Amendments to the APVMA MRL Standard

The Australian Pesticides and Veterinary Medicines Authority (APVMA) approves maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. The MRLs approved by the APVMA are associated with a regulatory decision to register a product, grant a permit approval, or as an outcome from a review decision and are set out in the *Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) 2012*. The *MRL Standard* lists MRLs of substances that may arise from the approved use of agricultural and veterinary chemical products containing those substances on commodities used for human consumption as well as livestock feeds. The *MRL Standard* also provides the relevant residue definitions to which these MRLs apply. There may be situations where the residue definition for monitoring and enforcement is different to the definition used for dietary risk assessment purposes.

MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. In considering MRLs and variation to MRLs, the APVMA takes into account studies on chemistry, metabolism, analytical methodology, residues, toxicology, good agricultural practice and dietary exposure. In approving MRLs, the APVMA is satisfied, from dietary exposure assessment, that the levels set are not an undue hazard to human health.

The APVMA has amended the *MRL Standard* with effect from 10 February 2014.

Details of the amendment can be found in the *Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) Amendment Instrument 2015 (No. 1)*.

The amendments will be incorporated into the compilation of the [Agricultural and Veterinary Chemicals Code Instrument No. 4 \(MRL Standard\) 2012](#).

The *MRL Standard* is accessible via the ComLaw website www.comlaw.gov.au or the links above.

Proposal to Amend Standard 1.4.2 of the Australia New Zealand Food Standards Code

In the previous notice, the APVMA gazetted that amendments which it has approved varying maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in the APVMA's *MRL Standard*, have been made.

Under Section 82 of the *Food Standards Australia New Zealand Act 1991* the APVMA is proposing to incorporate those variations (*Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) Amendment Instrument 2015 (No. 1)*) to MRLs into Standard 1.4.2. Maximum Residue Limits of the Australia New Zealand Food Standards Code.

MRLs contained in Standard 1.4.2 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Standard 1.4.2 permits the sale of treated foods and protects public health and safety by minimising residues in foods consistent with the effective control of pests and diseases.

The APVMA and FSANZ are satisfied, based on dietary exposure assessments and current health standards, that the proposed limits are not harmful to public health.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) will make a Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO).

The APVMA invites comment on these proposals. Details on how to make a submission appear near the end of this notice, below the details of the proposed amendment.

The APVMA will consider any public comments made in response to this proposal. If the APVMA decides to proceed with the proposal, it will further notify any variations it makes to Standard 1.4.2 in the *APVMA Gazette*. The variations will take effect as from the date of that subsequent notice.

DRAFT VARIATIONS TO THE AUSTRALIA NEW ZEALAND FOOD STANDARDS CODE

Note: The following amendments are in a format that accords with the proposed amending Legislative Instrument which, in turn, has to be consistent with the existing format of Standard 1.4.2 (Maximum Residue Limits) of the *Australia New Zealand Food Standards Code*.

PROPOSED AMENDMENT (AGRICULTURAL AND VETERINARY CHEMICALS CODE INSTRUMENT NO. 4 (MRL STANDARD) AMENDMENT INSTRUMENT 2015 (NO. 1))

INVITATION FOR SUBMISSIONS

Written submissions are invited from interested individuals and organisations to assist the APVMA in considering the proposal to vary Standard 1.4.2 Maximum Residue Limits of the *Australia New Zealand Food Standards Code*. Submissions should be strictly confined to relevant matters that the APVMA must consider (such as public health and safety) which are associated with the occurrence of the proposed residues in foods. Comments received outside these grounds will not be considered by the APVMA. Claims made in submissions should be supported wherever possible by referencing or including relevant studies, research findings, trials, surveys etc. Technical information should be in sufficient detail to allow independent scientific assessment.

Please note that FSANZ will make a SPS notification to the WTO and submissions related to impacts on international trade should be made to FSANZ in response to that notification.

Submissions must be made in writing and should be clearly marked as a 'submission on the proposed amendment to Standard 1.4.2' and quote the correct amendment number.

