GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

DISTRIBUTION AND SUBSCRIPTION

From February 2010, the APVMA will publish the *APVMA Gazette* in electronic format only. The *APVMA Gazette* and information about subscribing to the gazette alert service are available on the APVMA website, www.apvma.gov.au.

Copies of the *APVMA Gazette* from November 1999 until July 2009 will remain available from the APVMA website.

APVMA CONTACTS

For enquiries regarding the publishing and distribution of the *APVMA Gazette*, please email: communications@apvma.gov.au.

For enquiries on the *APVMA Gazette* content, please refer to the individual APVMA contacts listed under each notice.

Erratum Notice

The Australian Pesticides and Veterinary Medicines Authority advises that an error was published in the Commonwealth of Australia Gazette for Agricultural and Veterinary Chemicals, No. APVMA 1, 17 January 2012. The Notice for “Titan Fluometuron 900 WG Herbicide” was incorrectly recorded as “Ttian Fluometuron 900 WG Herbicide”.

The correct entry for the Notice of Registration for “Titan Fluometuron 900 WG Herbicide” appears on page 4 of this Gazette.

The Australian Pesticides and Veterinary Medicines Authority advises that an error was published in the Commonwealth of Australia Gazette for Agricultural and Veterinary Chemicals, No. APVMA 1, 17 January 2012. The Notice for “Zodiac Pool Blackspot Remover” incorrectly identified the Active Constituent. The mistake is not evident in the font used in the Gazette; if the font is changed it is evident that the Active Constituent was identified as “chlorine (CI)”, rather than “chlorine (Cl)”.

The correct entry for the Notice of Registration for “Zodiac Pool Blackspot Remover” appears on page 4 of this Gazette.

Any person who possesses, has custody of, uses, or otherwise deals with the listed active in accordance with the above instructions is taken to have been issued with a permit under the Agvet Codes to so possess, have custody of, use or otherwise deal with the active after the approval has been cancelled until 6 February 2014.

The supply and use of the active constituent must be in accordance with the conditions of approval, including any conditions relating to the shelf life or expiry date.

It is an offence to possess, have custody of, use, or deal with the active constituent listed in the table in a manner that contravenes the above instructions.

Suspension of 2,4-D Ethyl Ester and 2,4-D Isobutyl Ester Active Constituent Approvals

The APVMA has suspended the following active constituent approvals of 2,4-D ethyl ester and 2,4-D isobutyl ester:

Table 1: Affected active constituent approvals for 2,4-D ethyl ester and 2,4-D isobutyl ester

Approval No.	Active Constituent Name	Approval Holder
59395	2,4-D ETHYL ESTER	AGROGILL CHEMICALS PTY LTD
59931	2,4-D ISOBUTYL ESTER	4FARMERS PTY LTD

The suspension is in effect from 14 February 2012 until 10 August 2012.

REASONS

The reasons for the suspension¹ of these active constituent approvals [Section 37(1)(b) *Agricultural and Veterinary Chemicals Code Act 1994*] arises from the fact that the abovementioned active constituent approval holders failed to give information, or results of trials or experiments to the APVMA in response to the APVMA's Section 33 notice of 14 January 2011.

The APVMA has issued the following instructions for using or dealing with suspended active constituents.

INSTRUCTIONS FOR POSSESSING, HAVING CUSTODY OF, USING OR OTHERWISE DEALING WITH A SUSPENDED ACTIVE CONSTITUENT PURSUANT TO SECTION 45A OF THE AGVET CODE

POSSESSION AND CUSTODY

The possession of and custody of existing stocks of suspended active constituent is permitted during the course of the suspension.

SUPPLY

No supply of active constituent is permitted after 14 February 2012.

USE

Existing stocks of active constituent may be used to manufacture product during the course of the suspension.

Subsections 45A(5) and 55(3) cease to apply in respect of the above active constituent approvals. A person may not possess, have custody of, use or otherwise deal with the above active constituent(s) except in accordance with these instructions.

¹ These actions form part of the review ("reconsideration") of 2,4-D active constituent approvals, product registrations and associated label approvals. Approvals and registrations granted after the commencement of the review in 2003 are subject to the outcomes of the current review of 2,4-D as notified in the July 2003 gazette (page 42) and stated in the conditions of registration.

