No. APVMA 17, Tuesday, 23 August 2016

Published by The Australian Pesticides and Veterinary Medicines Authority

**AGRICULTURAL AND
VETERINARY CHEMICALS**

Australian Government
**Australian Pesticides and
Veterinary Medicines Authority**

The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

Website: www.apvma.gov.au.

GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 8J(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

DISTRIBUTION AND SUBSCRIPTION

The *APVMA Gazette* is published in electronic format only and is available from the APVMA website,

www.apvma.gov.au/news-and-publications/publications/gazette

If you would like to receive email notification when a new edition is published, please subscribe on the APVMA website.

APVMA CONTACTS

For enquiries regarding the publishing and distribution of the *APVMA Gazette*: Telephone: +61 2 6210 4988

For enquiries on the *APVMA Gazette* content, please refer to the individual APVMA contacts listed under each notice.

Agricultural Chemical Products and Approved Labels

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has registered or varied the relevant particulars or conditions of the registration in respect of the following products and has approved the label or varied the relevant particulars or conditions of the approval in respect of the containers for the chemical product, with effect from the dates shown.

1. AGRICULTURAL PRODUCTS BASED ON EXISTING ACTIVE CONSTITUENTS

Application no.:	104112
Product name:	Genfarm Carfentrazone 400 Herbicide
Active constituent/s:	400 g/L carfentrazone-ethyl
Applicant name:	Landmark Operations Limited
Applicant ACN:	008 743 217
Summary of use	For control of certain broadleaf weeds in various crop and non-crop situations
Date of registration/approval:	22 July 2016
Product registration no.:	81818
Label approval no.:	81818/104112
Application no.:	104440
Product name:	Kelpie Gly 680 Dry Herbicide
Active constituent/s:	680 g/kg glyphosate (present as the mono-ammonium salt)
Applicant name:	Sinochem Australia Pty Ltd
Applicant ACN:	160 164 616
Summary of use	For the non-selective control of many annual and perennial weeds
Date of registration/approval:	25 July 2016
Product registration no.:	81926
Label approval no.:	81926/104440
Application no.:	106539
Product name:	Relyon Empress 2,4-DB Herbicide
Active constituent/s:	500 g/L 2,4-DB (present as the dimethylamine salt)
Applicant name:	Ruralco Holdings Limited
Applicant ACN:	009 660 879
Summary of use	For the control of broadleaf weeds in seedling and established lucerne, medic and clover pastures, peanuts and cereal crops undersown with lucerne, medic or clover
Date of registration/approval:	26 July 2016
Product registration no.:	82723
Label approval no.:	82723/106539
Application no.:	106541
Product name:	MACSPRED Triasulfuron 750 WG Herbicide
Active constituent/s:	750 g/kg triasulfuron
Applicant name:	Macsprod Pty Ltd
Applicant ACN:	011 029 495
Summary of use	For pre-plant control of annual ryegrass, paradoxa grass and certain broadleaf weeds in wheat and for post-emergent control of wild radish in wheat, oats and barley
Date of registration/approval:	26 July 2016
Product registration no.:	82724
Label approval no.:	82724/106541

Application no.:	105744
Product name:	Brandt Bigfoot Dye Spray Colourant
Active constituent/s:	93 g/L sulphonated aromatic acid dye
Applicant name:	Brandt Consolidated Inc
Applicant ACN:	N/A
Summary of use	For use with pesticides and fertilizers on turf and agricultural areas
Date of registration/approval:	26 July 2016
Product registration no.:	82440
Label approval no.:	82440/105744
Application no.:	107127
Product name:	Relyon Bendax 600WG Herbicide
Active constituent/s:	600 g/kg bensulfuron (present as the methyl ester)
Applicant name:	Ruralco Holdings Limited
Applicant ACN:	009 660 879
Summary of use	For the control of arrowhead, dirty dora and star fruit in aerially sown rice
Date of registration/approval:	26 July 2016
Product registration no.:	82920
Label approval no.:	82920/107127
Application no.:	103309
Product name:	Accensi Tri-Max 480 EC Herbicide
Active constituent/s:	480 g/L trifluralin
Applicant name:	Accensi Pty Ltd
Applicant ACN:	079 875 184
Summary of use	For the control of annual grasses and certain broadleaf weeds in certain horticultural and agricultural crops
Date of registration/approval:	3 August 2016
Product registration no.:	81536
Label approval no.:	81536/103309
Application no.:	104868
Product name:	Imtrade Imazamox 700 WG Herbicide
Active constituent/s:	700 g/kg imazamox
Applicant name:	Imtrade Australia Pty Ltd
Applicant ACN:	090 151 134
Summary of use	For the post-emergence control of certain annual grass and broadleaf weeds in field peas, legume-based pastures, lucerne, peanuts and soybeans
Date of registration/approval:	3 August 2016
Product registration no.:	82046
Label approval no.:	82046/104868
Application no.:	107064
Product name:	Bidechem Propyzamide 500 WG Herbicide
Active constituent/s:	500 g/kg propyzamide
Applicant name:	Hunan Bide Biochemical Technology Co Ltd
Applicant ACN:	N/A
Summary of use	For the selective control of certain grasses and broadleaf weeds in lettuce, sports turf, home lawns and legumes seed crops and pastures
Date of registration/approval:	4 August 2016
Product registration no.:	82891
Label approval no.:	82891/107064