DEADLINE FOR PUBLIC SUBMISSIONS: 6 pm (AEDT) 10 March 2015

SUBMISSIONS RECEIVED AFTER THIS DEADLINE WILL ONLY BE CONSIDERED BY PRIOR ARRANGEMENT

Submissions received after this date will only be considered if agreement for an extension has been given prior to this closing date. Agreement to an extension of time will only be given if extraordinary circumstances warrant an extension to the submission period.

Continued suspension of quintozone active constituent approvals, products containing quintozone and label approvals of products containing quintozone

Quintozone containing products have been suspended since 9 April 2010 on the basis of human health concerns due to the potential presence of undeclared dioxin impurities. The current suspension expires on 14 February 2015.

The APVMA has decided to extend the suspension of the active constituent approvals for quintozone listed in Table 1 and the product registrations and label approvals of products containing quintozone listed in Table 2.

¹ A permit (PER 14681) has been issued for certain batches of this product.

The active constituent approval suspension is in effect from 14 February 2015 until 13 November 2015.

The product and label suspensions apply as a consequence of the decision to continue the suspension of quintozone active constituent approval and are in effect from 14 February 2015 until 13 November 2015.

BASIS FOR THE CONTINUATION OF THE SUSPENSION

The APVMA became aware of information in 2009 indicating the presence of undeclared dioxins as impurities in products that contain quintozone as the active constituent. On this basis, the APVMA suspended quintozone active approvals effective from 9 April 2010 until 14 July 2014. The APVMA has decided to continue this suspension for a further year until 13 November 2015.

Dioxins are listed as toxicologically significant impurities in the *Definition of Standards for Active Constituents* (see www.apvma.gov.au/node/10706). The presence of any impurity that is listed as toxicologically significant is a matter that the APVMA considers to be a relevant particular to the approval of an active constituent. An active constituent approval is not supportable unless any impurities of toxicological significance have been declared, quantified and evaluated.

The APVMA considers that the active constituent quintozone may be an undue hazard to the safety of people exposed to it during its handling and may have an effect that is harmful to human beings. A full assessment of the dioxin impurities has not been conducted in accordance with section 14 of the Agvet Code Act. On this basis the APVMA has concluded that it cannot allow the active constituent to be supplied and used in chemical products when it contains undeclared dioxins. Consequently, based on section 41(1)(b) of the Agvet Code Act, the APVMA has suspended the approvals of quintozone active constituents.

The Agvet Code provides that if the APVMA suspends the only approval, or all the approvals, of an active constituent for an existing chemical product, it must also suspend any registration of that product. In addition, if the APVMA suspends the registration of a chemical product, it may also suspend any approval relating to a label for containers for the product.

INSTRUCTIONS FOR DEALING WITH SUSPENDED ACTIVE CONSTITUENTS AND PRODUCTS²

Unless authorised by the APVMA, the following instructions apply to persons having possession or custody of stocks, and are considering using or otherwise dealing with suspended active constituent and product during the period of suspension.

INSTRUCTIONS FOR POSSESSING, HAVING CUSTODY OF, USING OR DEALING WITH SUSPENDED ACTIVE CONSTITUENTS AND PRODUCTS

Possession and custody

Possession and custody of existing stocks of quintozone active constituent and/or products is permitted.

Supply

No supply of the active constituent quintozone and/or any product that contains it as an active constituent is permitted.

Use

No use of suspended product containing quintozone is permitted

² With the exception of permit; PER14681.

Any person who possesses or has custody of, or otherwise deals with the active constituents or products listed in Tables 1 and 2 (above) in accordance with the instructions in this notice is taken to have been issued with a permit to possess, have custody of, or deal with the active constituents or products during the period of suspension or until further notice.

WARNING

A person must not possess with the intent to supply, or deal with any materials containing quintozone during this period, except in accordance with the instructions contained in this notice. A failure to comply with these instructions will result in an offence against the Agvet Codes and the APVMA will take appropriate compliance action. It is an offence for any person to possess with the intent to supply, use or deal with the active constituent after 9 April 2010 unless authorised to do so by the APVMA. Similarly, it is an offence for any person to possess with the intent to supply, use or deal with quintozone products after 9 April 2010, unless authorised to do so by the APVMA.