WARNING

A person must not possess with the intent to supply, or otherwise deal with the suspended active constituents except in accordance with the instructions contained in this notice. A failure to comply with the instructions will result in an offence against the Agvet Codes and the APVMA will take appropriate compliance action. It is an offence for any person to possess with the intent to supply an active constituent after the date of its suspension.

Product registrations are not included in this suspension. However all 2,4-D HVE (high volatile esters) product registrations are currently suspended. Any supply of such registered products must be in accordance with the instructions for supply as stated in the suspension notice published in the APVMA Gazette of 31 January 2012 or PER13339.

Amendments to the APVMA MRL Standard

The Australian Pesticides and Veterinary Medicines Authority (APVMA) approves maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. The MRLs approved by the APVMA are associated with a regulatory decision to register a product, grant a permit approval, or as an outcome from a review decision and are set out in the *MRL Standard* published by the APVMA. The *MRL Standard* lists MRLs of substances which may arise from the approved use of agricultural and veterinary chemical products containing those substances on commodities used for human consumption as well as livestock feeds. The *MRL Standard* also provides the relevant residue definitions to which these MRLs apply. There may be situations where the residue definition for monitoring and enforcement is different to the definition used for dietary risk assessment purposes.

MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. In considering MRLs and variation to MRLs, the APVMA takes into account studies on chemistry, metabolism, analytical methodology, residues, toxicology, good agricultural practice and dietary exposure. In approving MRLs, the APVMA is satisfied, based on dietary exposure assessments and current health standards, that the limits are not harmful to public health.

The *MRL Standard* is accessible via the APVMA website, www.apvma.gov.au

The APVMA has varied the *MRL Standard* as set out below with effect from the date of this notice.

AMENDMENT No. 80, 2012

Note: “*” denotes that the maximum residue limit (MRL) has been set at or about the limit of analytical quantitation (see: Residue Guideline No.4, *Maximum Residue Limit Proposals ‘At or about the Limit of Analytical Quantitation’*, published in NRA Gazette No.9, p44, 5 September 1995).

‘T’ denotes that the MRL, residue definition or use is temporary to enable further experimental work to be carried out in Australia or overseas, and will be reconsidered at some future date.

Proposal to Amend Standard 1.4.2 of the Australia New Zealand Food Standards Code

In the previous notice, the APVMA gazetted particular amendments which it has approved varying maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in the APVMA's *MRL Standard*.

Under Section 82 of the *Food Standards Australia New Zealand Act 1991* the APVMA is proposing to incorporate these variations (numbered 80) to MRLs into Standard 1.4.2—Maximum Residue Limits of the Australia New Zealand Food Standards Code.

MRLs contained in Standard 1.4.2 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Standard 1.4.2 permits the sale of treated foods and protects public health and safety by minimising residues in foods consistent with the effective control of pests and diseases.

The APVMA and FSANZ are satisfied, based on dietary exposure assessments and current health standards, that the proposed limits are not harmful to public health.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) will make a Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO).

The APVMA invites comment on these proposals. Details on how to make a submission appear near the end of this Notice, below the details of the proposed amendment.

The APVMA will consider any public comments made in response to this proposal. If the APVMA decides to proceed with the proposal, it will further notify any variations it makes to Standard 1.4.2 in the APVMA *Gazette*. The variations will take effect as from the date of that subsequent notice.

DRAFT VARIATIONS TO THE AUSTRALIA NEW ZEALAND FOOD STANDARDS CODE

Note: The following amendments are in a format that accords with the proposed amending Legislative Instrument which, in turn, has to be consistent with the existing format of Standard 1.4.2 (Maximum Residue Limits) of the *Australia New Zealand Food Standards Code*.

PROPOSED AMENDMENT NO. 80

Note: Subsection 82(2) of the *Food Standards Australia New Zealand Act 1991* provides that variations to standards are legislative instruments, but are not subject to disallowance or sunseting.