Application no.:	107262
Product name:	Conquest Probe Adjuvant
Active constituent/s:	1020 g/L polyether modified polysiloxane
Applicant name:	Conquest Crop Protection Pty Ltd
Applicant ACN:	098 814 932
Summary of use	For use as a non-ionic wetter/spreader/penetrant with agricultural pesticides
Date of registration/approval:	4 August 2016
Product registration no.:	82984
Label approval no.:	82984/107262
Application no.:	107098
Product name:	Barmac Metalaxyl Fungicide Granules
Active constituent/s:	50 g/kg metalaxyl
Applicant name:	Amgrow Pty Ltd
Applicant ACN:	100 684 786
Summary of use	For the control of phytophthora root rot of avocados, phytophthora root rot and truck canker of macadamia nuts, phytophthora trunk rot of peaches, damping off of certain vegetable crops
Date of registration/approval:	9 August 2016
Product registration no.:	82911
Label approval no.:	82911/107098
Application no.:	106278
Product name:	Conquest Fipron 200 Insecticide
Active constituent/s:	200 g/L fipronil
Applicant name:	Conquest Crop Protection Pty Ltd
Applicant ACN:	098 814 932
Summary of use	For the control of various insect pests in bananas, brassicas, cotton, wine grapevines, potatoes, sugarcane and for the control of ants in commercial turf
Date of registration/approval:	10 August 2016
Product registration no.:	82626
Label approval no.:	82626/106278
Application no.:	104446
Product name:	GroChem Phosphorous Acid
Active constituent/s:	600 g/L phosphorous (phosphonic) acid present as mono (and) di potassium phosphite
Applicant name:	Agrinova New Zealand Limited t/a Grow-Chem
Applicant ACN:	N/A
Summary of use	For the control of certain diseases in various fruit, vegetables and poppies
Date of registration/approval:	11 August 2016
Product registration no.:	81930
Label approval no.:	81930/104446
Application no.:	106882
Product name:	Surefire Amine 625 Selective Herbicide
Active constituent/s:	625 g/L 2,4-D present as the dimethylamine and diethanolamine salts
Applicant name:	PCT Holdings Pty Ltd
Applicant ACN:	099 023 962
Summary of use	For the control of broadleaf weeds in fallow before direct drilling or sowing of cereals and pastures; and in cereal crops, pastures, sugarcane, peanuts, and non-agricultural areas
Date of registration/approval:	11 August 2016
Product registration no.:	82835
Label approval no.:	82835/106882

Application no.:	106721
Product name:	Transact 365 Fungicide
Active constituent/s:	365 g/L iprodione
Applicant name:	Amgrow Pty Ltd
Applicant ACN:	100 684 786
Summary of use	For the control of fungal diseases in recreational turf
Date of registration/approval:	11 August 2016
Product registration no.:	82773
Label approval no.:	82773/106721
Application no.:	107243
Product name:	Mission Propyzamide 900 WG Herbicide
Active constituent/s:	900 g/kg propyzamide
Applicant name:	Mission Bell Holdings Pty Ltd
Applicant ACN:	149 573 651
Summary of use	For the selective control of certain grasses and broad leaf weeds in canola, lettuce, sports turf, home lawns and legume seed crops and pastures
Date of registration/approval:	11 August 2016
Product registration no.:	82972
Label approval no.:	82972/107243
Application no.:	105689
Product name:	Conquest In2 Spraying Oil
Active constituent/s:	583 g/L paraffinic oil, 120 g/L nonyl phenol ethoxylate, 120 g/L alcohol ethoxylate
Applicant name:	Conquest Crop Protection Pty Ltd
Applicant ACN:	098 814 932
Summary of use	For the use of improving the spreading and wetting of herbicides, insecticides and defoliant on plant surfaces
Date of registration/approval:	12 August 2016
Product registration no.:	82414
Label approval no.:	82414/105689
Application no.:	107203
Product name:	Badger MA Herbicide
Active constituent/s:	200 g/L bromoxynil present as the octanoate, 200 g/L MCPA present as the ethyl hexyl ester
Applicant name:	Crop Culture Pty Ltd
Applicant ACN:	142 860 473
Summary of use	For the control of weeds in wheat, oats, barley, cereal rye, triticale, linseed, grass pastures and turf
Date of registration/approval:	15 August 2016
Product registration no.:	82953
Label approval no.:	82953/107203

Application no.:	107208
Product name:	Terminate 100 Insecticide
Active constituent/s:	100 g/L bifenthrin
Applicant name:	Crop Culture Pty Ltd
Applicant ACN:	142 860 473
Summary of use	For installing chemical soil barriers for new building work, the post-construction management of subterranean termites and the control of a large range of other urban pests
Date of registration/approval:	15 August 2016
Product registration no.:	82957
Label approval no.:	82957/107208

Application no.:	106749
Product name:	Agritrading Spray Grade Ammonium Sulphate 980 Herbicide Adjuvant
Active constituent/s:	980 g/kg ammonium sulphate
Applicant name:	Agritrading Pty Limited
Applicant ACN:	134 291 295
Summary of use	For use with glyphosate based herbicide to minimise antagonism when tank mixing with flowable herbicides, and to improve performance under adverse environmental conditions
Date of registration/approval:	16 August 2016
Product registration no.:	82785
Label approval no.:	82785/106749

2. VARIATIONS OF REGISTRATION

Application no:	107386
Product name:	Huilong Glyphosate 450 CT Herbicide
Active constituent/s:	450 g/L glyphosate (present as isopropylamine salt)
Applicant name:	Huilong Agrochemicals Australia Pty Ltd
Applicant ACN:	165 921 031
Summary of variation:	To change the distinguishing product name and the name that appears on the label from 'AGSPRAY GLYPHOSATE 450 CT' to 'HUILONG GLYPHOSATE 450 CT HERBICIDE'
Date of variation:	18 July 2016
Product registration no.:	66208
Label approval no.:	66208/107386

Application no:	104383
Product name:	Paramite Selective Miticide
Active constituent/s:	110 g/L etoxazole
Applicant name:	Sumitomo Chemical Australia Pty Ltd
Applicant ACN:	081 096 255
Summary of variation:	To extend the use to bryobia mite (bryobia rubrioculus) and two-spotted mite (tetranychus urticae) in almond trees, and to add bryobia mite to the pest controlled in pome and stone fruit
Date of variation:	25 July 2016
Product registration no.:	56791
Label approval no.:	56791/104383

