying or otherwise dealing with products containing 2,4-D isobutyl ester, suppliers and users need to be satisfied that the instructions set out at the end of this notice continue to apply, and that their activities are authorised by a permit. The current permit is available at <http://www.apvma.gov.au/permits/search.php>.

Failure to comply with the instructions set out at the end of this notice attracts a penalty under section 55(4) of the Agvet Code.

It is also an offence to advertise or promote the use of the products during the period of suspension (other than for the purposes of advising users about the modified instructions for use).

ATTACHMENT

ATTACHMENT 1: The APVMA has issued instructions for using or dealing with suspended products.

Attachment 1: Instructions for possessing, having custody of, using, or dealing with suspended products containing 2,4-D isobutyl ester.

Possession and custody

A person may possess, have custody of, use, or otherwise deal with the suspended products as listed in Table 2 of this notice **only** in accordance with these instructions.

Supply

Product may only be supplied, if it contains or was manufactured from existing stocks of the suspended active constituent 2,4-D isobutyl ester supplied before 5 June 2012. A copy of the instructions contained in this notice must be securely affixed to the container.

Use

These instructions apply to the use of products containing 2,4-D isobutyl ester during the period of suspension in all states and territories.

READ THESE INSTRUCTIONS before using or otherwise handling the product.

When using or otherwise handling the product, follow these instructions.

Other than as specified below, the products must be used in accordance with the instructions on the label attached to the container. Where the below instructions are inconsistent with the label instructions, the instructions in this notice (below) must be followed.

In all states and territories the following information is the **DIRECTIONS FOR USE: For products containing 2,4-D isobutyl ester**.

RESTRAINTS:

This is a PHENOXY HERBICIDE that can cause severe damage to native vegetation and susceptible crops such as cotton, grapes, tomatoes, oilseed crops and ornamentals.

DO NOT apply this product between **1 September and 30 April, unless authorised by an APVMA permit**. Use only within the WINTER SPRAY WINDOW between **1 May and 31 August** (see below).

DO NOT apply this product by air.

DO NOT apply this product

- in aquatic situations
- to sugar cane
- to rights of way
- as a harvest aid/salvage spray

DO NOT apply more than 800 g acid equivalent/hectare (1 litre of this product per hectare)

DO NOT apply if crop or weeds are stressed due to dry or excessively moist conditions.

DO NOT use unless wind speed is more than 3 kilometres per hour and less than 15 kilometres per hour as measured at the application site.

DO NOT apply with smaller than COARSE spray droplets according to the ASAE S572 definition for standard nozzles.

DO NOT use if rain is likely within 6 hours.