To commence: on gazettal of variation

Standard 1.4.2 of the *Australia New Zealand Food Standards Code* is varied by –

1. omitting from Schedule 1 the foods and associated MRLs for each of the following chemicals –

Captan Captan	
Tree nuts	3

2. inserting in alphabetical order in Schedule 1, the foods and associated MRLs for each of the following chemicals –

Captan Captan	
Almonds	0.3
Tree nuts [except almonds]	3
Cyprodinil Cyprodinil	
Blackberries	T5
Cloudberry	T5
Dewberries (including boysenberry and loganberry)	T5
Raspberries, red, black	T5
Fludioxonil	
<i>Commodities of animal origin: Sum of fludioxonil and oxidisable metabolites, expressed as fludioxonil</i>	
<i>Commodities of plant origin: Fludioxonil</i>	
Blackberries	T5
Cloudberry	T5
Dewberries (including boysenberry and loganberry)	T5
Raspberries, red, black	T5

Flutriafol Flutriafol	
Sugar cane	T0.3
Indoxacarb Sum of indoxacarb and its <i>R</i> -isomer	
Olives	T0.2
Spinetoram Sum of Ethyl-spinosyn-J and Ethyl-spinosyn-L	
Pistachio nut	T0.05

3. omitting from Schedule 1, under the entries for the following chemicals, the maximum residue limit for the food, substituting –

Metolachlor Metolachlor	
Brassica leafy vegetables	*0.01

INVITATION FOR SUBMISSIONS

Written submissions are invited from interested individuals and organisations to assist the APVMA in considering the proposal to vary Standard 1.4.2—Maximum Residue Limits of the *Australia New Zealand Food Standards Code*.

Submissions should be strictly confined to relevant matters that the APVMA must consider (such as public health and safety) which are associated with the occurrence of the proposed residues in foods. Comments received outside these grounds will not be considered by the APVMA. Claims made in submissions should be supported wherever possible by referencing or including relevant studies, research findings, trials, surveys etc. Technical information should be in sufficient detail to allow independent scientific assessment.

Please note that FSANZ will make a SPS notification to the WTO and submissions related to impacts on international trade should be made to FSANZ in response to that notification.

All personal and *confidential commercial information* (CCI)¹ material contained in submissions to the APVMA will be treated confidentially.

Submissions must be made in writing and should be clearly marked as a 'submission on the proposed amendment to Standard 1.4.2' and quote the correct amendment number.

DEADLINE FOR PUBLIC SUBMISSIONS: 6pm (Canberra time) 13 March 2011

SUBMISSIONS RECEIVED AFTER THIS DEADLINE WILL ONLY BE CONSIDERED BY PRIOR ARRANGEMENT

Submissions received after this date will only be considered if agreement for an extension has been given prior to this closing date. Agreement to an extension of time will only be given if extraordinary circumstances warrant an extension to the submission period.

¹ A full definition of "confidential commercial information" is contained in the Agricultural and Veterinary Chemicals Code (Agvet Code), which is scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*.

Variations to Standard 1.4.2 of the *Australia New Zealand Food Standards Code*

The APVMA has previously gazetted particular amendments which it had made to the APVMA *MRL Standard* and which have been proposed as variations to maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in Standard 1.4.2 - Maximum Residue Limits of the *Australia New Zealand Food Standards Code*. This notice pertains to proposals gazetted on 6 December 2011 (No. APVMA 24).

Submissions have been sought on these proposals and the APVMA has written separately to each person or organisation that made a submission. All matters raised in the submissions have been resolved.

Under subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*, the APVMA has, by legislative instrument, incorporated these variations to MRLs into Standard 1.4.2. A copy of the Amendment Instrument No. APVMA 2, 2012 accompanies this notice. For a complete and up-to-date version of Standard 1.4.2, including these amendments together with their Explanatory Statement, please refer to the Federal Register of Legislative Instrument available on the Comlaw website at <http://www.comlaw.gov.au>.

Based on dietary exposure assessments and current health standards, the APVMA and FSANZ are satisfied that these MRLs are not harmful to public health. MRLs contained in Standard 1.4.2 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Standard 1.4.2 permits the sale of treated foods and protects public health by minimising residues in foods consistent with the effective control of pests and diseases.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) made Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO) in relation to these variations and no comment was received in response to that notice.