Application no.:	103669
Product name:	Applaud Insecticide
Active constituent/s:	440 g/L buprofezin
Applicant name:	Dow Agrosiences Australia Limited
Applicant ACN:	003 771 659
Summary of use	To extend the use to include control of whitefly species on tomatoes in protected cropping situations
Date of registration/approval:	29 July 2016
Product registration no.:	51547
Label approval no.:	51547/103669

Application no:	104474
Product name:	Belt 480 SC Insecticide
Active constituent/s:	480 g/L flubendiamide
Applicant name:	Bayer Cropscience Pty Ltd
Applicant ACN:	000 226 022
Summary of variation:	To extend the use to include control of heliothis and cluster caterpillar in strawberries
Date of variation:	8 August 2016
Product registration no.:	61223
Label approval no.:	61223/104474

3. LABEL APPROVAL

Application no.:	106402
Product name:	Hy-Clor Multi Concentrate Completely Soluble Granular Chlorine
Active constituent/s:	560 g/kg chlorine present as sodium dichloroisocyanurate
Applicant name:	Hy-Clor (Australia) Pty Ltd
Applicant ACN:	000 655 381
Summary of use:	To approve a new label for the product with the label name 'Homebrand Stabilised Chlorine'
Date of approval:	20 July 2016
Label approval no.:	68314/106402

Application no.:	106031
Product name:	5 In 1 Granules for Salt And Chlorine Pools Pool Pro
Active constituent/s:	750 g/kg chlorine present as trichloroisocyanuric acid, 30 g/kg copper present as copper sulfate pentahydrate
Applicant name:	The Pops Group Pty Ltd
Applicant ACN:	095 828 461
Summary of use	To approve a new label for the product with the label name 'POOLWARE 5 IN 1 GRANULES FOR SALT AND CHLORINE POOLS'
Date of registration/approval:	29 July 2016
Product registration no.:	59018
Label approval no.:	59018/106031

4. VARIATION OF LABEL APPROVAL

Application no.:	105781
Product name:	Fast Action Roundup Ready To Use Weedkiller
Active constituent/s:	20.5 g/L nonanoic acid, 15.2 g/L glyphosate present as the isopropylamine salt
Applicant name:	Monsanto Australia Ltd
Applicant ACN:	006 725 560
Summary of use	To update label claim
Date of variation:	25 July 2016
Product registration no.:	60737
Label approval no.:	60737/105781
Application no.:	107101
Product name:	Mozzigeer Mosquito-Band Anti-Insect Band
Active constituent/s:	0.75 g citronella oil per band
Applicant name:	Franbar Glen Pty Ltd t/a Intelligent Health Systems
Applicant ACN:	109 292 284
Summary of variation:	To update label claims and directions for use including the inclusion of additional precaution statements
Date of variation:	4 August 2016
Product Registration:	60836
Label approval no.:	60836/107101
Application no.:	106000
Product name:	Supapy Insecticide With Natural Pyrethrum
Active constituent/s:	20 g/kg piperonyl butoxide, 4 g/kg pyrethrins
Applicant name:	Botanical Resources Australia Pty Ltd
Applicant ACN:	072 872 201
Summary of variation:	To extend the use to include control of mushroom flies in mushroom growing facilities
Date of variation:	9 August 2016
Product Registration:	64288
Label approval no.:	64288/106000

Veterinary Chemical Products and Approved Labels

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has registered or varied the relevant particulars or conditions of the registration in respect of the following products and has approved the label or varied the relevant particulars or conditions of the approval in respect of the containers for the chemical product, with effect from the dates shown.

1. VETERINARY PRODUCTS BASED ON NEW ACTIVE CONSTITUENTS

Application no.:	59644
Product name:	Cardalis Tablets For Medium Dogs
Active constituent/s:	5 mg/Tb benazepril hydrochloride, 40 mg/Tb spironolactone
Applicant name:	Ceva Animal Health Pty Ltd
Applicant ACN:	002 692 426
Summary of use	For the treatment of heart failure and reduction in mortality caused by chronic degenerative valvular disease in dogs
Date of registration/approval:	9 August 2016
Product registration no.:	69010
Label approval no.:	69010/59644

Application no.:	59645
Product name:	Cardalis Tablets For Small Dogs
Active constituent/s:	2.5 mg/Tb benazepril hydrochloride, 20 mg/Tb spironolactone
Applicant name:	Ceva Animal Health Pty Ltd
Applicant ACN:	002 692 426
Summary of use	For the treatment of heart failure and reduction in mortality caused by chronic degenerative valvular disease in dogs
Date of registration/approval:	9 August 2016
Product registration no.:	69012
Label approval no.:	69012/59645

Application no.:	59646
Product name:	Cardalis Tablets For Large Dogs
Active constituent/s:	10 mg/Tb benazepril hydrochloride, 80 mg/Tb spironolactone
Applicant name:	Ceva Animal Health Pty Ltd
Applicant ACN:	002 692 426
Summary of use	For the treatment of heart failure and reduction in mortality caused by chronic degenerative valvular disease in dogs
Date of registration/approval:	9 August 2016
Product registration no.:	69013
Label approval no.:	69013/59646

2. VETERINARY PRODUCTS BASED ON EXISTING ACTIVE CONSTITUENTS

Application no.:	60193
Product name:	Piranha Pour-On Lousicide for Sheep
Active constituent/s:	10 g/L thiacloprid
Applicant name:	Bayer Australia Ltd (Animal Health)
Applicant ACN:	220 001 387 14
Summary of use	For the control of neonicotinoid susceptible and IGR resistant strains of body lice (<i>bovicola ovis</i>) on shorn sheep up to 7 days off-shears
Date of registration/approval:	28 July 2016
Product registration no.:	69187
Label approval no.:	69187/60193

Application no.:	102731
Product name:	Zycortal 25 mg/mL Prolonged Release Suspension For Injection For Dogs
Active constituent/s:	Each mL contains 25 mg deoxycortone pivalate
Applicant name:	Dechra Ltd
Applicant ACN:	N/A
Summary of use	For use as replacement therapy for the mineralocorticoid deficit in dogs with primary hypoadrenocorticism (Addison's disease)
Date of registration/approval:	9 August 2016
Product registration no.:	81279
Label approval no.:	81279/102731

