The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

## **GENERAL INFORMATION**

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 8J(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

## **DISTRIBUTION AND SUBSCRIPTION**

The *APVMA Gazette* is published in electronic format only and is available from the [APVMA website](http://apvma.gov.au).

## Approved Active Constituents

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has approved or varied the relevant particulars or conditions of the approval of the following active constituents, with effect from the dates shown.

### 1. ACTIVE CONSTITUENT

<b>Application no.:</b>	117390
<b>Active constituent/s:</b>	Tetramethrin
<b>Applicant name:</b>	Agro-Alliance (Australia) Pty Ltd
<b>Applicant ACN:</b>	130 864 603
<b>Summary of use:</b>	For use in agricultural chemical products
<b>Date of approval:</b>	17 February 2020
<b>Approval no.:</b>	87018

<b>Application no.:</b>	121818
<b>Active constituent/s:</b>	Neomycin sulfate
<b>Applicant name:</b>	Newmarket Ingredients Pty Ltd
<b>Applicant ACN:</b>	092 834 270
<b>Summary of use:</b>	For use in veterinary chemical products
<b>Date of approval:</b>	21 February 2020
<b>Approval no.:</b>	88611

<b>Application no.:</b>	121968
<b>Active constituent/s:</b>	Moxidectin
<b>Applicant name:</b>	Shanghai Neway Animal Health Co Ltd
<b>Applicant ACN:</b>	N/A
<b>Summary of use:</b>	For use in veterinary chemical products
<b>Date of approval:</b>	21 February 2020
<b>Approval no.:</b>	88678

<b>Application no.:</b>	120840
<b>Active constituent/s:</b>	Chlorthal-dimethyl
<b>Applicant name:</b>	Imtrade Australia Pty Ltd
<b>Applicant ACN:</b>	090 151 134
<b>Summary of use:</b>	For use in agricultural chemical products
<b>Date of approval:</b>	21 February 2020
<b>Approval no.:</b>	88311

<b>Application no.:</b>	121226
<b>Active constituent/s:</b>	Pinoxaden
<b>Applicant name:</b>	Titan Ag Pty Ltd

## New agricultural active constituent: methiozolin

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application for the approval of a new active constituent, methiozolin, for control of winter grass in turf.

### PARTICULARS OF THE ACTIVE CONSTITUENT

<b>Common Name:</b>	Methiozolin
<b>IUPAC Name:</b>	(5 <i>RS</i> )-5-[(2,6-difluorobenzyloxy)methyl]-4,5-dihydro-5-methyl-3-(3-methyl-2-thienyl)-1,2-oxazole
<b>CAS Name:</b>	5-[[[(2,6-difluorophenyl)methoxy]methyl]-4,5-dihydro-5-methyl-3-(3-methyl-2-thienyl)isoxazole
<b>CAS Registry Number:</b>	403640-27-7
<b>Minimum Purity:</b>	990 g/kg (dry weight basis)
<b>Molecular Formula:</b>	C <sub>17</sub> H <sub>17</sub> F <sub>2</sub> NO <sub>2</sub> S
<b>Molecular Weight:</b>	337.4 gmol <sup>-1</sup>

**Structure:**

**Chemical Family:** Oxazole compound

### SUMMARY OF THE APVMA'S EVALUATION OF METHIOZOLIN ACTIVE CONSTITUENT

The APVMA has evaluated the chemistry aspects of active constituent methiozolin (physico-chemical properties, identification, stability, manufacturing process, quality control procedures, batch analysis results and analytical methods) and found them to be acceptable.

The APVMA has considered the toxicological aspects of methiozolin. There are currently no proposed uses in food crops, and neither an ADI nor an ARfD have been established.

The Scheduling Delegate has made an interim decision to include methiozolin in Schedule 5 of the Poison Standard, with no cut-off, with a proposed date of effect of 1 June 2020.

On the basis of the data provided, and the toxicological assessment, it is proposed that the following active constituent standard be established for methiozolin:

Constituent	Level
Methiozolin	Minimum 990 g/kg

Impurities of toxicological significance are not expected to occur in methiozolin as a result of the raw materials and the synthetic route used.

The APVMA is satisfied that the proposed importation and use of methiozolin would not be an undue hazard to the safety of people exposed to it during its handling and use.