DIRECTIONS FOR USE—FIELD CROPS AND PASTURES

Situation & Crop	Weeds	State	Rate	WHP (days)	Critical Comments
Wheat, Barley	Refer Weed Table*	Vic only	180-700mL/ha	7	CROP STAGES: ALL CEREALS Apply at tillered to boot stages. (Vic only) (DC 30-39) Apply when the first node can be felt at the base of the tiller and before swelling of the head can be felt in a tiller. (NSW only) Apply from mid-tillering to before boot stage. (Qld only) Apply from completion of tillering to early jointing stage. (SA only) Apply from the 5 leaf stage up to jointing stage (Zadoks 15-33). Apply only at 6 leaf stage for cranbrook and jacup wheats (Zadoks 16) to avoid possible damage (WA only).
		Qld, NSW only	350-700mL/ha		
		SA only	200-700mL/ha		
		WA only	700mL/ha		
Triticale	Refer Weed Table*	Qld, NSW only	350-700mL/ha	7	CROP STAGES: ALL CEREALS Apply at tillered to boot stages. (Vic only) (DC 30-39) Apply when the first node can be felt at the base of the tiller and before swelling of the head can be felt in a tiller. (NSW only) Apply from mid-tillering to before boot stage. (Qld only) Apply from completion of tillering to early jointing stage. (SA only) Apply from the 5 leaf stage up to jointing stage (Zadoks 15-33). Apply only at 6 leaf stage for cranbrook and jacup wheats (Zadoks 16) to avoid possible damage (WA only).
		SA only	200-700mL/ha		
		Vic, NSW only	180-700mL/ha		
Cereal Rye	Refer Weed Table*	Qld, NSW only	350-700mL/ha	7	CROP STAGES: ALL CEREALS Apply at tillered to boot stages. (Vic only) (DC 30-39) Apply when the first node can be felt at the base of the tiller and before swelling of the head can be felt in a tiller. (NSW only) Apply from mid-tillering to before boot stage. (Qld only) Apply from completion of tillering to early jointing stage. (SA only) Apply from the 5 leaf stage up to jointing stage (Zadoks 15-33). Apply only at 6 leaf stage for cranbrook and jacup wheats (Zadoks 16) to avoid possible damage (WA only).
		Vic only	180-700mL/ha		
Pastures— Direct Drilling or Surface Sowing	Charlock, Clover, Medics, Mustards, Paterson's Curse, Saffron, Slender, Variegated and Spear Thistles, Turnip Weed, Wild Radish, Wild Turnip, Capeweed, Wireweed, Storksbill / Erodium, Flatweed, Horehound (seedlings), Skeleton Weed, Nodding or Star Thistles	Qld, WA, Vic NSW only	700mL-1L/ha	7	Apply to young, actively growing weeds. SOWING: Do not sow pasture seeds for at least 21 days after application. If soil moisture is dry, delay sowing for at least 30 days.
	All of the above plus grasses		As above plus other herbicide such as glyphosate		
Improved Pasture containing Clover	Refer Weed Table*	Qld, NSW, SA only	350-700mL/ha	7	Clover must be well covered by the grass or extensive damage may result.

Situation & Crop	Weeds	State	Rate	WHP (days)	Critical Comments
Pastures— non legumes,	Refer Weed Table* NOTE: the following weeds may not be controlled at these rates Apple of Sodom, Black Knapweed, Buffalo Burr, Colocynth, Galvanised Burr, Hard Head / Russian Knapweed, Nut Grass, St Johns Wort, Sand Mustard /Sand Rocket, Silverleaf Nightshade, Thistle (Golden, Nodding, Soldier, Stemless), Wild Sage, Wild Teasel	Qld, Vic, NSW, SA, WA only	700mL-1L/ha		Control of most perennial weeds, but due to the rooting habits of most species control may take a number of years. Damage may result to legumes in pasture.

*Refer to Weed Table as per product label. Where weeds are to be sprayed in a crop or pasture, use only the rate given for the particular crop or situation indicated under the Directions for Use table in this notice.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THESE INSTRUCTIONS UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

WITHHOLDING PERIOD: PASTURE, CEREAL CROPS—DO NOT GRAZE OR CUT FOR STOCK FOOD FOR 7 DAYS AFTER APPLICATION.

Buffer zones

Use only Coarse to Very Coarse spray quality according to ASAE S572 definition for standard nozzles, and a buffer zone of 100 metres between field edges and downwind water bodies, native vegetation and sensitive crops.

Permissible Dates of Application of 2,4-D High Volatile Esters

Application of products containing 2,4-D isobutyl ester must only take place during the winter spray window between **1 May and 31 August**.

Victoria, Western Australia, Tasmania and Queensland currently have mechanisms whereby the use of specific chemicals (including 2,4-D) is restricted to geographical areas and/or time zones due to the higher risk for adverse off-target crop or environmental effects. These state restrictions on 2,4-D use may place additional requirements on users within the winter spray window between 1 May and 31 August. For example, the length of the spray window and the type of spray equipment that can be used may be restricted. Users must consult their local authority or department of agriculture to ensure they meet state requirements.

Application of 2,4-D only within the winter spray window will minimise the risk of unintended harmful effects to native vegetation and susceptible crops.

Avoid spraying upwind of nearby susceptible crops.