Application no.:	106416
Product name:	Independents Own Incarcerate Easy-Dose Pour-On Cattle Lice And Fly Treatment
Active constituent/s:	15 g/L deltamethrin
Applicant name:	Apparent Pty Ltd
Applicant ACN:	143 724 136
Summary of use	For use in the control of stable fly, house fly, lice and synthetic pyrethroid susceptible buffalo fly, on beef and dairy cattle
Date of registration/approval:	16 August 2016
Product registration no.:	82675
Label approval no.:	82675/106416

3. LABEL APPROVAL

Application no.:	106731
Product name:	Panoramis (Spinosad + Milbemycin Oxime) Chewable Tablets For Dogs 27.1–54 kg
Active constituent/s:	Each tablet contains 1620 mg spinosad, 27 mg milbemycin oxime
Applicant name:	Elanco Animal Health a div of Eli Lilly Aust Pty Ltd
Applicant ACN:	000 233 992
Summary of use:	To approve a new label for the product with the label name 'COMFORTIS PLUS (SPINOSAD + MILBEMYCIN OXIME) CHEWABLE TABLETS FOR DOGS 27.1–54 kg'
Date of approval:	25 July 2016
Label approval no.:	65205/106731

Application no.:	106825
Product name:	Panoramis (Spinosad + Milbemycin) Chewable Tablets For Dogs 4.6–9kg
Active constituent/s:	Each tablet contains 270 mg spinosad, 4.5 mg milbemycin
Applicant name:	Elanco Animal Health a div of Eli Lilly Aust Pty Ltd
Applicant ACN:	000 233 992
Summary of use:	To approve a new label for the product with the label name 'COMFORTIS PLUS (SPINOSAD + MILBEMYCIN OXIME) CHEWABLE TABLETS FOR DOGS 4.6–9 kg'
Date of approval:	25 July 2016
Label approval no.:	65207/106825

Application no.:	106739
Product name:	Panoramis (Spinosad + Milbemycin Oxime) Chewable Tablets for Dogs 9.1–18 kg
Active constituent/s:	Each tablet contains 560 mg spinosad, 9.3 mg milbemycin oxime
Applicant name:	Elanco Animal Health a div of Eli Lilly Aust Pty Ltd
Applicant ACN:	000 233 992
Summary of use:	To approve a new label for the product with the label name 'COMFORTIS PLUS (SPINOSAD + MILBEMYCIN OXIME) CHEWABLE TABLETS FOR DOGS 9.1–18 kg'
Date of approval:	25 July 2016
Label approval no.:	65204/106739
Application no.:	106827
Product name:	Panoramis (Spinosad + Milbemycin Oxime) Chewable Tablets For Dogs 2.3–4.5 kg
Active constituent/s:	Each tablet contains 140 mg spinosad, 2.3 mg milbemycin
Applicant name:	Elanco Animal Health a div of Eli Lilly Aust Pty Ltd
Applicant ACN:	000 233 992
Summary of use:	To approve a new label for the product with the label name 'COMFORTIS PLUS (SPINOSAD + MILBEMYCIN OXIME) CHEWABLE TABLETS FOR DOGS 2.3–4.5 kg'
Date of approval:	26 July 2016
Label approval no.:	65208/106827
Application no.:	106734
Product name:	Panoramis (Spinosad + Milbemycin Oxime) Chewable Tablets Dor Dogs 18.1–27 kg
Active constituent/s:	Each tablet contains 810 mg spinosad, 13.5 mg milbemycin oxime
Applicant name:	Elanco Animal Health a div of Eli Lilly Aust Pty Ltd
Applicant ACN:	000 233 992
Summary of use:	To approve a new label for the product with the label name 'COMFORTIS PLUS (SPINOSAD + MILBEMYCIN OXIME) CHEWABLE TABLETS FOR DOGS 18.1–27 kg'
Date of approval:	26 July 2016
Label approval no.:	65203/106734

4. VARIATION OF LABEL APPROVAL

Application no.:	100911
Product name:	Pirahna Dip For Sheep
Active constituent/s:	480 g/L thiacloprid
Applicant name:	Bayer Australia Ltd (Animal Health)
Applicant ACN:	000 138 714
Summary of variation:	To amend label advice regarding dip additive compatibility and safe use in breeding ewes, and amendment of the re-treatment restraint
Date of variation:	26 July 2016
Product registration no.:	63766
Label approval no.:	63766/100911

Approved Active Constituents

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has approved or varied the relevant particulars or conditions of the approval of the following active constituents, with effect from the dates shown.

1. ACTIVE CONSITUTENT

Application no.:	60514
Active constituent/s:	Momfluorothrin
Applicant name:	Sumitomo Chemical Australia Pty Ltd
Applicant ACN:	081 096 255
Summary of use:	For use in agricultural chemical products
Date of approval:	3 August 2016
Approval no.:	69332

Application no.:	50778
Active constituent/s:	Pyriofenone
Applicant name:	Ishihara Sangyo Kaisha Ltd
Applicant ACN:	N/A
Summary of use:	For use in agricultural chemical products
Date of approval:	3 August 2016
Approval no.:	65374

Application no.:	57636
Active constituent/s:	Fosthiazate
Applicant name:	Ishihara Sangyo Kaisha Ltd
Applicant ACN:	N/A
Summary of use:	For use in agricultural chemical products
Date of approval:	4 August 2016
Approval no.:	68152

Application no.:	104785
Active constituent/s:	2,4-D
Applicant name:	Profeng Australia Pty Ltd
Applicant ACN:	156 055 533
Summary of use:	For use in agricultural chemical products
Date of approval:	10 August 2016
Approval no.:	82005

Application no.:	105133
Active constituent/s:	Iodosulfuron-methyl-sodium
Applicant name:	Shandong Rainbow International Co., Ltd
Applicant ACN:	N/A
Summary of use:	For use in agricultural chemical products
Date of approval:	10 August 2016
Approval no.:	82174