## **MAKING A SUBMISSION**

In accordance with section 12 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether the application for approval of methiozolin should be granted. Submissions should relate only to matters that are considered in determining whether the safety criteria set out in section 5A of the Agvet Code have been met. Submissions should state the grounds on which they are based.

Submissions must be received by the APVMA within **28 days** of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

When making a submission please include a:

- contact name
- company or group name (if relevant)
- postal address
- email address (if available)
- the date you made the submission.

All personal and *confidential commercial information (CCI)*<sup>1</sup> material contained in submissions will be treated confidentially.

Written submissions should be addressed in writing to:

## **New chemical product: Campbell Poacure Turf Herbicide containing methiozolin**

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application for registration of a new product containing a new active constituent. The product is Campbell Poacure Turf Herbicide.

### **PARTICULARS OF THE APPLICATION**

<b>Proposed product name(s):</b>	Campbell Poacure Turf Herbicide
<b>Applicant company:</b>	Colin Campbell (chemicals) Pty Ltd
<b>Name of active constituent:</b>	Methiozolin
<b>Signal heading:</b>	Schedule 5 (interim decision, proposed date of effect 1 June 2020)
<b>Summary of proposed use:</b>	For the control of winter grass ( <i>Poa annua</i> ) in recreational turf
<b>Pack sizes:</b>	500 mL and 1 L
<b>Withholding period:</b>	Not applicable

### **SUMMARY OF THE APVMA'S EVALUATION OF CAMPBELL POACURE TURF HERBICIDE IN ACCORDANCE WITH THE REQUIREMENTS OF SECTION 14(1)(C) OF THE AGRICULTURAL AND VETERINARY CHEMICALS CODE (THE 'AGVET CODE'), SCHEDULED TO THE *AGRICULTURAL AND VETERINARY CHEMICALS CODE ACT 1994***

1. The APVMA has considered the formulation of the product, Campbell Poacure Turf Herbicide. The toxicological profile of all of the Campbell Poacure Turf Herbicide constituents is well established, and the key health hazards linked to use of the formulated product Campbell Poacure Turf Herbicide are related to moderate eye and skin irritation. First Aid Instructions and Safety Directions (FAISD) to be displayed on the product label have been developed to adequately mitigate the risks resulting from use of the product.

The APVMA has evaluated the application and in its assessment in relation to whether the safety criteria have been met in accordance with the definition set out in section 5A of the Agvet Code, and proposes to determine that:

- (i) The APVMA is satisfied that the proposed use of Campbell Poacure Turf Herbicide would not be an undue hazard to the safety of people exposed to it during its handling and use.

The APVMA has conducted a risk assessment on the product and concluded that it can be used safely. Noting the use of the product is in non-food producing situations, an ADI and ARfD have not been set for the active constituent.

- (ii) The APVMA is satisfied that the proposed use of Campbell Poacure Turf Herbicide will not be an undue hazard to the safety of people using anything containing its residues.

The proposed product is for exclusive use on professionally prepared recreational turf such as golf clubs, bowling clubs, and playing grounds (eg, ovals and stadia). The product is NOT intended to be use as a home garden product so householders will not be applying it to their own lawns.

- (iii) The APVMA is satisfied that the proposed use of Campbell Poacure Turf Herbicide containing the active constituent methiozolin is not likely to be harmful to human beings if used according to the product label directions.

- (iv) The APVMA is satisfied that the proposed use of the new product, Campbell Poacure Turf Herbicide, containing the active constituent methiozolin would not be likely to have an unintended effect that is harmful to animals, plants or things, or the environment.

The APVMA has considered the available environmental fate and effects data in support of the proposed use and has concluded that the risks to the environment are acceptable.

Methiozolin is considered to be moderately persistent in soil under field conditions, with more rapid dissipation when applied to turf. In aquatic system, methiozolin partitioned moderately fast from the water phase to the sediment, with slow degradation in the whole system. Methiozolin is unlikely to be subject to long- or short-range transport in the air.

Risks to terrestrial vertebrates and soil organisms were determined to be acceptable. A food chain assessment indicated that any accumulated residues in earthworms or fish are not expected to reach levels harmful to predators and biomagnification is not expected along the food chain. No specific protection statements are required for these non-target taxa.