RECORD KEEPING REQUIREMENTS

Within 24 hours of completing a 2,4-D isobutyl ester application all users **must** make and keep a record of each application. The details required in a 2,4-D ester spray record must, at least, include the information set out below. It is recommended, and considered good practice, that the grower collects from any person acting on his or her behalf a copy of the 2,4-D ester spray record. (For convenience, a 2,4-D record-keeping form can be obtained from the Australian Pesticides and Veterinary Medicines Authority website.)

General:

- Name and address of farm owner (or grower if grower is not owner)
- Name and address of person who applied 2,4-D
- Date of application
- Whether neighbours have been notified Y/N (this is not a mandatory requirement)
- Map of farm with treated field or paddock outlined on map and field number or name indicated
- Area of field or paddock sprayed with 2,4-D

Crop/situation and Pest Details:

- Name of crop/situation
- Major types of pests present
- Pest stage of growth

Weather Conditions at Application Site:

- Conditions at time of application (showers, overcast, partly cloudy, clear sky, inversion conditions)
- Temperature and humidity at time of application
- Wind speed and direction at beginning of application
- Wind consistency (gusty/steady breeze, direction steady/variable)
- Whether wind direction changed during application and to where
- Whether wind speed changed during application and to what

Application Details:

- Sprayer pressure used
- Equipment and type of nozzles used
- Speed of ground application equipment
- Product name or unique APVMA approval number
- Amount of 2,4-D product applied per hectare Total volume of spray mixture applied per hectare
- Any additives used in mixture and rate of use Time at beginning of application
- Time at end of application

A statement saying the information on this record is accurate and correct, followed by the signature of the user.

Warning

These products are unregistered and labels are not approved during the period of suspension. A person must not possess with the intent to supply, or deal with any of these products during this period except in accordance with the instructions contained in this notice. A failure to comply with them will result in an offence against the Agvet Codes and the APVMA will take appropriate compliance action.

Voluntary Cancellation of Active Constituent Approvals and Product Registrations

In accordance with Section 42 of the Agricultural and Veterinary Chemicals Code Act 1994 (the Agvet Code), if an interested or approved person in relation to an approval or registration gives to the APVMA a written notice requesting the APVMA to cancel the approval or registration, the APVMA must give written notice of its decision on the request to the person(s) who made the request.

At the request of the approval holder, the APVMA has cancelled the active constituent approvals listed in Table 1.

Table 1 – Methamidophos Active Constituent Approvals

Approval No.	Active constituent Name	Approval Holder	Date of Effect
44179	Methamidophos	Bayer Cropscience Pty Ltd	15 June 2012
52337	Methamidophos	Bayer Cropscience Pty Ltd	15 June 2012

In addition the products listed in Table 2 have been cancelled at the request of the registrant.

Table 2 – Methamidophos Product Registrations

Product No.	Product Name	Registrant	Date of Effect
33036	Nitofol Insecticide Spray	Bayer Cropscience Pty Ltd	15 June 2012
47765	Monitor insecticide	Arysta Lifescience North America Corporation	15 June 2012

The following instructions set out how a person can deal with the cancelled active constituents and products.

SUPPLY

A person may supply or cause to be supplied active constituents and products manufactured prior to 15 June 2012 at wholesale and retail level, until the 15 June 2014.

After 15 June 2014 it will be an offence against the Agvet Codes to have possession or custody of the active constituents and products with the intention to supply, or to supply the active constituents and products.

USE

A person may continue to use the products according to its label instructions until 15 June 2014 providing the use is according to instructions on the label for the product which was the approved label immediately before the product registration was cancelled.

Any person who possesses, has custody of, uses, or otherwise deals with the listed active constituents and products in accordance with the above instructions is taken to have been issued with a permit under the Agvet Codes to so possess, have custody of, use or otherwise deal with the active constituents and products after the approvals/registrations have been cancelled and until 15 June 2014.

The supply and use of the active constituents and products must be in accordance with the conditions of approval/registration, including any conditions relating to the shelf life or expiry date.

It is an offence to possess, have custody of, use, or deal with the active constituents and products listed in tables 1 and 2 in a manner that contravenes the above instructions.

Application Summaries

The APVMA publishes complete application summaries on the APVMA website, www.apvma.gov.au. They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.