Application no.:	102439
Active constituent/s:	Cyazofamid
Applicant name:	Ishihara Sangyo Kaisha, Ltd
Applicant ACN:	N/A
Summary of use:	For use in agricultural chemical products
Date of approval:	10 August 2016
Approval no.:	81155

Amendments to the APVMA MRL Standard

The Australian Pesticides and Veterinary Medicines Authority (APVMA) approves maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. The MRLs approved by the APVMA are associated with a regulatory decision to register a product, grant a permit approval, or as an outcome from a review decision and are set out in the *Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) 2012*. The *MRL Standard* lists MRLs of substances that may arise from the approved use of agricultural and veterinary chemical products containing those substances on commodities used for human consumption as well as livestock feeds. The *MRL Standard* also provides the relevant residue definitions to which these MRLs apply. There may be situations where the residue definition for monitoring and enforcement is different to the definition used for dietary risk assessment purposes.

MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. In considering MRLs and variation to MRLs, the APVMA takes into account studies on chemistry, metabolism, analytical methodology, residues, toxicology, good agricultural practice and dietary exposure. In approving MRLs, the APVMA is satisfied, from dietary exposure assessment, that the levels set are not an undue hazard to human health.

The APVMA has amended the *MRL Standard* and the changes will have affect the day after the instrument is registered.

Details of the amendment can be found in the *Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) Amendment Instrument 2016 (No. 11)*.

The amendments will be incorporated into the compilation of the [Agricultural and Veterinary Chemicals Code Instrument No. 4 \(MRL Standard\) 2012](#).

The *MRL Standard* is accessible via the ComLaw website www.comlaw.gov.au or the links above.

Proposal to amend Schedule 20 in the Australia New Zealand Food Standards Code

In the previous notice, the APVMA gazetted amendments which it has approved varying maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in the APVMA's *MRL Standard*, have been made.

Under section 82 of the *Food Standards Australia New Zealand Act 1991*, the APVMA is proposing to incorporate those variations (*Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) Amendment Instrument 2016 (No. 11)*) to MRLs into Schedule 20—Maximum residue limits in the *Australia New Zealand Food Standards Code*.

MRLs contained in Schedule 20 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Schedule 20 permits the sale of treated foods and protects public health and safety by minimising residues in foods consistent with the effective control of pests and diseases.

The APVMA and FSANZ are satisfied, based on dietary exposure assessments and current health standards, that the proposed limits are not harmful to public health.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) will make a Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO).

The APVMA invites comment on these proposals. Details on how to make a submission appear near the end of this notice, below the details of the proposed amendment.

The APVMA will consider any public comments made in response to this proposal. If the APVMA decides to proceed with the proposal, it will further notify any variations it makes to Schedule 20 in the APVMA *Gazette*. The variations will take effect as from the date of that subsequent notice.

**PROPOSED AMENDMENT (AGRICULTURAL AND VETERINARY CHEMICALS CODE INSTRUMENT NO. 4
(MRL STANDARD) AMENDMENT INSTRUMENT 2016 (NO. 11))**

Note: Subsection 82(2) of the *Food Standards Australia New Zealand Act 1991* provides that variations to standards are legislative instruments, but are not subject to disallowance or sunseting.

To commence: on gazettal of variation

[1] The table to section S20–3 in Schedule 20 is varied by

[1.1] inserting in alphabetical order

Agvet chemical: Pyriofenone

Permitted residue: Pyriofenone

All other foods	0.05
Dried grapes (currants, raisins and sultanas)	2
Edible offal (mammalian)	*0.01
Eggs	*0.01
Fruiting vegetables, cucurbits	0.7
Grapes	0.5
Meat (mammalian)	*0.01
Milks	*0.01
Poultry, edible offal of	*0.01
Poultry meat	*0.01

[1.2] omitting from each of the following chemicals, the foods and associated MRLs

Agvet chemical: Azoxystrobin

Permitted residue: Azoxystrobin

Beans [except broad and soya bean]	2
Meat (mammalian)	*0.01
Peas (pods and succulent, immature seeds)	2

Agvet chemical: Propachlor

Permitted residue: Sum of propachlor and metabolites hydrolysable to N-isopropylaniline, expressed as propachlor

Lettuce, head	*0.02
Lettuce, leaf	*0.02

[1.3] inserting for each of the following chemicals the foods and associated MRLs in alphabetical order

Agvet chemical: Azoxystrobin

Permitted residue: Azoxystrobin

Legume vegetables	3
Lupin (dry)	T0.05
Meat (mammalian) (in the fat)	0.02

Agvet chemical: Boscalid

Permitted residue—commodities of plant origin:
Boscalid

Permitted residue—commodities of animal origin:
Sum of boscalid, 2-chloro-N-(4'-chloro-5-hydroxybiphenyl-2-yl) nicotinamide and the glucuronide conjugate of 2-chloro-N-(4'-chloro-5-hydroxybiphenyl-2-yl) nicotinamide, expressed as boscalid equivalents

Lupin (dry)	T3
-------------	----

Agvet chemical: Propachlor

Permitted residue: Sum of propachlor and metabolites hydrolysable to N-isopropylaniline, expressed as propachlor

Mizuna	T1
--------	----

[1.4] omitting for each of the following chemicals, the maximum residue limit for the food and substituting

Agvet chemical: Azoxystrobin

Permitted residue: Azoxystrobin

Edible offal (mammalian)	0.03
Fruiting vegetables, cucurbits	2

INVITATION FOR SUBMISSIONS

Written submissions are invited from interested individuals and organisations to assist the APVMA in considering the proposal to vary Schedule 20—Maximum residue limits in the *Australia New Zealand Food Standards Code*. Submissions should be strictly confined to relevant matters that the APVMA must consider (such as public health and safety) which are associated with the occurrence of the proposed residues in foods. Comments received outside these grounds will not be considered by the APVMA. Claims made in submissions should be supported wherever possible by referencing or including relevant studies, research findings, trials, surveys etc. Technical information should be in sufficient detail to allow independent scientific assessment.