A copy of these variations have been given to FSANZ.

The variations take effect as from the date of this notice.

This notice is published in accordance with subsection 82(7) of the *Food Standards Australia New Zealand Act 1991*.

Australia New Zealand
Food Standards Code —
Standard 1.4.2 — Maximum Residue Limits
Amendment Instrument No. APVMA 2, 2012

I, Rajumati Bhula, Program Manager, Pesticides Program and delegate of the Australian Pesticides and Veterinary Medicines Authority, acting in accordance with my powers under subsection 11(1) of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*, make this instrument for the purposes of subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*.

Rajumati Bhula
Program Manager
Pesticides Program

Dated this Ninth day of February 2012

Part 1 Preliminary

1 Name of Instrument

This Instrument is the *Australia New Zealand Food Standards Code — Standard 1.4.2 — Maximum Residue Limits Amendment Instrument* No. APVMA 2, 2012.

2 Commencement

Pursuant to subsection 82(8) of the *Food Standards Australia New Zealand Act 1991*, this Amendment Instrument commences on the day a copy of it is published in the *Gazette*.

Note: A copy of the variations made by the Amendment Instrument was published in the Commonwealth of Australia *Agricultural and Veterinary Chemicals Gazette* No. APVMA 3 of 14 February 2012

3 Object

The object of this Instrument is for the APVMA to make variations to Standard 1.4.2 — Maximum Residue Limits of the *Australia New Zealand Food Standards Code* to include or change maximum residue limits pertaining to agricultural and veterinary chemical products.

4 Interpretation

In this Instrument: —

APVMA means the Australian Pesticides and Veterinary Medicines Authority established by section 6 of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*; and

Principal Instrument means Standard 1.4.2 — Maximum Residue Limits of the *Australia New Zealand Food Standard Code* as defined in Section 4 of the *Food Standards Australia New Zealand Act 1991* being the code published in *Gazette* No. P 27 on 27 August 1987 together with any amendments of the standards in that code. The whole of the *Australia New Zealand Food Standard Code* (including Standard 1.4.2) was further published in *Gazette* P 30 of 20 December 2000¹.

Part 2 Variations to Standard 1.4.2 — Maximum Residue Limits

5 Variations to Standard 1.4.2

The Schedule to this Instrument sets out the variations made to the Principal Instrument by this Amendment Instrument.

¹ Note An amendment history from 20 December 2000 appears at the beginning of the *Australia New Zealand Food Standard Code*.

Schedule

Variations to Standard 1.4.2 — Maximum Residue Limits

1 Variations

(1) The Principal Instrument is varied by:

(a) omitting from Schedule 1 the foods and associated MRLs for each of the following chemicals –

Buprofezin	
Buprofezin	
Cucumber	T0.5
Egg plant	T2
Squash, summer	T0.5
Tomato	T2
Trichlorfon	
Trichlorfon	
Vegetables [except beetroot; Brussels sprouts; cauliflower; celery; kale; peppers; pulses; sugar beet; sweet corn (corn-on-the-cob)]	0.1

(b) inserting in alphabetical order in Schedule 1, the foods and associated MRLs for each of the following chemicals –

Buprofezin	
Buprofezin	
Fruiting vegetables, cucurbits	T2
Fruiting vegetables, other than cucurbits	T2
Lettuce, leaf	T10
Imidacloprid	
Sum of imidacloprid and metabolites containing the 6-chloropyridinylmethylene moiety, expressed as imidacloprid	
Peanut	T0.5

Trichlorfon	
Trichlorfon	
Cape gooseberry	T0.5
Egg plant	T0.5
Pepino	T0.5
Vegetables [except beetroot; Brussels sprouts; cape gooseberry; cauliflower; celery; egg plant; kale; pepino; peppers; pulses; sugar beet; sweet corn (corn-on-the-cob)]	0.1

Addendum to the Record of Approved Active Constituents

The current *Record of Approved Active Constituents for Registered Chemical Products* is also accessible from the APVMA website, www.apvma.gov.au

Application Summaries

The APVMA publishes complete application summaries on the APVMA website, www.apvma.gov.au. They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.
