Amendments to the APVMA MRL Standard—Outcomes of Review Decisions

The Australian Pesticides and Veterinary Medicines Authority (APVMA) establishes maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. The MRLs established by the APVMA are associated with a regulatory decision to register a product, grant a permit approval, or as an outcome from a review decision and are set out in the *MRL Standard* published by the APVMA. The *MRL Standard* lists MRLs of substances that may arise from the approved use of agricultural and veterinary chemical products containing those substances on commodities used for human consumption as well as livestock feeds. The *MRL Standard* also provides the relevant residue definitions to which these MRLs apply. There may be situations where the residue definition for monitoring and enforcement is different to the definition used for dietary risk assessment purposes.

MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label or use instructions. In considering MRLs and variation to MRLs, the APVMA takes into account studies on chemistry, metabolism, analytical methodology, residues, toxicology, good agricultural practice and dietary exposure. In approving MRLs, the APVMA is satisfied, from dietary exposure assessment, that the levels set are not an undue hazard to human health.

The *MRL Standard* is accessible via the APVMA website www.apvma.gov.au.

The APVMA has varied the *MRL Standard* as set out below as an outcome of the review of fenthion with effect from the date of this notice.

‘T’ denotes that the MRL, residue definition or use is temporary. These temporary MRLs will be subject to further consideration during the period of suspension of fenthion products.

Australian Government
**Department of Agriculture,
Fisheries and Forestry**

NOTICE OF REQUEST FOR INFORMATION IN REGARD TO THE POTENTIAL LISTING OF THREE NEW CHEMICALS IN ANNEX III OF THE ROTTERDAM CONVENTION

Notice is hereby given that the Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade sixth meeting of the Conference of the Parties (COP) on 28 April to 11 May 2013 will consider the listing of three new pesticides in Annex III (<http://www.pic.int/>):

1. azinphos-methyl;
2. trichlorfon; and
3. severely hazardous pesticide formulations of paraquat dichloride (only emulsifiable concentrate and soluble concentrate liquid formulations of 276 g active ingredient/L or above, corresponding to paraquat ion at 200 g/L or above).

The export of chemicals currently listed in Annex III of the Rotterdam Convention requires written permission from the Australian Government Department of Agriculture, Fisheries and Forestry (DAFF). Permission will be granted if the export meets the requirements of the importing party and the following requirements are met:

- the importing country is a party to the convention, or
- the chemical is controlled under the convention as a severely hazardous pesticide formulation, but the formulation to be exported is at a lower concentration.

For further information on export permit requirements or to make an online application, please visit <http://www.daff.gov.au/agriculture-food/ag-vet-chemicals/stockholm-rotterdam>. There is no fee for applications of this type.

Your feedback is requested

The Australian Government Department of Sustainability, Environment, Water, Population and Communities (DSEWPaC) is currently assessing how Australian companies would be impacted by export obligations that would apply if these chemicals are listed under the Convention and inserted into Australian legislation.

To this end, the following information is sought and should be provided to the APVMA by COB 14 December 2012

1. Have you or your company ever exported or intend to export azinphos-methyl, trichlorfon and/or paraquat dichloride (at any concentration)?
2. If Yes, please provide
 - a. The frequency and quantity exported in the last 12 months.
 - b. The frequency and /quantity expected to be exported annually in the future.
3. Any other relevant information you may wish to provide.

Please note that any data provided will be treated as commercially confidential information.