Please note that FSANZ will make a SPS notification to the WTO and submissions related to impacts on international trade should be made to FSANZ in response to that notification.

Submissions must be made in writing and should be clearly marked as a 'submission on the proposed amendment to Schedule 20' and quote the correct amendment number.

DEADLINE FOR PUBLIC SUBMISSIONS: 6 pm (AEST) 20 September 2016

SUBMISSIONS RECEIVED AFTER THIS DEADLINE WILL ONLY BE CONSIDERED BY PRIOR ARRANGEMENT

Submissions received after this date will only be considered if agreement for an extension has been given prior to this closing date. Agreement to an extension of time will only be given if extraordinary circumstances warrant an extension to the submission period.

For further information please contact:

Variations to Schedule 20 of the Australia New Zealand Food Standards Code

The APVMA has previously gazetted particular amendments which it had made to the APVMA *MRL Standard* and which have been proposed as variations to maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in Schedule 20—Maximum Residue Limits of the *Australia New Zealand Food Standards Code*. This notice pertains to proposals (No. 7) gazetted on 31 May 2016 (No. APVMA 11).

Submissions have been sought on these proposals and the APVMA has written separately to each person or organisation that made a submission. All matters raised in the submissions have been resolved.

Under subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*, the APVMA has, by legislative instrument, incorporated these variations to MRLs into Schedule 20. A copy of the Amendment Instrument (No. APVMA 8, 2016) accompanies this notice. For a complete and up-to-date version of Schedule 20, including these amendments together with their Explanatory Statement, please refer to the Federal Register of Legislative Instrument available on the Comlaw website at www.comlaw.gov.au.

Based on dietary exposure assessments and current health standards, the APVMA and FSANZ are satisfied that these MRLs are not harmful to public health. MRLs contained in Schedule 20 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Schedule 20 permits the sale of treated foods and protects public health by minimising residues in foods consistent with the effective control of pests and diseases.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) made Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO) in relation to these variations and no comment was received in response to that notice.

A copy of these variations have been given to FSANZ.

The variations take effect as from the date of this notice.

This notice is published in accordance with subsection 82(7) of the *Food Standards Australia New Zealand Act 1991*.

Australian Government

**Australian Pesticides and
Veterinary Medicines Authority**

***Australia New Zealand Food Standards
Code—Schedule 20—Maximum residue
limits Variation Instrument
No. APVMA 8, 2016***

I, Alan Norden, Executive Director, Registration Management and Evaluation and delegate of the Australian Pesticides and Veterinary Medicines Authority, acting in accordance with my powers under subsection 11(1) of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*, make this instrument for the purposes of subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*.

Alan Norden
Delegate of the Chief Executive Officer of the Australian Pesticides and Veterinary
Medicines Authority

Dated this Eighteenth day of August 2016

Part 1 Preliminary

1 Name of instrument

This instrument is the *Australia New Zealand Food Standards Code—Schedule 20—Maximum residue limits Variation Instrument* No. APVMA 8, 2016.

2 Commencement

In accordance with subsection 82(8) of the *Food Standards Australia New Zealand Act 1991*, this instrument commences on the day it is published in the *Gazette*.

Note: A copy of the variations made by the Amendment Instrument was published in the Commonwealth of Australia Agricultural and Veterinary Chemicals Gazette No. APVMA 17 of 23 August 2016.

3 Object

The object of this instrument is for the APVMA to make variations to Schedule 20—Maximum residue limits in the *Australia New Zealand Food Standards Code* to include or change maximum residue limits pertaining to agricultural and veterinary chemical products.

4 Interpretation

In this instrument: —

APVMA means the Australian Pesticides and Veterinary Medicines Authority established by section 6 of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*; and

Principal Instrument means Schedule 20—Maximum residue limits in the *Australia New Zealand Food Standard Code* as defined in Section 4 of the *Food Standards Australia New Zealand Act 1991* being the Code published in *Gazette* No. P 27 on 27 August 1987 together with any amendments of the standards in that Code. Schedule 20 was published in the *Food Standards Gazette* FSC 96 on Thursday 10 April 2015 and was registered as a legislative instrument on 1 April 2015 (F2015L00468).

Part 2 Variations to Schedule 20—Maximum Residue Limits

5 Variations to Schedule 20

The Schedule to this instrument sets out the variations made to the Principal Instrument by this instrument.

Schedule

Variations to Schedule 20—Maximum residue limits

[1] The table to section S20–3 in Schedule 20 is varied by

[1.1] omitting from each of the following chemicals, the foods and associated MRLs

Agvet chemical: Prothioconazole

*Permitted residue—commodities of plant origin:
Sum of prothioconazole and prothioconazole desthio (2-(1-chlorocyclopropyl)-1-(2-chlorophenyl)-3-(1H-1,2,4-triazol-1-yl)-propan-2-ol), expressed as prothioconazole*

*Permitted residue—commodities of animal origin:
Sum of prothioconazole, prothioconazole desthio (2-(1-chlorocyclopropyl)-1-(2-chlorophenyl)-3-(1H-1,2,4-triazol-1-yl)-propan-2-ol), prothioconazole-3-hydroxy-desthio (2-(1-chlorocyclopropyl)-1-(2-chloro-3-hydroxyphenyl)-3-(1H-1,2,4-triazol-1-yl)-propan-2-ol) and prothioconazole-4-hydroxy-desthio (2-(1-chlorocyclopropyl)-1-(2-chloro-4-hydroxyphenyl)-3-(1H-1,2,4-triazol-1-yl)-propan-2-ol), expressed as prothioconazole*

Pulses	T0.1
--------	------

[1.2] inserting for each of the following chemicals the foods and associated MRLs in alphabetical order