Methiozolin is highly toxic to aquatic plants, and moderately toxic to fish, aquatic invertebrates, and algae. Risks of spray drift were determined to be acceptable with mandatory buffer zones ranging 30 to 90 metres depending on the application rate and the boom height. Runoff risks were acceptable for recreational turf situations, with the exception of use in Tasmania on golf courses. Therefore, the product is not permitted for use on golf fairways in Tasmania adjacent to natural waterways. To minimise risks of runoff in all situations, the product must also not be applied if heavy rains or storms are forecast within three days and the treatment area must not be irrigated to the point of runoff for at least three days after application.

Long-term exposure of bee larvae to methiozolin resulted in reduced survival at high doses. Although risks are low, as a precautionary measure, spray drift is not permitted to flowering plants and beekeepers must be notified if there is potential for managed hives to be affected by the treatment.

Contact exposure to fresh-dried residues of methiozolin on a natural substrate resulted in a dose-response impact on reproduction of the parasitic wasp. The product is not considered to be compatible with integrated pest management programs (IPM) utilising beneficial arthropods.

Methiozolin was shown to be a selective herbicide and only certain non-target terrestrial plants were affected. Spray drift risks were determined to be acceptable without buffer zones, provided the standard spray drift restraints are followed.

Based on an assessment of the environmental data, it was considered that there should be no unacceptable adverse effects on non-target organisms from the use of Campbell Poacure Turf Herbicide when used in accordance with label directions.

2. The APVMA has evaluated the application and in its assessment in relation to whether the efficacy criteria have been met in accordance with the definition set out in section 5B of the Agvet Code, and proposes to determine that:
  - (i) In relation to its assessment of efficacy under section 14(3)(f), the APVMA is satisfied that data from trials supporting the efficacy of the product adequately demonstrate that, if used according to the product label directions, the product is effective for its proposed uses.
3. The APVMA has evaluated the application and in its assessment in relation to whether the trade criteria have been met in accordance with the definition set out in section 5C of the Agvet Code, and proposes to determine that:

- (i) The APVMA is satisfied that the proposed use of Campbell Poacure Turf Herbicide would not adversely affect trade between Australia and places outside Australia as the product is not for use in food crops or animals producing any major Australian export commodities.

## **MAKING A SUBMISSION**

In accordance with section 13 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether Campbell Poacure Turf Herbicide should be registered. Submissions should relate only to matters that are required by the APVMA to be taken into consideration in determining whether the safety, efficacy or trade criteria have been met. Submissions should state the grounds on which they are based.

Submissions must be received by the APVMA within **28 days** of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

Relevant comments will be taken into account by the APVMA in deciding whether the product should be registered and in determining appropriate conditions of registration and product labelling.

When making a submission please include:

- contact name
- company or group name (if relevant)
- postal address
- email address (if available)
- the date you made the submission.

<sup>2</sup> A full definition of 'confidential commercial information' is contained in the Agvet Code.

On the basis of the data provided, and the toxicological assessment, it is proposed that the following APVMA Active Constituent Standard be established for tetraniliprole:

Specification	Level
Tetraniliprole content	Minimum 900 g/kg

Other compounds of toxicological significance are not expected to occur in tetraniliprole technical active constituent.

The APVMA is satisfied that the proposed importation and use of tetraniliprole would not be an undue toxicological hazard to the safety of people exposed to it during its handling and use.

### MAKING A SUBMISSION

In accordance with sections 12 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether the application for approval of tetraniliprole should be granted. Submissions should relate only to matters are considered in determining whether the safety criteria set out in section 5A of the Agvet Code are met. Submissions should state the grounds on which they are based.

Submissions must be received by the APVMA within **28 days** of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

## **New chemical product: Vayego 200 SC Insecticide containing tetraniliprole**

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application for registration of a new product containing a new active constituent. The product is Vayego 200 SC Insecticide.