Agvet chemical: Azoxystrobin

Permitted residue: Azoxystrobin

Rape seed (canola)	T0.7
--------------------	------

Agvet chemical: Buprofezin

Permitted residue: Buprofezin

Walnut	T0.05
--------	-------

Agvet chemical: Cyproconazole

Permitted residue: Cyproconazole, sum of isomers

Rape seed (canola)	T0.7
--------------------	------

Agvet chemical: Prothioconazole

Permitted residue—commodities of plant origin:
Sum of prothioconazole and prothioconazole desthio (2-(1-chlorocyclopropyl)-1-(2-chlorophenyl)-3-(1H-1,2,4-triazol-1-yl)-propan-2-ol), expressed as prothioconazole

Permitted residue—commodities of animal origin:
Sum of prothioconazole, prothioconazole desthio (2-(1-chlorocyclopropyl)-1-(2-chlorophenyl)-3-(1H-1,2,4-triazol-1-yl)-propan-2-ol), prothioconazole-3-hydroxy-desthio (2-(1-chlorocyclopropyl)-1-(2-chloro-3-hydroxyphenyl)-3-(1H-1,2,4-triazol-1-yl)-propan-2-ol) and prothioconazole-4-hydroxy-desthio (2-(1-chlorocyclopropyl)-1-(2-chloro-4-hydroxyphenyl)-3-(1H-1,2,4-triazol-1-yl)-propan-2-ol), expressed as prothioconazole

Chick-pea (dry)	T0.7
Lentil (dry)	T0.7
Pulses [except chick-pea (dry); lentil (dry)]	T0.1

Agvet chemical: Spirotetramat

Permitted residue: Sum of spirotetramat, and cis-3-(2,5-dimethylphenyl)-4-hydroxy-8-methoxy-1-azaspiro[4.5]dec-3-en-2-one, expressed as spirotetramat

Pineapple	T0.1
-----------	------

New Agricultural Active Constituent Bicyclopyrone

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application for the approval of a new active constituent, bicyclopyrone, for use as an herbicide in agricultural products.

Common name	Bicyclopyrone
IUPAC name:	4-hydroxy-3-{2-[(2-methoxyethoxy)methyl]-6-(trifluoromethyl)-3-pyridylcarbonyl}bicyclo[3.2.1]oct-3-en-2-one
Chemical abstracts name:	bicyclo[3.2.1]oct-3-en-2-one, 4-hydroxy-3-[[2-[(2-methoxyethoxy)methyl]-6-(trifluoromethyl)-3-pyridinyl]carbonyl]
CAS number:	352010-68-5
Molecular formula:	C ₁₉ H ₂₀ F ₃ NO ₅
Molecular weight:	399.39

Structure:

Chemical family:	Triketone
Mode of action:	Herbicide inhibiting 4-hydroxyphenylpyruvate dioxygenase (HPPD)

SUMMARY OF THE APVMA'S EVALUATION OF BICYCLOPYRONE ACTIVE CONSTITUENT

The Scientific Assessment and Chemical Review Program of the APVMA has evaluated the chemistry aspects of bicyclopyrone active constituent (manufacturing process, quality control procedures, batch analysis results and analytical methods) and found them to be acceptable.

On the basis of the data provided, and the toxicological assessment, it is proposed that the following APVMA Active Constituent Standard be established for bicyclopyrone active constituent:

Constituent	Specification	Level
Bicyclopyrone	Assay	950 g/kg minimum on a dry weight basis

Impurities of toxicological significance are not expected to occur in bicyclopyrone as a result of the raw materials and the synthetic route used.

The APVMA has considered the toxicological aspects of bicyclopyrone, and concluded that there are no toxicological concerns to the approval of this active constituent. The ADI for bicyclopyrone was established at 0.001 mg/kg bw/d. The ARfD for bicyclopyrone was established at 0.003 mg/kg bw.

The Secretary of the Department of Health published the final scheduling decision to create a new Schedule 6 listing for bicyclopyrone in the Standard for the Uniform Scheduling of Medicines and Poisons, with a cut-off to Schedule 5 in preparations at 20% or less of bicyclopyrone, with an implementation date of 1 February 2016.

The APVMA is satisfied that the proposed importation and use of bicyclopyrone would not be an undue toxicological hazard to the safety of people exposed to it during its handling and use.

MAKING A SUBMISSION

In accordance with sections 12 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether the application for approval of bicyclopyrone should be granted. Submissions should relate only to matters that are considered in determining whether the safety criteria set out in section 5A of the Agvet Code have been met. Submissions should state the grounds on which they are based.

Submissions must be received by the APVMA within 28 days of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

When making a submission please include:

- contact name
- company or group name (if relevant)
- email or postal address (if available)
- the date you made the submission.

All personal and *confidential commercial information (CCI)*¹ material contained in submissions will be treated confidentially.

Written submissions should be addressed in writing to:

Director of Chemistry and Manufacture
Scientific Assessment and Chemical Review Program
Australian Pesticides and Veterinary Medicines Authority
PO Box 6182
KINGSTON ACT 2604

Phone: +61 2 6210 4701

Fax: +61 2 6210 4721

Email: enquiries@apvma.gov.au

¹ A full definition of 'confidential commercial information' is contained in the [Agvet Code](#).

New Chemical Product Kusabi 300 SC Fungicide Containing Pyriofenone

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application for registration of a new product containing a new active constituent. The product is Kusabi 300 SC Fungicide.

PARTICULARS OF THE APPLICATION

Proposed product name(s):	Kusabi 300 SC Fungicide
Applicant company:	Ishihara Sangyo Kaisha Ltd
Name of active constituent:	Pyriofenone
Signal heading:	Schedule 5
Summary of proposed use:	For the control of powdery mildew in cucurbits and grapes
Pack sizes:	1 L, 2 L, 5 L, 10 L
Withholding period:	Cucurbits: Not required when used as directed Grapevines: DO NOT harvest for 5 weeks after application Grazing: DO NOT graze or feed treated crops to animals.