### **PARTICULARS OF THE APPLICATION**

<b>Proposed product name(s):</b>	Vayego 200 SC Insecticide
<b>Applicant company:</b>	Bayer CropScience Pty Ltd
<b>Name of active constituent:</b>	Tetraniliprole
<b>Signal heading:</b>	Unscheduled. Does not require control by scheduling
<b>Summary of proposed use:</b>	For the control of various pests of almonds, macadamias, pome fruit and stone fruit
<b>Pack sizes:</b>	1–110 L
<b>Withholding period:</b>	Harvest (H) Stone fruit: do not harvest for 3 days after application Pome fruit: do not harvest for 7 days after application Tree nuts: do not harvest for 10 days after application Grazing (G) Pome fruit, stone fruit, tree nuts: do not graze treated orchard

### **SUMMARY OF THE APVMA'S EVALUATION OF VAYEGO 200 SC INSECTICIDE IN ACCORDANCE WITH THE REQUIREMENTS OF SECTION 14(1)(C) OF THE AGRICULTURAL AND VETERINARY CHEMICALS CODE (THE 'AGVET CODE'), SCHEDULED TO THE *AGRICULTURAL AND VETERINARY CHEMICALS CODE ACT 1994***

1. The APVMA has evaluated the application and in its assessment in relation to whether the safety criteria have been met in accordance with the definition set out in section 5A of the Agvet Code, and proposes to determine that:
  - (i) The APVMA is satisfied that the proposed use of Vayego 200 SC Insecticide would not be an undue hazard to the safety of people exposed to it during its handling and use.
  - (ii) The APVMA is satisfied that the proposed use of Vayego 200 SC Insecticide will not be an undue hazard to the safety of people using anything containing its residues.
  - (iii) The APVMA is satisfied that the proposed use of Vayego 200 SC Insecticide is not likely to be harmful to human beings if used according to the product label directions.
  - (iv) The APVMA is satisfied that the proposed use of Vayego 200 SC Insecticide is not likely to have an unintended effect that is harmful to animals, plants, or things or the environment if used according to the product label directions.

2. The APVMA has evaluated the application and in its assessment in relation to whether the efficacy criteria have been met in accordance with the definition set out in section 5B of the Agvet Code, and proposes to determine that:
  - (i) In relation to its assessment of efficacy under section 14(3)(f), the APVMA is satisfied that data from trials supporting the efficacy of the product adequately demonstrate that if used according to the product label directions, the product is effective for its proposed uses.
3. The APVMA has evaluated the application and in its assessment in relation to whether the trade criteria have been met in accordance with the definition set out in section 5C of the Agvet Code, and proposes to determine that:
  - (i) The APVMA is satisfied that the proposed use of Vayego 200 SC Insecticide would not adversely affect trade between Australia and places outside Australia.

#### **FURTHER INFORMATION**

A Public Release Summary (PRS) of the evaluation of the product Vayego 200 SC Insecticide is available from the APVMA website's '[Public Consultation](#)' page, or by contacting the APVMA as listed below.

#### **MAKING A SUBMISSION**

In accordance with section 13 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether Vayego 200 SC Insecticide should be registered. Submissions should relate only to matters that are required by the APVMA to be taken into consideration in determining whether the safety, efficacy or trade criteria have been met. Submissions should state the grounds on which they are based.

Submissions must be received by the APVMA within 28 days of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

Relevant comments will be taken into account by the APVMA in deciding whether the product should be registered and in determining appropriate conditions of registration and product labelling.

## **Amendments to the APVMA MRL Standard**

The Australian Pesticides and Veterinary Medicines Authority (APVMA) approves maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. The MRLs approved by the APVMA are associated with a regulatory decision to register a product, grant a permit approval, or as an outcome from a review decision and are set out in the *Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019*. The *MRL Standard* lists MRLs of substances that may arise from the approved use of agricultural and veterinary chemical products containing those substances on commodities used for human consumption as well as livestock feeds. The *MRL Standard* also provides the relevant residue definitions to which these MRLs apply. There may be situations where the residue definition for monitoring and enforcement is different to the definition used for dietary risk assessment purposes.

MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. In considering MRLs and variation to MRLs, the APVMA takes into account studies on chemistry, metabolism, analytical methodology, residues, toxicology, good agricultural practice and dietary exposure. In approving MRLs, the APVMA is satisfied, from dietary exposure assessment, that the levels set are not an undue hazard to human health.

The APVMA has amended the *MRL Standard* and the changes will have affect the day after the instrument is registered.

Details of the amendment can be found in the *Agricultural and Veterinary Chemicals Code (MRL Standard) Amendment Instrument (No. 2) 2020*.

The amendments will be incorporated into the compilation of the *Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019*.

The *MRL Standard* is accessible via the [Federal Register of Legislation website](#).

## **Proposal to amend Schedule 20 in the Australia New Zealand Food Standards Code**

In the previous notice on page 35 of APVMA Gazette No. 5, the APVMA gazetted amendments which it has approved to vary maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in the APVMA's *MRL Standard*.

Under section 82 of the *Food Standards Australia New Zealand Act 1991*, the APVMA is proposing to incorporate those variations (*Agricultural and Veterinary Chemicals Code (MRL Standard) Amendment Instrument (No. 2) 2020*) to MRLs into Schedule 20—maximum residue limits in the Australia New Zealand Food Standards Code.

MRLs contained in Schedule 20 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Schedule 20 permits the sale of treated foods and protects public health and safety by minimising residues in foods consistent with the effective control of pests and diseases.

The APVMA and Food Standards Australia New Zealand (FSANZ) are satisfied, based on dietary exposure assessments and current health standards, that the proposed limits are not harmful to public health.

The agreement between the Australian Government and the New Zealand Government concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

A Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO) will be made.

The APVMA invites comment on these proposals. Details on how to make a submission appear near the end of this notice, below the details of the proposed amendment.

The APVMA will consider any public comments made in response to this proposal. If the APVMA decides to proceed with the proposal, it will further notify any variations it makes to Schedule 20 in the APVMA Gazette. The variations will take effect as from the date of that subsequent notice.

**PROPOSED VARIATION TO SCHEDULE 20 IN THE AUSTRALIA NEW ZEALAND FOOD STANDARDS CODE**

(2 March 2020)

Note: Subsection 82(2) of the *Food Standards Australia New Zealand Act 1991* provides that variations to standards are legislative instruments, but are not subject to disallowance or sunseting.

## **INVITATION FOR SUBMISSIONS**

Written submissions are invited from interested individuals and organisations to assist the APVMA in considering the proposal to vary Schedule 20—maximum residue limits in the Australia New Zealand Food Standards Code.

Submissions should be strictly confined to relevant matters that the APVMA must consider (such as public health and safety) which are associated with the occurrence of the proposed residues in foods. Comments received outside these grounds will not be considered by the APVMA. Claims made in submissions should be supported wherever possible by referencing or including relevant studies, research findings, trials, surveys etc. Technical information should be in sufficient detail to allow independent scientific assessment.

Please note that FSANZ will make a SPS notification to the WTO and submissions related to impacts on international trade should be made to FSANZ in response to that notification.

Submissions must be made in writing and should be clearly marked as a 'submission on the proposed amendment to Schedule 20' and quote the correct amendment number.

### **DEADLINE FOR PUBLIC SUBMISSIONS: 6 PM (AEST) 7 APRIL 2020**

### **SUBMISSIONS RECEIVED AFTER THIS DEADLINE WILL ONLY BE CONSIDERED BY PRIOR ARRANGEMENT**

Submissions received after this date will only be considered if agreement for an extension has been given prior to this closing date. Agreement to an extension of time will only be given if extraordinary circumstances warrant an extension to the submission period.

## Variations to Schedule 20 of the Australia New Zealand Food Standards Code

The APVMA has previously gazetted particular amendments which it had made to the APVMA *MRL Standard* and which have been proposed as variations to maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in Schedule 20—maximum residue limits of the Australia New Zealand Food Standards Code. This notice pertains to proposals (No. 3) gazetted on 19 November 2019 (No. APVMA 23).

Submissions have been sought on these proposals and the APVMA has written separately to each person or organisation that made a submission. All matters raised in the submissions have been resolved.

Under subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*, the APVMA has, by legislative instrument, incorporated these variations to MRLs into Schedule 20. A copy of the Amendment Instrument (No. APVMA 2, 2020) accompanies this notice. For a complete and up-to-date version of Schedule 20, including these amendments together with their Explanatory Statement, please refer to the Federal Register of Legislation available on the [Legislation website](#).

Based on dietary exposure assessments and current health standards, the APVMA and Food Standards Australia and New Zealand (FSANZ) are satisfied that these MRLs are not harmful to public health. MRLs contained in Schedule 20 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Schedule 20 permits the sale of treated foods and protects public health by minimising residues in foods consistent with the effective control of pests and diseases.

The agreement between the Australian Government and the New Zealand Government concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) made Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO) in relation to these variations and no comment was received in response to that notice.

A copy of these variations have been given to FSANZ.

The variations take effect as from the date of this notice.

This notice is published in accordance with subsection 82(7) of the *Food Standards Australia New Zealand Act 1991*.

Delegate of the Chief Executive Officer of the Australian Pesticides and Veterinary Medicines  
Authority

Dated this Second day of March 2020

## Part 1 Preliminary

### 1 Name of instrument

This instrument is the *Australia New Zealand Food Standards Code—Schedule 20—maximum residue limits Variation Instrument No. APVMA 2, 2020*.

### 2 Commencement

In accordance with subsection 82(8) of the *Food Standards Australia New Zealand Act 1991*, this instrument commences on the day it is published in the *Gazette*.

Note: A copy of the variations made by the Amendment Instrument was published in the Commonwealth of Australia Agricultural and Veterinary Chemicals Gazette.

### 3 Object

The object of this instrument is for the APVMA to make variations to Schedule 20—maximum residue limits in the *Australia New Zealand Food Standards Code* to include or change maximum residue limits pertaining to agricultural and veterinary chemical products.

### 4 Interpretation

In this instrument:—

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority established by section 6 of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*; and

**Principal Instrument** means Schedule 20—maximum residue limits in the Australia New Zealand Food Standard Code as defined in Section 4 of the *Food Standards Australia New Zealand Act 1991* being the Code published in *Gazette* No. P 27 on 27 August 1987 together with any amendments of the standards in that Code. Schedule 20 was published in the *Food Standards Gazette* FSC 96 on Thursday 10 April 2015 and was registered as a legislative instrument on 1 April 2015 (F2015L00468).

## Part 2 Variations to Schedule 20—maximum residue limits

### 5 Variations to Schedule 20

The Schedule to this instrument sets out the variations made to the Principal Instrument by this instrument.

In accordance with section 45A(1)(b) of the Agvet Code, the APVMA publishes this notice of the cancellation, including the following instructions which set out how a person can deal with the cancelled active constituent, cancelled product or product bearing a cancelled label referred to in the above table.

**INSTRUCTIONS FOR PERSONS WHO POSSESS, HAVE CUSTODY OF OR USE THE CANCELLED ACTIVE CONSTITUENT, CANCELLED PRODUCT, OR THE PRODUCT BEARING A CANCELLED LABEL UNDER SECTION 45B(3) OF THE AGVET CODE**

A person who possesses, has custody of or uses the cancelled active constituent, cancelled product or product bearing a cancelled label referred to in the above table in accordance with the instructions contained in this notice, is taken to have been issued with a permit under section 45B(3) of the Agvet Code to possess, have custody of or use the cancelled active constituent, cancelled product or product bearing a cancelled label, in accordance with those instructions.

**POSSESSION OR CUSTODY**

A person may possess the cancelled active constituent, cancelled product or product bearing a cancelled label referred to in the above table in accordance with its label instructions for 12 months from the Date of Cancellation.

**USE, SUPPLY OR OTHERWISE DEAL WITH**

A person may use the cancelled active constituent, cancelled product or products bearing a cancelled label referred to in the above table according to its label instructions, including any conditions relating to shelf life or expiry date, for 12 months after the Date of Cancellation.

A person may supply or cause to be supplied at wholesale or retail level the cancelled active constituent, cancelled product, or product bearing a cancelled label referred to in the above table, for 12 months after the Date of Cancellation.

**CONTRAVENTIONS**

After the day that is 12 months from the Date of Cancellation it will be an offence against the Agvet Code to have possession or custody of the cancelled active constituents, cancelled products or products bearing a cancelled label with the intention to supply, or to supply the cancelled active constituent, cancelled product, or product bearing a cancelled label.

It is an offence to possess, have custody of, use, or otherwise deal with the cancelled active constituents, cancelled products or products bearing the cancelled label listed in the table above in a manner that contravenes the above instructions.