SUMMARY OF THE APVMA'S EVALUATION OF KUSABI 300SC FUNGICIDE IN ACCORDANCE WITH THE REQUIREMENTS OF SECTION 14(1)(C) OF THE AGRICULTURAL AND VETERINARY CHEMICALS CODE (THE 'AGVET CODE'), SCHEDULED TO THE *AGRICULTURAL AND VETERINARY CHEMICALS CODE ACT 1994*

1. The APVMA has evaluated the application and in its assessment in relation to whether the safety criteria have been met in accordance with the definition set out in section 5A of the Agvet Code, and proposes to determine that:
 - (i) The APVMA is satisfied that the proposed use of Kusabi 300 SC Fungicide would not be an undue hazard to the safety of people exposed to it during its handling and use.

The Office of Chemical Safety (OCS) in the Department of Health has conducted a risk assessment on the product and concluded that there should be no adverse effects on human health from the use of Kusabi 300 SC Fungicide when used in accordance with the label directions.

- (ii) The APVMA is satisfied that the proposed use of Kusabi 300 SC Fungicide will not be an undue hazard to the safety of people using anything containing its residues.

Pyriofenone has an Acceptable Daily Intake (ADI) of 0.09 mg/kg bw/d, with the National Estimated Daily Intake (NEDI) equivalent to <5 % of the ADI.

- (iii) The APVMA is satisfied that the proposed use of Kusabi 300 SC Fungicide containing the active constituent pyriofenone is not likely to be harmful to human beings if used according to the product label directions.
- (iv) The APVMA is satisfied that the proposed use of Kusabi 300 SC Fungicide is not likely to have an unintended effect that is harmful to animals, plants or the environment if used according to the product label directions.

Studies of the environmental fate of pyriofenone have shown that it dissipates rapidly in the soil under field conditions with a half-life of 32 days or less, and appears to have low to slight mobility in soil, with residues restricted to the top 10 cm of soil. Photolysis is unlikely to be a major degradation route in soils, but it may photodegrade slightly quicker in water.

In summary, pyriofenone was shown to be practically non-toxic to birds, slightly toxic to fish and aquatic invertebrates, moderately toxic to algae, and not toxic to bees and earthworms. Assessment of the risk to aquatic organisms from runoff of both the active constituent and major metabolites was found to be acceptable.

The APVMA has considered these findings and accepts these conclusions.

2. The APVMA has evaluated the application and in its assessment in relation to whether the efficacy criteria have been met in accordance with the definition set out in section 5B of the Agvet Code, and proposes to determine that:
 - (i) In relation to its assessment of efficacy under section 14(3)(f), the APVMA is satisfied that data from trials supporting the efficacy of the Kusabi 300 SC Fungicide adequately demonstrate that if used according to the product label directions, the product is effective for its proposed use for the control of powdery mildew on cucurbits or grapes.
3. The APVMA has evaluated the application and in its assessment in relation to whether the trade criteria have been met in accordance with the definition set out in section 5C of the Agvet Code, and proposes to determine that:
 - (ii) The APVMA is satisfied that the proposed use of Kusabi 300 SC Fungicide would not adversely affect trade between Australia and places outside Australia as the product is not for use in animals producing any major Australian export commodities.

Grapes (including dried grapes) and wine are considered to be major export commodities, as are commodities of animal origin, such as meat, offal and dairy products, which may be derived from livestock fed feeds produced from commodities treated with pyriofenone.

Maximum Residue Limits (MRLs) are proposed of 0.7 mg/kg, 0.5 mg/kg and 2 mg/kg are proposed for cucurbits (fruiting), grapes and dried grapes (currants, raisins, sultanas) respectively.

The proposed grape MRL is lower than the European table grape MRL (0.9 mg/kg) and higher than the grape MRL for the USA (0.30 mg/kg).

Quantifiable residues of pyriofenone are not expected in wine for export, as no quantifiable residues were detected in wine when the last application was made at or near growth stage EL 31 (i.e. developing fruit (berries) at pea-size). The risk to trade in Australian wine is therefore considered to be low.

Quantifiable residues of pyriofenone are not expected to occur in animal commodities, therefore the overall risk to trade is considered to be low.

The following label statements have been proposed to manage the trade risks associated with the proposed use:

WITHHOLDING PERIODS:

Grapevines: DO NOT HARVEST FOR 5 WEEKS AFTER APPLICATION.

Grazing: DO NOT GRAZE OR FEED TREATED CROPS TO ANIMALS.

Export of treated produce

Growers should note that suitable MRLs or import tolerances do not exist in all markets for produce treated with Kusabi 300 SC Fungicide. In some situations export requirements may be met by limiting application number and/or imposing a longer withholding period than specified above. If you are growing produce for export, please check with ISK Biosciences Oceania Pty Ltd, your industry body or the Australian Wine Research Institute (AWRI) www.awri.com.au for the latest information on MRLs and import tolerances and any potential trade issues and their management before using Kusabi 300 SC Fungicide.

Kusabi 300 SC Fungicide should not be applied later than EL31 (berries pea size) when grapes are to be used to make wine for export. Contact your winery or AWRI for the updated information on MRLs and overseas tolerances BEFORE using Kusabi 300 SC Fungicide.'

Comment is sought from the relevant industry groups on the perceived level of risk and whether any industry-initiated strategies are required to manage that risk.

FURTHER INFORMATION

A Public Release Summary (PRS) of the evaluation of this product is available from the APVMA website's Public Consultation page, www.apvma.gov.au/news-and-publications/public-consultations or by contacting the evaluator listed below.

MAKING A SUBMISSION

In accordance with section 13 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether Kusabi 300 SC Fungicide should be registered. Submissions should relate only to matters that are required by the APVMA to be taken into consideration in determining whether the safety, efficacy or trade criteria have been met. Submissions should state the grounds on which they are based.

Submissions must be received by the APVMA within 28 days of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

Relevant comments will be taken into account by the APVMA in deciding whether the product should be registered and in determining appropriate conditions of registration and product labelling.

When making a submission please include:

- contact name
- company or group name (if relevant)
- email or postal address
- the date you made the submission.

All personal and confidential commercial information (CCI) material contained in submissions will be treated confidentially.

Written submissions should be addressed in writing to:
